

## TO STOP EASION OF LAND LAWS

Secy. Garfield Issues Order Regarding Entries of Land Re-opened to Settlement.

AIM IS TO AVOID GRABBING.

No Entry Allowed Until Fact of Restoration Has Been Advertised For Sixty Days.

Washington, April 19.—An order was issued today by Secy. Garfield, and another by Commissioner Ballinger of the general land office, each intended to put a stop to practices which are regarded as evasions of the general laws. The order of Secy. Garfield provides that hereafter whenever land is re-opened for settlement after having been temporarily withdrawn for proposed forest reserves or other purposes, no entries shall be permitted until after the fact of the restoration of the land to the public domain has been printed for 60 days in a newspaper of widest circulation nearest the land in question. The secretary says it has come to his notice that heretofore when lands have been restored to the public domain interested parties have been "notified" by wire from Washington on the day the order is issued and persons have located upon the most desirable portions of the restored lands, thus obtaining an advantage over others.

Commissioner Ballinger's order is directed to an alleged abuse of the law allowing the purchase from the government by auction sale of "isolated tracts" of land.

The commissioner believes this privilege has been abused particularly as one applicant now has pending 23 applications to purchase different "isolated tracts." The order cancels all such pending applications and makes a further requirement that tracts held at auction must be accompanied with an affidavit, stating that the intended purchaser wishes the land for homestead purposes and not for speculation.

## NOTORIOUS ITALIAN BANDIT UNDER ARREST.

Naples, April 19.—News that Enrico Alfano, called "Erriccone," head of the Camorra, has been arrested in New York, has produced a sensation. The popular bandit, who was thought to be invulnerable to bullets and able at all times to escape his pursuers, and he was invested with a fantastic quality of the medieval bandit.

At one time Alfano was a well known figure here. When attending to his criminal business he used to drive about in his own carriage, and he always dressed in the height of fashion. He had a rival for the leadership of the camorra in a man named Cuccolo, and to get him out of the way Alfano accused him to the police of being a spy. The camorra then condemned both Cuccolo and his wife to death and they were brutally murdered. Alfano remained in Naples for some time after this murder, trying to cover up the tracks of the crime and deceive the police. In this he was not successful and when he finally realized he was in danger he fled to the United States.

The authorities here are endeavoring to obtain the speedy extradition of Alfano.

New York, April 19.—Enrico Alfano, mentioned in the dispatch from Naples, was among those arrested here Wednesday night by detective sergeants in the raids then being made on the east side for the purpose of arresting Italian carrying concealed weapons. Detective Petrosini recognized Alfano by a scar on his face as a man who with three others recently escaped from Naples after the murder of Giuseppe Cuccolo.

Alfano was arraigned in the Tombs police court yesterday and was held without bail in view of the reported intention of the Italian government to ask for his extradition. It is likely he will be committed to await such action.

## MUTUAL LIFE INS. CO.

The Administration Ticket is Officially Declared Elected.

New York, April 19.—The "Administration Ticket" of the Mutual Life Insurance company has been officially declared elected by the inspectors of election appointed for the purpose of counting the votes.

## Get What You Ask For!

There is a Reason—Why the Good People of America buy Cascarets as Fast as the Clock Ticks.

Every second some one, somewhere, is buying a little Ten-Cent Box of Cascarets.

1, 2, 3, 4, 5, 6—60 times to the Minute, 60 Minutes to the Hour, 3600 Boxes an Hour, 36,000 Boxes a Day of Ten Hours, 1,080,000 Boxes a Month, and then some.

Think of it—220,000 People take a Cascaret tablet each day. Millions use Cascarets when necessary.

The Judgment of Millions of Bright Americans is Infallible. They have been Buying and Taking Cascarets at that rate for over six years.

It is not an Experiment, not a sound, Honest Business, based on Time-Tried-and-Tested Merit, never found wanting.

There is a Reason.

Cascarets are the implacable foe of All Disease Germs; the incomparable cleanser, purifier and strengthener of the entire Digestive Canal.

They Act like Exercise on the Bowel Muscles, make them strong and active—able to Help Themselves do their work—keep themselves clean.

Cascarets are the safe-guard of Innocent Childhood against the Dreadful Death-dealing Danger that threaten the Lives of the Little Ones.

They are Purely Vegetable, absolutely

A Dishonest Purpose means a Dishonest Product and a Disregard of the Purchaser's Health or Welfare.

Beware of the Slick Salesman and his ancient "Just as Good" story that common sense refutes.

Cascarets are made only by the Sterling Remedy Company, and the famous little Ten Cent "Vest Pocket" box is here shown. They are never sold in bulk.

Every tablet marked "CCC."

Be sure you get the genuine.

FREE TO OUR FRIENDS!

We want to send to our friends a beautiful Free-Design, GOLD-PLATED BOX of Cascarets in colors. It is a beauty for the dressing table, or a lovely gift to a friend. To receive this box, send a letter to the Sterling Remedy Company, 1230 Broadway, New York City, and enclose this card.

## ILL FROM OVERWORK SOIL MOISTURE

NERVOUS PROSTRATION CURED BY DR. WILLIAMS' PINK PILLS.

By Toning up the Blood and Nerves Patient Recovers Weight, Strength And Good Spirits.

When the nervous system is broken down from overwork, or whatever cause, life loses its joy. Not only is the nervous victim a sufferer himself but he is usually a trial to the whole family. Nervous breakdown is often gradual, appearing at first to be merely an unusual fretfulness. Dr. Williams' Pink Pills Tonic up the nerves in the most direct way and not only cure minor troubles but serious disorders as well.

Mr. W. W. Munroe, of 16 Hazel Park, Everett, Mass., says: "About four years ago this September I became all run down from overwork and from confinement to work during warm weather. For two months I grew steadily worse. I lost in weight and strength and had no appetite. My memory failed me quite rapidly and I became in a very low state, both physically and mentally. I took no recreation. In my position, as foreman in a large manufacturing chemist's establishment in Boston, a good memory is absolutely essential to success because of the immense amount of detail that must be carried in the head."

"I grew very despairing, could not sleep, nor have people meet me and my friends remarked on my condition. About the middle of December a friend told me one day that he had tried Dr. Williams' Pink Pills and found them reliable. I commenced taking them at the end of the month and the change for the better was remarked by friends. I continued using the pills until I was thoroughly recovered. I regard them as a fine remedy and make this statement with untiringly in gratitude for the benefit I received from them."

"I actually make new blood and have cured such diseases as rheumatism, nervous headache, neuritis and even partial paralysis and locomotor ataxia. As a tonic for the blood and nerves they are unequalled."

If you are a sufferer from any disorder of the blood and nerves write for a copy of what Dr. Williams' Pink Pills have accomplished in cases similar to yours. Every testimonial used by this company is carefully investigated before being published and is correct.

Dr. Williams' Pink Pills are sold by all druggists, or direct by mail, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by Dr. Williams' Medicine Company, Schenectady, N. Y.

ing the votes. The highest vote received by any one of the administration tickets was 18,132 and only one fell low 18,000. Hamilton M. Twombly, who stated some time ago that he would not serve if elected, and who received 14,203 votes.

The highest vote of the anti-administration ticket was polled by Stewart Shillite, who received 8,616 votes. The anti-administration tickets were: William H. Lambert, Charles C. Brown, George P. Miller, Hugo Baring, George C. Land, Louis Stern, Henry Phillips, Leroy Sullivan, Charles H. Maxim, Charles A. Peabody, H. Riemann, David, Thomas M. Muesey, Emory Clinton, Emile C. McMillan, Dumont Truesdale, William A. Dixon, one fell low 18,000. The anti-administration tickets were: Stewart Shillite, Theodore Nordford, James N. Jarvis, Cornelius Nordford, Julian T. Davies, August D. Sullivan, George H. Maxim, Fred E. Shook, John N. Auchincloss, George F. Baker, Harlow E. Higginbotham, Hamilton M. Twombly.

Salmon Chase, secretary for the international policyholders committee, in a statement made public tonight called the canvass a farce. He said:

"I am surprised that the inspectors counted any of the ballots of the policyholders committee. They might as well have thrown all of them out as to do what they did. They rejected genuine ballots for our ticket and were supported by affidavits of the policyholders and counted ballots for the administration that were shown by affidavit to be false."

"The international committee will continue this fight. We are hoping that upon presentation of the facts to the legislature many of the abuses will be rendered impossible."

Talk about your breakfast foods. A thousand you can see: I wouldn't have them as a gift: I'd have Rocky Mountain Tea.

Z. C. M. I. Drug Dept., 112-114 So. Main St.

## DOWIE ESTATE LOSES BEQUEST.

Springfield, Ill., April 19.—The supreme court today handed down an opinion adverse to the estate of John Alexander Dowie in the Sutton will case. This was a case where Frederick Sutton, who was a native of New Zealand, became a convert to Dowieism, and left an estate of \$54,000. It was contended by Sutton's heirs that the testator was unsound in mind and had been unduly influenced. The supreme court sustained the findings of the lower court in favor of the Sutton heirs.

## SOIL MOISTURE AND DRY FARMING

State Normal Illustrates How Schools May Teach These Topics.

TO STORE AND KEEP WATER.

The Plowing, Cultivating, Seeding and Crops Suitable for Arid Western Lands.

At the state normal this week, the nature lessons were taught to the training school children of the lower grades. The practice teachers, or normal students, first showed them how to prepare the soil and plant the seeds, and explained why plants thrive when furnished with a full and continuous supply of soil moisture. The working up of the soil to admit the air necessary for soil ventilation and at the same time to take care that the soil is not thereby too much dried out, and the necessity for plowing and overturning the soil, before planting, to get rid of most of the free water it may contain; the plant receiving the benefit of a plentiful supply of food from each tiny pore of the soil, and the general conditions for a good seed bed, were subjects illustrated in the field by the planting of trees and seeds. In the classroom, with an equipment of a handful of a dry soil on a sheet of paper and a lens for each pupil, the lower grades had no difficulty in finding out what soil is commonly composed of.

THE METHOD.

First we take the class out into the garden and work up the plowed soil for seeding. This is done by breaking up all clods and sowing until the plowed part for a depth of six inches is loose and fine, so that it will be warm, not too wet nor too cold, for the baby plants, and which otherwise could not grow. They must have plenty of food, water and air, which they cannot get if the soil is left hard. The roots of the baby plant must breathe, and must take in its food dissolved in water. The only way the baby plant can get its food is through the soil. The soil must be loose and fine, so that it will be warm, not too wet nor too cold, for the baby plants, and which otherwise could not grow. They must have plenty of food, water and air, which they cannot get if the soil is left hard. The roots of the baby plant must breathe, and must take in its food dissolved in water. The only way the baby plant can get its food is through the soil. The only way the baby plant can get its food is through the soil. The soil must be loose and fine, so that it will be warm, not too wet nor too cold, for the baby plants, and which otherwise could not grow. They must have plenty of food, water and air, which they cannot get if the soil is left hard. The roots of the baby plant must breathe, and must take in its food dissolved in water. The only way the baby plant can get its food is through the soil. The soil must be loose and fine, so that it will be warm, not too wet nor too cold, for the baby plants, and which otherwise could not grow. They must have plenty of food, water and air, which they cannot get if the soil is left hard. The roots of the baby plant must breathe, and must take in its food dissolved in water.
