#### DESERET EVENING NEWS: SATURDAY, JULY 6, 1901.

As Compared With Last Season's Achievements in Salt Lake.

OUTLOOK FOR THE FUTURE.

How the Local Professionals and Amateurs Are Showing Up -New Riders Are Coming Soon.

Indications point to a measurably successful season for the Salt Palace saucer, and the manager of the track, Mr. Hishel, is doing his utmost to make each succeeding meet more interesting than the last.

It was thought by some that the opening of the Butte track would be a severe blow to the one here, but it seems that those who made that prediction were mistaken. It is true that some of the fastest riders left here to go to Montana, but if reports are true most of them will be glad enough to return before long. Chapman writes that he will return in time to take part in next lucesualy a events, and others may fol-IOW HIS EXAMINE.

It is the bench of those in charge of the local track that the face loving public wants to see "new faces on the aucer,' and the management intenus o gratify their desire. Negotiations are now pensing with a number of hoted fiders in the mast and it is expected that before long some of them an be here.

RECORDS BROKEN THIS YEAR.

Up to date the races have been unsually good and a number of records have gone tunnoing. On sune 4th Edhe Smith rode in the quarter mue open amateur, covering the distance in 30 2-0, upping one-oton of a second from the record. John Chapman's record of 1.91 1-5 for a half mile, was beaten by y, E, Samuelson, a Utah boy, on June oth. his time was 1:00 1-5.

the one-inite handlcap amateur recrd of 1.022-5, made by Samuelson on aiy isth last year, has also been beata. On June 21st Eadle Smith rode rom scratch in 1:593-5. The one-mile handicap professional record made by John Chapman last September was roken here by Iver Lawson. Chapman's time was 1:58, Lawson's time stands at 1:554-5. One week later doyd McFarland at New Heaven, lowused the record one-fifth of a second. fligh there is the one-mile tandem andicap record, which has been beaten here this year. On June 29th last year, Lucas and Samuelson made the time of 1:592-5. Eddie Smith and Eari Clayton lowered the record eight sec-onds. They role the mile in 1:514-5. In the second heat of the same event, licagren and Hume made the time of

53, and in the third heat, Grames and

Stoney of the Lageon team, to play out the present schedule as soon as possible CHARLES AND CLEM TURVILLE. and then begin a second season is certainly a good suggestion, and is prac-licable. If the clerks are given a half holiday on Wednesday as outlined in the "News" a few days since, they would patronize the game on that day and it would be profitable for the teams.

#### AMATEURS WANT LAP RACE.

Clamoring for a Ten Mile Event But Manager Rishel Says Nay.

The amateurs down at the Salt Pal-ace are trying to induce Manager Rish-el to put on a ten mile lap amateur event, but your Uncle Bill is a bit too wise and says hay, hay.

Mr. Rishel says he needs the riders, and does not care to have any of them plaid up as a result of bad spills. He argues that eight or ten amateurs can no more ride ten miles without a seri-ous mishap than a cow can walk a slack wire. Such races require the best of head work and stick-to-itiveness, and a slight mistake or a little curclessness would surely terminate disastrous-ly for the riders.

BALL TEAMS BAD LUCK.

Park City Nine Plays Some Good Games but Cannot Win.

An unprecedented streak of bad luck has hovered around the Park City baseball team almost from the beginning of the season's games-and it is rather hard to account for it. The record shows that their fielding and batting averages have been comparatively good, and in many instances they have played a better and closer game than the opposing teams, but somehow it has been next to impossible for them to win out. On several occasions they have had games all but won but at the last moment something would happen to cause their defeat. On June 29th they had decidedly the best of an argument with the Salt Lakes, but the score was tied in the ninth inning and Salt Lake won in the tenth. And so it has been with many of the games, but the bad luck has stuck with them.

#### JACK DOYLE WAS WRATHY.

#### Chicago Team Player Whips a Illeacherite for an Insult.

Jack Doyle of the Chicago team was up to one of his old-time tricks again on Monday, when he jumped into the bleachers and assaulted one of the spec tators who insulted him. Of course it is unfortunate that Doyle should adopt such methods, as it hurts the game. But sometimes a player is justified in doing just such a thing. What right have a lot of hoodlums to insult the players or the field? In the first place it is the most cowardly kind of an act, because the insulter on the bleachers or stand. for that matter, are behind a wire screen and a player is forced to go to

extreme measures to get at them. They know this and call the players all kinds of names, whereas, if they met the same player on the street they would hide in some doorway until he passed. Rooting for the home team and poking fun at the players is all right and helps to make the game interesting, but insulting a player and becoming persona is all wrong. Every league should pass a rule ejecting any spectator who in-sults a player from the grounds and the same ought to hold good with the play er if he insults a spectator. That Doyle could not stand it any longer and did not care for the consequences of his act is about the truth of the matter.-Record-Herald.

#### MACABEES VS. SALT LAKES.

Known in Riding Circles as the "Motor Brothers."

#### լ, վախանական արտանական արտանան անական անգանան անգանան անգանան անգանան անգան անգան անգան անգան անգան անգան անգան

#### 

BOVE is an excellent likeness of Charley and Clem Turville, not inappropriately called the "Motor Brothers," on their famous three-and-a-half horse power motorcycle, on which they have broken so many records during the last year.

Charley is twenty-eight years of age, weighs 140 pounds, and began his racing career in Philadelphia in 1896, entering the professional class from the start. He won the first race he ever entered, it being a one-mile professional novice. He also won many raaces from five to fifty miles. Charley first became prominent in the racing world in 1898, when he rode in a 142 hour contest at Madison Square Garden in New York. He finished eighth, and one month later startled all New York by riding twenty-four hours without dismounting once. In that race he rode 450 miles and got second money. That was the first twenty-four hour race ever pulled off. The same year he went to San Francisco with the American Racing association and rode another twentyfour hours without dismounting from his wheel. At that time he got the credit of being the greatest twenty-four hour rider in the world. In the first team race at Madison Square Garden he won second individual money. Last winter he again entered the races at New York, but met with an accident which laid him up for several weeks.

Charley Turville is regarded as being one of the best middle-distance riders in the world, and he has few equals in following pace. When once he tacks onto the rear wheel of a motor it is next to impossible to shake him.

Clem Turville is twenty-five years of age and weighs 150 pounds. Like his brother, he began racing at Philadelphia in 1896, riding with the professionals. Clem has kept no record of his achievements on the track because, he says, 'it don't amount to anything." At Allentown, Penn., Clem rode away from a fast bunch of riders in a mile open professional. From the time he began racing until he came here he has finished second but few times. On the Salt Palace track during its first season he won every two-mile race, open and handicap, and also broke the world's record for an unpaced mile on an eightlap track. His time was 2:01 1-5.

He made another spiendid record in 1900 at Los Angeles when he won the mile-handicap professional in 1:55, with a 35-yard handlcap.

The riders who have a quicker sprint than Clem Turville are few and far between. This was demonstrated last Tuesday evening when he surprised the crowd at the Sait Palace by jumping out on the home stretch and winning a race from Samuelson and Vaughan. Put the two riders on a motor and you have one of the very fastest motorcycle teams in existence. Salt Lakers will remember how they broke records here last summer for various distances, and won every motor event they entered. The Turvilles will ride on the Salt Palace track the balance of the season. They are both rapidly getting into good shape and will certainly make a good showing before the last race is run.

## ENGLAND'S GREYHOUNDS.

She Built Nearly Thrice What the Rest of the World Did Last Year,

the monor and and a second and a second and a second secon

the Leyland line of steamships and the ain has been one of the most remarkpossibility that other services may pass of empire within the past hundred into the hands of alien owners, direct years, particular attention to the condition plying in inland waters very soon after and strength of England's ocean-going carriers. It must strike observers as a singular coincidence that this wholesale services were an established means of absorption of British vessels should conveyance on the American lakes and rivers before a similar development benefited England. It is interesting to greatest vessels ever seen afloat, that note that steamboats were plying on the leviathans of the White Star fine the Thames as far back as 1814. The should be taking the water just as first Trans-Atlantic liner to steam its famous ocean greyhounds should be way from America to England was the Tamous ocean greyhounds should be way from America to England was the passing from the possession of this Savannah named after the port from which it s is to Liverpool in 1819. The of our maritime standing is thus vindicated on the one hand, while on the conter, national pride, if not commercial for the commercial for the savannah were feted and feasted like any heroes, and the context of the savannah were feted and feasted like any heroes. While the absorption of a whole Britinstinct, sustains something of a shock. ish company by an American syndicate new form of navigation did not oust rather gives us pause, the effect of the the old for many years. The Royal Wiltransference is, after all, but as a fica-bite. The sale of a corresponding num-ber of English ships to America, as unlts, would have had no exciting sig-nificance. The English merchant sernificance. The English merchant ser-vice is still incomparably ahead of that of any other power's. In round figures we possess about 11,000 ships-this out of a total of 28,200 ships of all nationalities, and of over 100 tons, afloat, America is second on the list with very ew more than 3,000 craft, and Norway third with about 500 fewer. There were built during 1899 in the United Kingdom exclusive of war ships, 726 vessels of 1,416,701 tons gross. Of these 714 of 1,414,774 tons were steamers, and 12 of 2,017 tons sailing ships. The warships launched during the year at both government and private yards numbered thirty-five, and were of 168,590 tons displacement. This made the total output of the United Kingdom for one year amount to 761 vessels of 1,585,381 tons. In the same period there were launched from all the other shipbuilding yards of the world 392 steamers of 536,145 tons, 25 sailing vessels of 174,002 tong, and 56 war vessels of 176,170 tons displacement. Britain alone, then, p.e. duced 162 more vessels than all the rest of the world put together. The total output for the world was 1,946,000 tons steam, and 176,000 tons salling vessels, Allowing for vessels lost or broken up. the sailing tonnage was, on balance, reduced by 106,000 tons, England figuring under this head with 185,000 tons entered opposite her name. In 1889 her sailing percentage was 10 per cent; if dwindled down to 0.4 in 1899; England's team tonnage, however, had increased by 438,000 tons. The steam tonnage of the world was increased by 1,601,100. England claimed 54 per cent of the addition: An analysis of the distination of the rhips built by England during 1889 shows that 1.147,609 steam tons and 2.017 sailing tons, were for ports in the United Kinghom; while sales to colonial and foreign owners amounted to 640,000 tons, more than four times the gross tonnage of the Leyland line.

When Queen Victoria ascended the throne a sea-going steamer was scarcely reckoned as among the practicabilily reckoned as among the practicabili-ties of the age. When she died the ems-pire possessed of merchant and passenger steamers so many that had the exwhat he would sting stock been turned out at the rate have had a glimpse of the mighty craft of half a score a month during all the of today with everything he depicted years of her reign, the aggregate could save the bustle and confusion magni not have been attained. The develop- I fied a hundredfold-the stores, out of

The acquisition by the Americans of | ment of cleam navigation by Grat Brit-America had her steamboars the first British steamsnip made its initial voyage on the Forth and Clyde Nam did not make its appearance until fourteen years had clapsed, and its performance in making the voyage from Quebec to Gravesend in what was then astonishing thus, did not disturb the serenity of those who planed their faith to sturdy spars and stout can-vas. The ancient mariner steadily anplied himself to the teaching of the Old Testament, and, putting not his trust in princes, declined to be any more confiding in adventurers who put to sea in a glorified ten kettle. The steam. ship occupied a good deal more attention in the workshop of the experimenting engineer than upon the sea. Various improvements were brought to light, and the Archimedes, the first practical screw steamer, was built in 1806. A happy combination of brains, initia. tive and money brought about the first

service of Atlantic steamers. Mr. Samuel Cunard had pletured such a service as he turned things over in his Nova Scotia home, and he came to England to seek, and was fortunate enough to find, the necessary complement of himself in Messrs. George Burns and David McIver, two prominent shipowners, and Mr. Robert Napier, an expert ship-builder on the Clyde. In 1839 we could build rapidly and well; indeed, even Mr. then, our merchant marine was greater than is that of any other country of the present day. By the following year Mr. Napler had four steamships ready. and the British and four steamsnips ready, and the British and North American Royal Mail Steam Packet company was an accomplished fact, with a contract for the conveyance of the government mails at \$300,000 a year. The Britannia was the first of the line to make the voyage, and covered the distance be tween Liverpool and Boston at the rate tween Liverpool and Boston at the rate of eight and a half knots an hour, reaching that port eight hours after the expiration of a fortnight, to bring Mr. Cunard, the head of the firm, 1.800 invi-tations to dinner in eight and twenty hours. The vessel was 200 feet in length, 34 feet in width, carried 225 ions of cargo and ninety first-class passen-gers, and was the wonder of the area gers, and was the wonder of the age So commenced the regular service of Atlantic liners in which the Cunard boats have always been so prominen Charles Dickens was among the many

grannununannannannannannannannannan [ which the captain could keep his boat going round the world in eighty days or so, without halting to rescond or take

21

or so, without halting to rescoal or take in an ounce of rations for the 2,000 pas-sengers whom he could carry! Since the Britannia made its first trip across the Atlantic over forty lines of steamships for passenger and cargo have sprung into existence, and all but a dozen of these are Anglo-American vessels. In which close upon 10,000 per-sons cross the Atlantic overy week, and cargo beyond ready estimate. The more important lines co a dist of

contant lines co a dist of co-quarters of a million miles = year od carry well over a hundred thousand assengers each. asongers each. a important liner, t. necessarily für greatest of all-ust earn 880,800 per journey hefore he owners clear a fraction of a profit The great lines employ sufficient men to form not inconsiderable cities. The White Star line, with its floating pul-acces of unparalleled size and dazgling

action of outparameter size and outparameters a thousand and one condition. The growth of the Wilson line is an information of the developour shipping. The firm was founded is a very modest way by the late Thomas Wilson, who found the assistance of a couple of youngsters as cierks cults sufficient for the discharge the business demands the best exertiof a staff of 250 cherks, while all told the employes appendent upon the firm total 10,000. The yessels of this Unwith which the first of our merchant floers, pearly a hundred in numher, and are to be found in almost

every sea. The cubital invested in British pus. suffer and cargo steamers now reaches an chormous figure, as may be esti-mated when it is considered that the latest thing in liners rups away practically a million sterling. With yessels of such strength, and in such num-bers, England's supernary at sea. In spite of the rivality of other nations, and the Morganization of out Ameri-can cousins, is likely to remain an eas-tablished fact for many a day to come. -London Black and White, ----

#### Troubles of a Minister.

To benefit others Rev. J. T. W. Ver. non, of Hartwell, Ga., writes: "For a long time I had a running sore on my a. I tried many remedies without nefit, until I used a bottle of Electric leg. Bitters and a box of Bucklen's Arnica Bitters and a box of Bucklen's Arnica Salve, which cured me sound and well." Sores, Eruptions, Boils, Eczema, Tetter, Salt Rheum show impure blood. Thou-sands have found in Electric Bitters a grand blood purifier that absolutely cures these troubles. Satisfaction is guaranteed or money refunded by Z. C. M. I. Drug Dept. Large bottles only 59c.

Universal satisfaction given by

KINGSFORD'S **OSWEGO** "PURE"

at an heats were under record time. On July 27th last year a record of 20:23 was made in a ten-mile motor cycle race, and those who witnessed it thought the time was marvelously fast. But one week ago last night, in the atch race between the Turvilles and Chapman and Vaughan, the latter won the race and covered the distance in econds, beating the record just three minutes and eight seconds. Then there are the two ten-mile lap races, won by Billy Vaughan. In the first, a track rec-ord of 22.08 was established, and in ond the speedy Californian

brought the time down to 21:02. Thursday night two more track records were beaten. The five-mile motor record of 10:42, was brought lown to 8:10 2-5.

The two-mile open, amateur, track record of 4:13, was brought down to 4:024-5 by Eddie Smith.

These records are all accurate and go to show beyond a shadow of doubt that the riders are doing better work on the sauter this year than ever before, and they are getting into better form every

#### FORM OF THE RIDERS.

Some of our Utah boys are showing exceptionally well this year, and their prospects for the future are, to say the least, bright. There is W. E. Samuelson of Prove, who is now a full fledged professional. He has given an excellent account of himself in the races he has entered so far, and bids fair to do better. Eddle Smith is riding unusually well

and has only been vanquished by Hoff-man, who is now in Butte. Prominent mong the amateurs who are making apid strides are little Leo Bowers and arl Clayton. The former has a quick, appy sprint in him, and with a little ork will make a fast rider. Will ng, who turned professional this ar, is another erstwhile amateur who surprising the bicycle enthusiasts ite frequently. Clem Turville is also ding better than he did last year. W. Vaughan is training hard every day, ad promises to hold his own with the astest of them. It was supposed last year that John Lawson's sprinting days ere over, but judging from the "old exhibition on one or two ocasions this season, those who thought o were mistaken.

So, then, judging from the achieve-ments so far, it is reasonable to presume that the prospects for the most successful season the track has yet en-loyed are bright and promising.

#### MOTOR PACED EVENT.

Ffiteen Mile Match Race Between Chapman and Turville.

present plans are corried out there will be a highly interesting and excit-ing race on the Salt Palace saucer Tuesday night next, John M. Chapman is expected down from Butte and will ride against Charley Turville in a fifteen-mile match motor paced race. The purse offered is \$150, \$100 for the winner and \$50 for the loser. There is consid-erable fivalry between the two men, as Turville defeated Chapman in a similar type here has a summary and the bar vent here last summer and the boy from the summy South is anxious to get iven with the lad from the Quaker city. If Chapman enters the races Tuesday night he will remain here for the balance of the season.

MORE BASEBALL WANTED.

#### Not Enough Games to Satisfy the Fans in Two Months.

ocording to the Intermountain baseball schedule there are thirty-seven ore games to be played, including to-orrow's contests, before the season Out of that number Salt gets eighteen, Ogden nine and a City nine. Of course some of the will be transferred to Lagoon that will necessarily lessen "r to be played here. Even at the at it is not enough to satisfy the aving of the fans for over two long bot months and it is strange that some fort is not being made to provide for more games. The scheme of Manager Professionals Will Play Amateurs on the 12th at League Park.

Next Friday at 11 o'clock the Salt Lakes will play their first same this season with an amateur organization, The Maccabees of tent No. 2 have organized a fast team and are anxious to try conclusions with Websters immaculates. When the contract was first made, it called for the game at it o'clock, but on account of it being Macabee day at Saltair, where many prizes are to be given, it was thought best to change the hour to 11 o'clock. The day is set apart for a celebration of the Macabees from all over the State and at least two thousand of the bees will come buzzing into town, and those who come early enough are sure to attend the ball game.

#### Game Called Off.

The game scheduled to take place at Park City on the 14th between the K. O. T. M. No. 2 team and the Ontarios been called off.

When the arrangements were first made the managers of the teams did not think of the fact that in that date a league game is on at Park City. The game will be played at a later date.

The Butte Faucer.

Captain T. O. Angell, who built the saucer, was without doubt the most pleased man in Butte last night. The occasion for his glee was the successful trip of the motor cycle. Some alleged wise ones had claimed that though the saucer was all right for bicycles it would not do for the motors. They argued that the machine would get up such speed that they would run off the track. Captain Angell thought otherwise but walted for the test last night. He had the satisfaction of learning from both Chapman and Lawson that the track was perfect.-Butte Inter-Mountain.

#### Notice to Wheelmen.

There's positively no need to endure discomfort by reason of chafing, sunburn, insect stings, sore and perspiring feet or accidental bruises. You forget these troubles in using Bucklen's Arnica Salve. Infailible for Pimples, Elotches, Skin Eruptions and Piles. Sold by Z. C. M. I. Drug Department, 25 cents.
