

seven strongholders built by the Saxons in the south of England and before the state came into the possession of the Burrell family, it was held by several families of rank and prominence.

A GIFT QUESTION.

When does a gift remain the property of the giver? When it consists of jewelry given by a husband to his wife to enable her to shine in society. Such is one of the seeming paradoxes of English law, as just laid down by that high and learned judicial body the court of appeal, in the case of Lord vs. Lady Howard of Glossop. It goes further than this. The husband may not only claim as his own property the articles of adornment which he has given his wife, even though bestowed upon her prior to their marriage; he may actually sell them and devote the money to his own use.

DIAMOND TIARA.

This is what brought about the decision. Before Lord Howard of Glossop married his second wife in 1891, as proof both of his generosity and undying devotion he presented her with a costly diamond tiara. As the years rolled by, however, his love cooled. The marriage proved an unhappy one, Lady Howard commenced proceedings last year for a judicial separation, but the outcome was a separation, under a private agreement, which provided that all jewelry, ornaments, etc., belonging to Lady Howard should remain under her exclusive control.

She did not, however, get the diamond tiara and brought suit to recover it. Lord Howard asserted that he had sold it for \$4,000 three months prior to the agreement. The decision of the lower courts, adverse to Lady Howard's claim, was sustained by the court of appeal. In concurring in the opinion of the master of the rolls, Lord Justice Romer stated that any gift made by a husband to a wife, "suitable for her position in society," were not "gifts to her separate use," but constituted "paraphernalia which the husband had a right to sell." And it follows that hereafter the woman who regards such gifts as her own property will merely discover that she has been "sold."

QUEEN GRANDMOTHER.

Queen Alexandra sets the fond grandmother to perfection and is happiest when she gets an hour to herself in the quiet of the little corner of the royal family. Her face wears its most contented expression when she drives in the Park with little Prince Edward of Wales at her side, and many a time does she take a carriage to the queen to an ordinary London house in an ordinary London square where the lackies who open to her are greeted by the First Lady in the land with a pleasant smile and word, and whence a few moments later she emerges with two happy little girls plainly attired and each affectionately grasping a doll with one hand and the queen's arm with the other. The little girls are the daughters of the Duke of Devonshire, the Duke of Devonshire, and the oldest grandchildren of the queen, to whom they are devoted.

Only the other day the writer witnessed a little incident which testified to the queen's love for all children. The king and queen, while returning to Buckingham Palace from Windsor, and the queen looked a little tired and sad, and responded somewhat mechanically to the salutations of the people. Suddenly in answer to a remark from the king, the queen's face brightened, and interest and pleasure that transformed it. The quick-sighted king had spotted two baby carriages drawn up on one side of the pavement in each of which sat a pretty child of about two years of age. Their nurses were inclining them to enthusiastically loyal salutations, aiding the same by grasping the tiny arms and forcing the babies to wave their tiny hands. The latter were apt pupils and their eyes were bright and their cheeks rosy—more I suspect at the glitter of the magnificent escort of life guards than at sight of their rulers. The good queen ceased her formal bows and leaning forward, gazed at the two lovely little ones with the light in her eyes, nodding the while merrily and turning to give a last salutation even after the carriage had swept past. The king, who is also devoted to children, and, moreover, who is always glad to see the queen interested and happy, repeatedly bowed to the nursemaids who on their side were bubbling over with gratification and excitement.

Mr. and Mrs. Durrant, of Philadelphia, with their two sons, who have been spending the winter in Brussels, are leaving the first week in May. They have been so pleased with their Belgian visit that they are making arrangements to return next winter.

LADY MARY.

RECEIVING A HEART.

Impressive and Dramatic Ceremonies at the Invalides.

PARIS, April 12.—No more dramatic ceremony has taken place in France in recent years than that pictured in the accompanying sketch—the reception of the heart of La Tour d'Auvergne, "The First Grenadier of France," which occurred at the Invalides the other day. This cherished relic of the heroic soldier, famed in French song and story, has had a history hardly less strange and romantic

Eating "FORCE" doesn't create brain, it merely brings out the best there is in it.

Napoleon lost Waterloo because of brain-fog. If he'd had "FORCE" to eat every day, I wonder how the map of Europe would have looked in this twentieth century.

Sammy Jinn

You cannot build mental force from foods deficient in Phosphorus and Nitrogen. Brain food is substituted for mere food.

than that of the man who left behind him so inspiring an example of patriotic devotion to his country. The heart has figured on many a battlefield as a stimulus to the courage of the soldiers of France. Often it has been lost and miraculously recovered. It has been the subject of ignoble contests in the law courts. And now at last it finds a fitting place among the honored memorials of the marshal of France.

La Tour was born at Carhaix in Auvergne, in 1743, and died as he wished to die, fighting gallantly for his country at Oberhausen in 1800. But the heart, the courage du hero, as it is proudly called, instead of being buried with the body, was sealed up in a leaden case, which the quartermaster of the famous regiment, the Forty-sixth, carried where ever the command went, always close to the flag. Napoleon subsequently ordered it brought to the chancellery. But under the Bourbon regime it was no longer regarded as a prized memento and for several years was lost track of, like Richelieu's head. After that, when it had been found and identified, family litigation for its possession continued for a long period. In 1840 M. du Pentavice de Huessey secured the urn, and preserved it in his castle of La Haye, near Carhaix, the hero's birthplace. Thus it came into the possession of M. du Pentavice's grandson, Colonel du Pentavice de Huessey, who offered it to France. The body was removed from its original burial place in 1859 and interred in the Pantheon.

Standing in the doorway of the famous Soldier's home, in front of Napoleon's tomb, President Loubet received the solemn procession which escorted the four grenadiers from La Tour's regiment who bore "le coeur du hero." It has been placed in the "tombeau des Gouverneurs," the burial place of all the governors of the Invalides, whence in a few days it will be removed to the chapel which is to be its permanent resting place.

Although most of the surviving veterans of La Tour's regiment are spending their last days in the Invalides, whenever the command assemblies, the roll call officer, who knows the famous grenadier only through history, calls his name. Instantly another soldier replies, "Dead on the field of fame."

Men Past Sixty in Danger.

More than half of mankind over sixty years of age suffer from kidney and bladder disorders, usually enlargement of prostate gland. This is both painful and dangerous, and Foley's Kidney Cure should be taken at the first sign of danger, as a constant irregular habit has cured many old men of this disease. Mr. Rodney Burnett, Rock Port, Mo., writes: "I suffered with enlarged prostate gland and kidney trouble for years and after taking two bottles of Foley's Kidney Cure I feel better than I have for twenty years, although I am now 71 years old." F. J. Hill Drug Co.

POULTRY POINTERS.

Geese and duck should have water to swim in during breeding season, as they mate better in water than on land. Scoop out a place with team and scraper and fill with water if practicable. Feed chopped-up onions twice a week to all poultry in the winter, and keep coarse sand or gravel and oyster shells (crushed) before them at all times.

Make the chickens scratch for their feed by throwing the grain into the straw or leaves. They will find it, and the exercise will do them good. Give your laying hens milk and meat scraps every four or five days. It means more eggs. Give soft food, such as boiled oats or potatoes, mixed with equal parts

of bran, shorts and ground corn twice a week for breakfast, but not a full feed of soft feed, as they will eat too fast and then sit around with a stuffed crop.

Geese, ducks, guinea, turkey and chicken eggs that are shipped a great distance will hatch well if they are kept upside down in the basket and left for twenty-four hours and then put under a good hen or in an incubator.

Don't get your breeding geese, ducks or turkeys from an unsoundly stock. Keep it clean and sprightly with dry lime and all bad smells will disappear.

Mate one drake with five ducks, one gander with three geese, one male guinea with four to eight guinea hens. Some mate more females with males than above stated, but results in eggs hatching are not very satisfactory if mated differently than above. No one should in-breed—that is use males, that are closely related to the females, as the results are always very poor in the long run and will end in unhealthy stock. People who intend to buy pure bred poultry should buy in the fall or winter, as they get them cheaper, and besides can get better stock than in spring, when most poultry breeders are sold out. It is absolutely necessary to get geese, ducks and turkeys for breeding purposes together quite a long time before the breeding season starts for best results. I prefer to mate my geese for next season's breeding not later than February last. Chickens can be mated at any time.

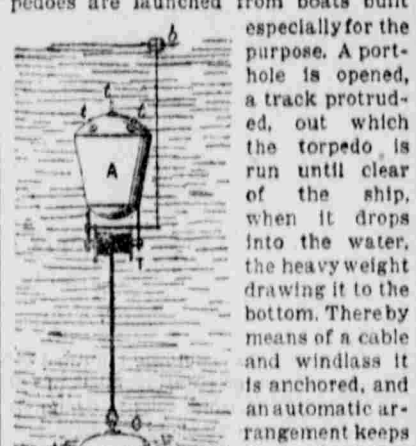

Don't saturate your hen house with kerosene or other bad smelling stuff to kill the bad smell arising from filth. Keep it clean and sprightly with dry lime and all bad smells will disappear.

A Sure Thing.

It is said that nothing is sure except death and taxes, but that is not altogether true. Dr. King's New Discovery for Consumption is a sure cure for all lung and throat troubles. Thousands can testify to that. Mrs. C. B. VanMetre of Shepherdstown, W. Va., says, "I had a severe case of Bronchitis and for a year tried everything I heard of, but got no relief. One bottle of Dr. King's New Discovery cured me absolutely. It's infallible for Croup, Whooping Cough, Grip, Pneumonia and Consumption. Try it. It's guaranteed by Z. C. M. I. Drug Store. Trial bottles free. Reg. sizes 50c, \$1.00.

PLANTING SUBMARINE MINES.

The cut represents the sort of submarine mines that are sunk in the vicinity of Port Arthur and in other ports in the far east. These stationary torpedoes are launched from boats built

especially for the purpose. A portable launch is opened, a track protruded, out which the torpedo is run until clear of the ship, when it drops into the water, the heavy weight drawing it to the bottom. Thereby means of a cable and windlass it is anchored, and an automatic arrangement keeps it at a fixed distance from the surface of the water. In the illustration the automatic windlass, A, the explosive chamber, which is set off by a ship coming in contact with the firing rods T, T, and B is a very small floating buoy to indicate the torpedo's location.

Annual statement for the Year ending December 31, 1903, of the condition of the NEW YORK LIFE INSURANCE COMPANY.

The name and location of the company, New York Life Insurance Company, New York, N. Y.

Name of President, John A. McCall. Name of Secretary, Charles C. Whitney, John C. McCall.

The amount of its capital stock is \$100,000,000. Mutual.

The amount of its assets is \$352,652,947.37. The amount of its liabilities is \$352,652,947.37.

The amount of its income during the preceding calendar year is \$8,282,450.45.

The amount of its expenditures during the preceding calendar year is \$2,882,450.45.
