THE "WORLD" MOWER & REAPER

E. BALL & COMPANY,

Manufacturers,

CANTON, OHIO.

IT HAS NO EQUAL.

It Mows—It Drops—It Self-Rakes.

PRICES REDUCED TO A GOLD BASIS.

This machine is the harvest gathering of twenty years experience in the manufacturing of Agricultural Machinery, and takes rank with the Printing Press, Engine Lathes and Locomotive in the qualities of precision, stanchness and durability.

Its foundation is a single piece of solid iron, of shape to resist all possible strains. Its gearing is shaped to standard gauge and each cut out of solid iron with mathematical exactness.

The working parts are permanently fixed and fully protected from water, dust, grass, and all other external causes of disturbance.

By these means we reduce friction to the lowest point—stop the self-destruction common to all rough cast machines—avoid breakages in harvest—secure easy draft and the same durability which pertains to cast gear in other kinds of machinery. The World has been tested four years in the hands of the most intelligent and reliable farmers in the land, who unite in declaring that, comparatively,

"THERE IS NO OTHER HARVESTER."
