

# THE SULLIVAN MARKET REVIEW.

- ¶ Our Weekly Market Review has probably more readers than any other publication of its kind in the wide world.
- ¶ There is a reason for everything and there is certainly a reason for this.
- ¶ We are on the ground at Goldfield and in close touch with the doings of Nevada mine operators, and there is no twist or turn in the Market on Nevada mining stocks that we are not able, as a rule, to discern in advance.
- ¶ Our Weekly Market Review has, during 1906, predicted almost every rise and every fall that has taken place in the market for Nevada mining shares.
- ¶ More than that, it holds a record for having made more money for its followers than any other mining stock publication.
- ¶ It does not cost us half as much money as it does energy to make this publication a perfect product.
- ¶ Our engineers and representatives are located in every mining camp in Nevada of any prominence and our 55 horse-power Pope-Teledo is constantly in service, running down news of strikes and other important items that contribute to make or break the market value of leading Nevada issues.
- ¶ The best known mining stock brokers in the United States tell us they cannot do without this market letter.
- ¶ Do you think you can afford to? Let it be your guide for 1907.
- ¶ Sent on request.
