makes high smelter charges imperative. "With the operation of this plant, however," says Mr. Byrne, "these penilties will disappear and in their stead the zinc will be a value to add to the united worth of the ores. Zinc ores are found in immense quantities in Jefferson county, and the establishment of a plant that will handle its ores will enable that county to come rapidly to the front as a mineral producer. There are a number of mines already opened in this county, such as the Comet, near Boulder, the Alta at Wickes, the Grey Eagle and a number of others, that have an abundance of this class of ore ready for shipment and are in condition to continue the production for an in-definite period."

An Immense Fissure.

The Morgan lode of Western Australia (which should not be confounded with the Mt. Morgan of Queensland) is an immense fissure lode 100 to 300 feet in thickness which can be traced by its cropping for more than forty miles. cropping for more than forty miles. It lies in a region so level as almost to deserve the description of a plain. Across this its outcrop is often found in cliffs of solid quartz 200 to 300 feet high. All of this quartz carries gold, but only in places in sufficient quantity to make it workable. At the prncipal working mine along its length, called the Westralian Mt. Morgans, there is an open stope of payable ore at the 100 foot open stope of payable ore at the 100 foot level which was sixty-four feet wide and sampled \$30 per ton for the entire width. From this a recent mill run of 1.611 tons yielded \$46.410. Up to date from this bonanza the company had milled 22,000 tons, which had yielded \$710,000 .- Mining Reporter.

According to the Wallace (Ida) Miner, George Batschi, Jr., of Butte, consid-ers that Murray is full of good promise, He was especially pleased with the re-cent galana strike on Sunset Peak, made by Senator W. A. Clark. This, in Mr. Batschi's opinion, will tend to stronger, Fed muttons, 3.8594.25; west-erns, 3.7094.00; common and stock sheep, 3.6993.80; lambs, 4.5095.25. DENVER LIVE STOCK.

Prices Were Unsettled - Raid by the Bears - Live Stock Weak -Produce Steady.

New York, Dec. 27 .- The feature of the market was the rush to buy people's gas on the reported adjustment of competition in the Chicago field. The first

20,000 shares, compared with last night's price of 106%. Atchison was sold simultaneously at 47% down to 47%, compared with 47% last night. Sugar ran off easily about a point. The tone elsewhere was rather hesitating, and the price changes were about evenly divided between gains and losses within fractional limits. A concerted attack was made by

bears against stocks which benefited most by yesterday's buying movement. As a result Brooklyn transit, sugar, people's gas, rubber and Tennessee coal reacted 24 6 %. The weakness spread to some of the standard railroads, but only St. Paul, Burlington, Erie, Union Pa-cific, Pennsylvania and Northern Pacific lost as much as a point. Meanwhile Missouri Pacific forged up to 72%, and some less active stocks were supported. Covering of shorts in Northern Pacific and sugar rallied them 1% to 2 points, but the general market continued un-settled. An aggressive demand for consolidated gas lifted it 4% points. This incident had a steadying effect on the market, but there were no notable im-provements until D. & R. G. and Northern Pacific were bid up simultaneously to 33% and 83% respectively. Covering then became general and Reading preferred rose rapidly to 71 and the second preferred rallied 2. St. Paul recovered 1%. Amalgamated copper advanced 3¼. New York air brake fell 7% and glucose preferred 4. The general market harlened but the response was moderate. The discrimination by buyers in favor

of low priced stocks was marked, new points of strength constantly develop-ing. The Wabash stocks, U. S. Leather, Hocking Coal, North American, Maxican Central and Ann Arbor were lifted from 1 to 3 points. St. Paul got up to 1,40% and sugar touched 1.45% befor reacting. American express jumped 5 points on a single transaction. Sugar

reacted nearly two points on the denial of a trade settle-ment and precipitated a realizing move-ment in the general list. An almost complete recovery in sugar carried some stock with it to the top, but the closing was irregular and very active. CLOSING STOCKS.

WOOL TRADE THIS YEAR.

Boston, Dec. 26 .- The American Wool and Cotton Reporter, in its annual re-port of the wool section of the United States, gives the stocks of wool in the country, exclusive of manufacturers' holdings, as 352,247,389 pounds, as compared with 157,398,879 pounds a year

The stocks in the three principal markets of the United States, Boston, New York and Philadelphia, amount to 185,400.389 pounds, as compared with 113,295,579 pounds last year. The stocks of wool in Boston are 130,019,084 pounds, as compared with 66,113,743 pounds last year. This large increase in stocks on hand is accounted for by the comparatively limited demand for wool this year, increased importations of foreign wools and the fact that only a very small percentage of this year's clip has as yet been disposed of to manufacturers. Wools have been held back to an unusually large extent this year in the country. This is especially true of the fleece wool sections east of the Mississippi river.

The wool production of the country is given as 281,452,437 pounds. Imports of wool into Boston have been 58,723.-632 pounds, as compared with 34,372,491 last year. The sales of wool in the last year. The sales of wool in the Boston market since January 1st amount to 146,975,100 pounds, as com-pared with \$47,185,775 pounds last year. In other words, the volume of business

in other words, the volume of businese has been considerably less than half of that of last year. The year 1900 will pass into history as one of the quietest and most unsat-isfactory periods ever experienced in the wool trade. Depression has char-acterized the situation both abroad and at home

A feature of the business of the year has been the increased substitution cotton for wool, and a preference for the medium or lower grades of wool as distinguished from the fine grades. As to the business of the past week, it has presented but few features of in-terest calling for special mention. The demand has been as large as was ex-pected in a holiday season and has run principally to Territories, unwashed fleeces and scoured wools. The sales amounted to about 2,500,000 pounds and represent quite a large number of transactions. Prices, while favoring the buyer, are not sufficiently changed to warrant any general lowering of quotations. A hopeful feeling pervades the trace that with the end of the year an improved demand for wool will set in which will have the effect of lifting the market from its present condition

of lethargy. The feeling is naturally strengthened somewhat by the continued favorable advices received from abroad.

The sales of the week in Boston amounted to 2.168,700 pounds domestic and 335,000 pounds foreign, making a total of 2.503,700, against a total of 3.600,000 pounds for the previous week, and a total of 2,350,000 pounds for the corresponding week last year
