and talked about the case, and

and talked about the case, and be-lieved his opinion would prevent him from being fair and impartial. At-torney King held a different idea, how-ever, and accepted Mr. Beveridge. Upon being examined by Mr. Loofbourow, he said Judge W. H. King, S. A. King's brother, was attorney for the mining company which employes him (Bever-idge). He reiterated his assertion that he could not act as a juror impartial-ly. He was challenged by District At-torney Loufbourow. Attorney King used his fifth 'and last peremptory challenge in having Mr. Gold excused, MAKES HALF A DOZEN

MAKES HALF A DOZEN.

MAKES HALF A DOZEN. At 11:30 four men had been dismissed, Making a half dozen, U. H. Danleis and Arthur Knight stepped to the box. Mr. Knight is engineer at the Cullen hotel. He said he could render a verdict af-ter listening to the evidence which would be the result of hearing the evi-dence, only. "I don't want to be a juror." he said. "I'm busy." Mr. Danlels, a musician, said he had no opinion on the actual merits of the case and believed he could try the case for cause (accepted) by the defense. When Mr. Loofbourow took Mr. Knight in charge, the latter said he had read, and talked but very little about the McWhirter and subsequent affairs. Mr. Loofbourow then used his second and third peremptory chanllenges in ex-cusing both Mr. Knight and Mr. Dan-tels.

T. Fenton, a contract workman.

and S. H. Calder, a plano tuner, were then called. In his questions directed at Fenton, Attorney King asked sev-eral times if "politics" which might be in the case, would influence his opin-

ion. "If certain parties have made an issue of this case, would that in-fluence you?" asked the attorney. Mr. Fenton was a satisfactory talesman to

ing it to California Water Line.

he defense.

The second day of examining talesmen to sit through the Donaldson trial saw quicker work done, although until noon today no one had been selected as a juror to act with the six obtained yesterday. The proceedings reached a decidedly interesting point today, Attorney S. A. King used the two peremptory challenges left the defense while the state has two left yet. Jurors not acceptable to the defense must ors not acceptable to the defense must be lead into asserting that they have fixed opinions regarding the guilt or innocence of James Donaldson, charged with robbing the McWhirter brothers of \$10,000 Sept. 19, 1906. When court took a recess until 2 o'clock, it was evident some time will be consumed during the afternoon before the box is filied.

A number of interested men sat among those called to act as talesmen for the term and while obtaining ju-rors, as a rule, is a procedure devoid of features, there is plenty of life and in-terest in the box-filing now under way in Judge Armstrong's court. The main object of interest, "Jim" Donaldson, himself, sat beside his lawyer, S, A. King, and while apparently at perfect ease he is taking a quiet but thorough interest in watching the steps being interest in watching a quiet but thorough interest in watching the steps being taken towards getting eight men who will promise to give him a fair and square trial. Today saw talesmen dis-missed by state and defense because of missed by state and defense because of their apparent anxiety to sit in the case. Their reasons need not be ex-plained. Attorney King passed one man for cause even after he had an-nounced he had an opinion which evi-dence might not change. The state, however dismissed this talesman. Major Breeden is at each sassion of court and Breeden is at each session of court and is in frequent consultation with District Attorney Fred C. Loofbourow.

MORNING SESSION STARTS.

By 10:05 o'clock this morning Clerk Howard King of Judge Armstrong's court had drawn eight silps from the little box on his desk. Each bore the name of a talesman who may serve as a juror in the Donaldson trial. As these names were read the men called stepped into the box where they were sworn and examined as to their fitness to serve as jurors for the term of court. court.

## FOUR MORE EXCUSED.

<text> Henry Sadler was excused because Henry Sadler was excused because he is under a physician's care and his illness would not permit him staying for any length of time behind the closed doors of a jury chamber. Joseph Farren has served already this term and claimed exemption. He was fa-vored with dismissal. W. T. Bennett, a tairoader, was excused on account of sickness. H. A. Silver was also excused for the same reason.

#### HE WASN'T TOO DEAF.

Henry Klinke said deafness might prevent him from being a fit juror. "I am deaf in my left ear and can't hear very well out of my right," he said. As he could hear Dist. Atty, Loof-As he could hear Dist. Atty. Loof-bourow's questions without trouble he was retained.

## ANOTHER "DEAF" ONE.

H. Clayton announced he was

ASSAULT CASES.

Second West and Second South Street Remarkable Success in Other Cities Will Doubilessly be Duplicated In Salt Lake City. Chicago, June 25.-Several hundred New York, June 25 .- Seven persons, six of them members of one Italian Greek boys are being held in peonage in family, were killed early today in the Chicago fruit stores and shoe shining collapse of a ramshackle tenement in establishments. This fact has been rerealed by an investigation conducted by the down-town Italian quarter. Three other members of the same family, inhe federal immigration officials, uided by Nicholaos Sallopoulos, the Greek concluding the father and mother, are in a hospital, painfully injured, but will sul general. Prosecution of the employ-There were some exciting ers for violation of the unnigration

law will be based on the evidence obtained. The methods by which the boys are imported and landed in Chicago were brought to light through the arrest yesterday of George Antonopoulos, on the charge of pagjury in making an affidavit that two Greek immigrants arriving at Boston were his brother and Lephew. The case will be heard by Judge Landis on Thursday and the fictitious brother will be a witness for the prosecution, which will be conducted by Asst. Dist. Atty. Shirer. It is by means of a far-reaching sys-

It is by means of a far-reaching sys-tem of deception, in which relatives, friends, and the steamship companies conspire, that the boys, it is alleged, are transported from their native land to bondage in Chicago. When the pro-prietor of a shoe-shining "parlor," for example, wants additional help, he pur-chases several tickets good for steer-age passage from Greece to Chicago. The tickets cost him 350 each. The employer then sends the tickets to a relative or a friend in Greece, who

and was located at the corner of Walker and Lafayette streets. It bu-longed to the Mose Taylor estate and for some time has been in a dangerous condition because of excavations for a new building on the adjoining prem-ises. It had been shored up, but its weakened condition caused it to fall in at 2 o'clock. Most of the tenants, warned by ominous creaking, fied a few minutes before it collapsed. The dead were buried under tons of debris, and it was not until the firemen and volunteers had worked for four hours that their bodies were recovered. George B. Lumenthal, the contractor who had charge of the recent repairs and shoring up of the building, was arrested and charged with homicide. That many more persons did not lose their lives in the collapse of the old building was due to two of the younger occupants of the house having attended an Italian celebration last night. The boys reached home shortly before 3 o'clock this morning and, warned by the sever shaking and creaking of the house, ran through the building and warned the sleeping tenants of the im-pending danger. Dozens of persons nan into the street in their night clothes, and many of them had scarcely galmed the street before the crash came. Five minutes later scores of firemen were at work tearing away at the piles of brick and many of the LaFayette exten-sion, cracked in two places and threat-ening to fall upon the rescuers every moment. After a few minutes' tearing at the timbers and bricks, the firemen The employer then sends the tickets to a relative or a friend in Greece, who in turn sells them to boys who wish to come to this country. The youth is charged anywhere from \$150 to \$200 for his ticket, and is required to sign a note for the amount, payable to the em-ployer in Chicago. These notes are pe-culiar in form, and virtually are con-tracts to work out the amount of the "lean." loan

The boy then is taken to the steam-ship company's agent, who finds an adult passenger to pose as the father or other relative of the minor. Under this guise the youth passes the immi-gration officials at the American port of entry, and soon is on a train bound for Chicago for Chicago.

Arriving here, the boy is locked with Greek boys in the employer's house, where he is boarded at the master's exwhere he is boarded at the master's ex-pense. It is usual for the youth to work a year to satisfy the "loan." By that time he has learned some English and he gets a better position. Occa-sionally an employer attempts to hold boys against their will, and consul Sallo-poulos is obliged to interfere. But the employer secures the year's labor of the youth for a total outlay of \$50 and not more than \$100 for clothes and lodg-ling. ening to fall upon the rescuers every moment. After a few minutes' tearing at the timbers and bricks, the firemen heard a low moan and in the dim light saw a man's hands moving convulsive-ly. The men caught it and the man under the ruins murmured: "For God's sake, save my sister!" It was George Torchino, six of whose brothers and sisters perished in the ruins.

### SCIENTIFIC MISCELLANY.

The tempering of special steels for mod-ern tools requires very high tempera-tures, with absence of carbon, air and gases likely to alter the hot metal, and to ensure exclusion of active chemical agents an improved electric tempering rurnace has been constructed in Berlin. The steel is heated in a fused sail, bar-tim chloride having proven most suita-ble. The furnace is a square box of iron asbestos and firebrick, and the in-terior is filled with the sait and opposite iron program as electrodes for the alternating current, the temperature be-ing accurately controlled by a pyrometer and rheostats. In a chamber about 64

The large vacant lot at the corner f Second West and Second South treets has been secured for the series streets has been secured for the series of entertainments which will be given by The Great Fer-Don who arrived in Salt Lake Sunday. As before men-tioned these entertainments are abso-lutely free to all; no charge being made for the band concerts and the vaude-ville show by the famous Georgian Minstrels, who accompany Fer-Don, Fer-Don himself has a reputation throughout Europe and America as a lecturer, traveler and philantropist, De-voting his life as he has to the study of the conditions of mankind, he has through years of travel and scientific study gained for himself an envisible place among our best known philan-thropists.

Entertainments

Tonight.

He devotes a certain part of his in-He devotes a certain part of his in-come, which is reported to be enor-mous, from the sales of his prepara-tions, to relieving the cares of the poor and sick. He finds, pleasure in visiting the needy and helping make their life'-burden lighter, not only with kindly words, but with more substantial cheer. Throughout the east and south his name is a household word, and there is no doubt that ere he has been in Saiz Lake City a week he will be known by all.

he doubt that ere he has been in Sai: Lake City a week he will be known by all. The Boy Phenomenial, who accom-panies Fer-Don, while still in the bloom of youth, has attracted enviable atten-tion through his wonderful success in curing the sick. A graduate of medical schools of international fame, he has made an exhaustive study of chronic diseases, and by the marvelous meth-ods which have been brought from for-eign lands, is able to cure many dis-cases pronounced incurable by most physicians. In his demonstrations, which will be given nightly at the free show-grounds at Second West and Sec-ond South streets, he will show how th is possible to make the deaf hear in three minutes, the paralytic and orip-pled walk in the same short space of time, and other aches and pains vanish. What is this power? he has been asked. Is it mesmerism? Is it magic? But the Boy Phenomenal claims none of this. "It is my scientific skill, com-bled with a thorough understanding of medical science," said he, in an inter-view, "which makes the seening ma-gical demonstrations possible, and I will prove these things can be done." In speaking of his choice of locations for his free entertainments, Fer-Don gave as his reasons for selecting the grounds at the corner of Second West and Second South the fact that no theater hall in the city would be large enough to accommodate the limmense crowds which nightly attend his lec-tures and demonstrations. Offices have been opened in the Windsor hotel for the accommodation of those who wish to consult the Boy Phenomenal, who has a wonderful record of cures made in other states and who is registered to practice in the State of Utah.

Hair Straighteners.

"A Curlo," said the collector. "A curio from Japan. A haid straightener." "You mean a hair curler, perhaps?"

"No. I mean a hair currier, perhaps?" "No. I mean a hair straightener. For straight hair is de rigueur in Japan, and if a kady's hair is curly, she straightens it every morning when she makes her toilet, and this is the instrument that performs the opera-tion

tion. "All over our own land, as Easter approaches, the ladies are busy heat-ing irons and curling their stright hair, while on similar holidays in Japan, amid a smoking and sizzling

Any single volume post paid to any address at the retail prices above quoted.

H. H. Clayton announced he was deaf. "Speak louder." he said. Mr. Clayton couldn't bear then, so he stepped out of the box and leaned over Mr. Loofbourow. "It is apparent he cannot hear." said the latter. "You are excused!" said Judge Armstrong. "I can hear that." mumbled Mr. Clayton as he left the room. A laugh went arpind the room. Mr. Clayton evident-ly believing in the little hint to "al-ways leave them laughing when you say good bye." As each eight men were examined they stepped aside and an-other eight took their place. This ex-amination consumed considerable time -over 40 men being questioned, and it was 10:40 when it came to an end. YESTERDAY'S HALF DOZEN.

### YESTERDAY'S HALF DOZEN.

The six jurors drawn yesterday then came into the courtroom and took seats in the box. This halfdozen com-

prises: Walter S. Atwood, farmer, Murray. Carl A. Scheid, insurance agent, Salt Lake, Henry N. Bird, farmer, Murray, Jonah T. Croxall, mining, Salt Lake, John H. Howe, farmer, Murray, James Fraim, bricklayer, Taylors-ville

ville. READ THE "NEWS."

The two men to be examined as jur-ors first were E. F. Redman, manager of a storage and moving company and W. J. Burten, manager of a coal com-pany Atty, King took Mr. Burton in hand first. Mr. Burton formed an opin-ion regarding Donaidson's guilt or in-nocence from reading the "News," Re-publican's and "once in a while, the Tothards the lock of the Walthurst publican's and "once in a while, the Tribute's stories of the McWhirter

the Tvibuhe's stories of the alow hitter robbery." Mr. Burton said what he had read, however, would not influence his judg-ment as he would be governed by the facts as presented during the trial. Upon second thought he believed that he could not sit in the case impartial-by. Atty. King challenged the tales-man on the statute applying to jurors "with blas." Dist. Atty. Loofbourow, in his questioning, dwelt at length upon the juror's "opinion" being the result of newspaper reports of the Mc-Whitter robbery Sepf. 19, 1906. "You know, that as there have been many conflicting statements made. Some must be true and some false?" he asked.

he asked.

#### DISMISSED FOR TERM.

Atty. King objected to the question, saying it was argumental. The objec-tion was overruled. When Mr. Burton said he would weigh the evidence Mr. Loofbourow resisted the challenge. At the conclusion of re-examination by Atty. King the juror was dismissed for the term by Judge Armstrong.

#### REDMAN RELEASED.

In answering Atty. King's questions regarding his acquaintance with vari-ous public officials B. F. Redman, the second talesman, said he knew Sheriff Emery through living opposite the county jail. He had never visited the sheriff nor been in jail, he said with a smile. Mr. Redman said he has an opinion-absolutely fixed opinion. He was challenged and dismissed.

#### TWO MORE STEPS DOWN.

# San Francisco Police Will Carry Them

Directly to Grand Jury.

cloud of dust and concearing from view of the anxious crowd in the street, the firemen everyone supposed were buried. Only Battalion Chief Galvin and Ladderman Samet were badly hurt. The others went back to digging in splite of their cuts and bruises. It was thought that George Torchino would be killed by the second fall of brick, but his life was saved by a strange happening. Part of the wood-en roof that had remained upon the wall fell directly over the hole which the firemen had opened to him and the bricks and timbers rained harmless-ly on his canopy. The firemen pulled it off and soon had Torchino out. A few moments later the firemen took out Torchino's father and mother. They were the last to be taken out of the wreck alive. They are suffering from wounded heads and contusions on their bodies. Directly to Grand Jury. San Fancisco, June 25.-The police it is said intend to expedite matter in all as-sault cases growing out of the strike trou-bles by taking the cases at once before the grand jury and avoiding the delay of carrying them through the police courts and also, by this method, to make the punishment of such severity that it will have a deterent effect on the continuance of brick throwing and similar assaults. The grand jury will continue its investi-gration at 2 o'clock into the battle with the police following an attack on a car of the United railroads on last Saturday night, George Peterson, a teamster in the employ of the California street railway, who was captured with two striking car men, as confessed to the police and some sensatival developments are expected during the course of the Investigation. bodies.

# KING CARLOS' THRONE IN DANGER OF FALLING.

London, June 25.-A correspondent of the Tribune says in a letter malled from Lis-bon, June 18, that King Carlos throne is in imminent danger of being swept way by the rush of a great democratic wave, swollen suddenly to dangerous proportions by the act of desputism which he per-mitted on May 1. The people do not for-get the report that last year the king con-demned Premier Ribertos' attempt to dis-solve the cortes and they contrast this attitude toward a conservative premier with the curious, filogical license he has given to Premier Franco. The general feeling of the country is one of advanced liberalism and a reptition of autocratic bungling can only have one result today in Portugal, the writer says, namely the deposition of the king and the establish-ment of a republic.
