Saturday, - - Dec. 6, 1873.

PRICE OF GOLD.
Corrected daily by DESERET NATIONAL BANK.
SALT LAKE CITY, November 29, 1873.
Buying at $1.08; Selling at $1.10.

SPECIAL BUSINESS NOTICES.

JEWELRY AT COST.—We understand that Mr. Carl C. Asmussen, because of declining health, wishes to withdraw from business. He has gained a high reputation for fair and honorable dealing and for keeping the best class of goods in his line. Give him a call and secure bargains. See his advertisement.
d13 5 e s

— Germany has finally decided on practically testing the proposition of abolishing supporting telegraph poles, by burying all the wires in the earth. Tubes are to be laid in shallow trenches, and through these wires are to run.

MR. SHIEL BARRY as "Michael Feeney" in "Arrah-Na-Pogue," and "Felix O'Callaghan" in "His Last Legs" to-night. Last night of Mr. Barry.

STILL VICTORIOUS.—Some seven years have passed since Dr. Price's Cream Baking Powder was first offered to the public for their trial and approval according to its merits, and its superiority over all Baking Powders and other means for making wholesome light sweet bread and biscuits has been established by their verdict. Still victorious, standing to-day in the estimation of thousands as the only safe and reliable powder to use. Those who have not should test it, as also *his* Special Flavorings, Nectarine, Vanilla, etc., which are not only equal but superior to anything ever used for flavoring cakes, pies, etc.

SYMPTOMS OF CATARRH. — Obstructions of nasal passages, discharge falling into throat, sometimes profuse, watery, acrid, or thick and tenacious, mucous, purulent, bloody, putrid, offensive, etc. In others a dryness, weak or inflamed eyes, ringing in ears, deafness, ulcerations, scabs from ulcers, voice altered, nasal twang, offensive breath, impaired smell and taste, etc. Few only of above symptoms likely to be present in any case at one time.

To cure—take Dr. Pierce's Golden Medical Discovery earnestly, to correct the blood and system, which are always at fault, also to act specifically, as it does, upon the diseased glands and lining membrane of the nose and its communicating chambers. The more I see of this odious disease, the more positive is my belief that if we would make treatment *perfectly successful* in curing it, we *must use constitutional treatment* to act through the blood, as well as a soothing and healing local application. Dr. Sage's Catarrh Remedy, when used warm and applied with Dr. Pierce's Nasal Douche, effects cures upon "common sense," rational and scientific principles, by its mild, soothing and healing properties, to which the disease gradually yields, when the system has been put in perfect order by the use of the Golden Medical Discovery. This is the only perfectly safe, scientific and successful mode of acting upon and healing it.

So successful has the above course of treatment proven that the proprietor offers $500 reward for a case he can not cure. All the means sold by Druggists. R. V. Pierce, M. D., Proprietor, Buffalo, N. Y.

No. 5 Second St., } Main St., S. L. City.
New York. } d284 1y

LOCAL AND OTHER MATTERS.

THERMOMETER 40 degrees F. in the shade, at 1 p.m. to-day. Dull and threatening.

Mud and Slush.—Any amount of it on the streets to-day. The atmosphere has been damp and cold.

Will Preach.—Elder John Taylor will preach in the 14th Ward Assembly Rooms to-morrow afternoon.

No Impediment.—The Gold Hill *News* thinks that "the number of wives a man has appears to be no impediment to his admission into Congress." Why should it?

Concert.—There will be a concert at the 8th Ward meeting-house on Wednesday evening. The choir of that ward and some of the best local musical talent in the city will take part in the exercises.

Preaching. — We are requested to make the following announcements:

Elder Orson Pratt will preach in the 12th Ward to-morrow afternoon.

Elder R. F. Neslen will preach in the 8th Ward to-morrow evening.

Home-made Presses.—Yesterday we saw, at the store of Mr. James Dwyer, a number of home-manufactured copying presses. They were turned out at the Salt Lake Iron Company's works, one block south of the Utah Central depot. Mr. Dwyer states that he has tried those presses and that they are equal to those imported, and that they are cheaper.

Afflicted.—A letter from Salem, Oregon, dated Nov. 23, in the Sacramento *Union*, says—

"About a week ago Ben. Holladay left us to go to San Francisco and then East for medical or surgical advice. It seems that during the Fair week, early in October, he received an injury or bruise on his knee while attending the State Fair, and this has caused inflammation and swelling, and become a serious running sore, threatening his very life. Therefore he has gone away to seek a remedy. Of late Holladay has seen considerable domestic affliction; a son died in China, a favorite daughter died on the train going East, and quite lately we hear of the death of Mrs. Holladay."

Putting on Airs.—Warden Rockwood's wards are inclined to be rebellious. They have a deep seated prejudice against the cook, and want Mr. Rockwood to remove him, and have even demanded that he should do so. These penitentiary birds lately held a meeting at which they resolved that the Warden should remove the obnoxious cook or they would not work. Mr. Rockwood received a document signed by fourteen of them, telling him what they had resolved upon, whereupon that gentleman signified to them his intention of putting ten of them in irons if they did not recede from their resolution, and he will do it too.

Pretty cool business this for penitentiary prisoners to commence dictating as to the management of prison affairs in matters of this kind. The Warder has some of the hardest cases under his care that ever saw daylight.

Theatre.—Mr. Barry appeared in his celebrated impersonation of "Michael Feeney" in "Arrah-na-Pogue." It is a remarkable impersonation, showing ability of a high order, and great power of facial expression. Mr. Barry dresses and looks the mean, shuffling, cringing old villain to perfection. The piece was well set and strongly cast, and all the characters were ably presented, Misses Denin and Adams, Mesdames Rea and Marden, and Messrs. Crosbie, Sawtelle, Marden, Forster, Thorne, Rea and Malben very creditably sustaining their respective parts.

Mr. Vinson, stage manager, appeared before the curtain and stated that "Arrah-Na-Pogue" would be reproduced this evening, by request, a sensible request and conclusion. The performances to conclude with the farce of "O'Callaghan, or His Last Legs." Mr. Barry as "Felix O'Callaghan."

Tullidge's "Oliver Cromwell" will be reproduced on Monday.

That Lecture.—A large audience assembled at the Twentieth Ward school house last night, to hear Dr. J. M. Benedict's lecture on "Health and Disease." The Doctor appeared to feel perfectly at home and handled the subject in a masterly manner. His opening remarks were devoted to the consideration of the wonderful mechanism of the human body and the exquisite harmony in its operations and between all of its component parts. No specific rules could be laid down for the preservation in the system of a natural condition, or state of health, but where laws of nature were known they should be implicitly obeyed. A violation of any of them opened the gates for disease to enter, by the introduction into the system of elements that were foreign to it. A state of health could not, however, be always preserved even by the exercise of the greatest care, as man was to a considerable extent a creature of circumstances, and subject to accidents and to external agencies the operations of which caused a general disturbance of the functions of the body.

The lecturer then described, in an able manner, the process which the food we eat has to undergo from the time it is introduced into the mouth until it mingles with the circulation and goes to make tissue, &c., and repairs the wastes of the body, and until the refuse portion of it is eliminated or thrown off from the system. He showed the important office of the saliva of the mouth in this work, and the injurious effects resulting from the excessive use of tobacco, or any other cause that produces a waste of this valuable substance. The Doctor also showed that digestion or dissolution of food was not all completed in the stomach, but also described the process by which fats or oily substances were disposed of after having passed from the stomach. He also named over a list of common articles of food and stated the times taken for the stomach to dispose of them, pigs' feet being the most easily digested of the meat class, venison and turkey coming next in order and roast pork bringing up the rear. In speaking of vegetables he said, "boiled cabbage will stay by you for twenty-four hours."

Some very interesting chemical experiments were prepared by Dr. F. D. Benedict, the lecturer's brother, with which the lecturer illustrated his remarks.

Lost.—A son of Mr. Robert Williams lost $15 near the Theatre, last Wednesday, November 3rd. The finder will confer a favor on the owner by leaving the amount at this Office for him.

Pisciculture. — By courtesy of Hon. A. P. Rockwood we are enabled to publish the following from a letter written by him to Mr. Livingstone Stone, the well known pisciculturist:

"I have this day received a communication from Mr. Weber, superintendent of your fish ponds, in New Hampshire, dated Nov. 19th, 1873. He purports to write at the request of Professor Baird, requesting statistics with regard to salmon eggs, forwarded me from California. I received the eggs at the junction of the C. P. and U. P. R. R. on the 12th of October, and placed them in my hatching troughs the same evening. They were in general good order; found about 1200 bad eggs out of the 40,000.

Each day for three weeks the eggs were examined and the bad ones thrown out, which amounted to about 75 per day, on an average. On the third day I found two dead and one alive of fry. On the 7th day several more were hatched. At the expiration of twenty days most of the hatching was through with. My hatching troughs were only calculated for 30,000, the putting in of forty covered the nests so thickly that the bottoms could not be seen. The umbilic sack was absorbed in from twenty to thirty days after hatching.

"The hatching trough and nursery box was so crowded that I tried the experiment of removing some of them to the nursery ponds before the umbilic sack was absorbed. My nursing ponds are from ten to fifteen feet square, with an average depth of twelve inches of water, each fed by a spring at the head of the respective ponds. The flow of water in each is from 28 to 30 gallons per minute and about three degrees colder than the water from which I removed them. For this or some other cause they all settled to the bottom and remained in an apparently dormant state for about an hour. They then began to revive and in less than an hour they were all bright and active. Seeing this result I immediately placed about 4,000 more in the same pond and about the same number in two more ponds that were in readiness.

"Very few that have been thus removed have died, whereas those that were left in the hatching troughs have died in a much greater ratio. A portion of this mortality may be attributed to the fact that the cripples were left in the troughs as they lay near the bottom and were not taken up in the dip net, used in removing. I fed them on boiled grated liver. They are thriving well and are much larger than the medium size referred to in Mr. Norris' book, entitled *American Fish Culture*.

"The young fry are now about 30 days old and the umbilical sacks are nearly all absorbed. They are from one to one and a half inches long, but not so full and plump as are represented for fish of this age in the *American Fish Culture* referred to.

"The shad fry, which I received of you about the first of last August, were placed in the Jordan river, about fifteen miles from the mouth. This river is the outlet of Utah Lake, and empties into Salt Lake. I have not heard of any of them being seen since they were put in. I presume they will be like the bread cast upon the waters, to be gathered after many days."

Engine House. — A short time since the Wasatch Fire company No. 2, petitioned the City Council to give the chief engineer or his assistants authority to make necessary improvements on their temporary engine house. The matter was referred to the city marshal. We understand he purposes recommending that the repairs asked for be not made, but that the west room of the 12th Ward meat market, now vacant, be altered so as to be made suitable for an engine house, and that the Wasatch Company use it for that purpose.

BY TELEGRAPH.

To-Day's Dispatches.

EASTERN.

Cuban Expedition.

NEW YORK, 6.—The representatives of the Cuban government and the Cuban Junta are planning an expedition from this city, and to this end negotiations have been carried on by both parties with Captain Frederick Bowen, who has selected his vessel and part of his men, and awaits now the payment of a sufficient sum on the part of his employers. Captain Bowen was in command of the *Virginius* in 1872, while she was cruising on the Venezuelan coast. He was a long time outlawed, and a price was set on his head by the Spanish government, for the successful landing of slaves on the Cuban coast. He has since been a blockade runner and in the coolie trade.

Detained.

The Spanish war steamer *Arispedes* has been delayed in the dry dock in the navy yard, owing to the flood gates being out of repair, and she promises now to suffer further detention as this morning a barge laden with two hundred tons of coal sunk immediately in front of the floodgates, and this will have to be raised and removed before the gates can be used. The *Colorado* will be moved from the yard to-night.

Bank Statement.

Bank statement: Loans increase $4,091,800, specie increase $1,351,600, legal tenders increase $2,332,700, deposits increase $7,675,900, circulation decrease $52,400.

Ordnance Shipped.

ST. LOUIS, 6.—All the heavy ordnance that has been stored in the arsenals here since the war is being shipped to Pensacola navy yard—large guns and many hundred pound parrots and mouitors.

Spanish Editor in Jeopardy.

CHICAGO, 5.—The *Times'* New York special says that Senor Conto, editor and proprietor of *El Cronista*, the Spanish newspaper published in this city, is said to have editorially expressed views that are hostile to the government of the United States, and favorable to the action of the volunteers in the *Virginius* matter. Rumor further says that President Grant consulted the Attorney General in regard to the legality of arresting Conto, and resolved from that authority the assurance that the action would be consistent and advisable. The correspondent of the *Times* asked Conto whether this report was trustworthy, and the editor in reply, said—"My advices are from private citizens of Washington, but I have every reason to believe that they are authentic. The President certainly consulted the Attorney-General, the only doubt is as to what decision was arrived at." "Have your editorials been hostile to the government?" Not especially. I deprecated the action of Admiral Polo, and said that the demands of the United States should not be acceded to. I have always stated, with great warmth, that the United States would accept the merest excuse to annex Cuba. The government allowed the *Virginius* to aid a party of outlaws twice, the commander of the *Virginius* know the consequences if they were caught, and they have suffered them. That is the worst I have said. I am a citizen of the United States, why should I not have the same right as others, who call government officials thieves and liars and fools? I never did that." "Do you communicate with Cuba by telegraph?" "No, only by letter." "When did you hear from there?" "I received a large package of letters last night." "What was their import?" "Well, every dog is for war. The United States have made al too severe demand and the Spaniards have all along felt that they were the injured instead of the injurer, and they will, as one man, resist the home government if it tries to enforce the unreasonable demand which Castelar has acceded to. There is no excitement in Havana, that is all false, but the papers, officials and people are determined to fight, or at any rate to maintain their dignity by a refusal to acknowledge themselves in the wrong." Conto also expressed his disbelief that Jovellar had tendered his resignation, and predicts that Castelar will send a successor, that Jovellar will announce himself Governor of Cuba, that every man in Spain will sympathise with him, and when he declares war, as he will if Castelar does not retract his present action, the Spaniards will throw the latter from the balconies of his residence.

Insolvent.

PROVIDENCE, R. I., 6. — The Cranston Savings Bank has been declared insolvent and a receiver appointed.

Murder.

BOSTON, 6.—An unknown woman was brutally murdered last night in a vacant lot near Columbia St.; the supposed murderer was pursued, but escaped.

Fatal Abortion.

Charles H. Sholes has been held in fifteen thousand dollars bail on a charge of manslaughter in having procured abortion, which terminated fatally to the victim.

CANADA.

Effects of the Storm.

TORONTO, 6.—The Union Station, Parliament buildings, central prison and a great many churches were more or less damaged by the storm yesterday; telegraph communication with the west and north is suspended.

FOREIGN.

FRANCE.

New Minister to U. S.

PARIS, 6.—The appointment of Batholdie, as minister to Washington, is announced.

— Daniel Andrews, a rich old resident of Delaware, died the other day, and his will cut his brother off with six cents, because the aforesaid brother once pulled away a chair and let Daniel have the floor.

— Albert M. Darwin drank twenty glasses of beer on a wager, and on his way home attempted to whip three policemen. When brought out yesterday morning he indignantly remarked, "Yer Honor, my theory is that beer is not intoxicating." "My theory," said the Court, sarcastically, "is that you will go up for sixty days."—*Detroit Post.*

— The teller of the Ville Marie bank at Montreal despises the way in which two Yankees got $10,483 that he left on the counter of his establishment, the other day. They were great lumber dealers on the Ottawa river, and they wanted to open an immense account with him, and "You just look at that map on the wall, Mr. Teller, which shows where we operate," they said. He looked, and the men escaped with the money.

[REPUBLISHED BY ORDER OF THE CITY COUNCIL.]

AN ORDINANCE

For the Prevention of Fires.

SEC. 1. Be it ordained by the City Council of Great Salt Lake City, that no person shall set off any fireworks, set up any stove, furnace or other apparatus in which fire is to be kept; or carry fire in the streets, without observing the following regulations, under penalty of not less than one nor more than one hundred dollars for each offence.

SEC. 2. No person shall be allowed within the limits of the City to discharge or set off any rocket, squib, cracker or other fireworks without the consent of the Mayor, specifying the time when and the place where the same may be done.

SEC. 3. No stove or other apparatus in which fire is to be kept shall be set nearer than eight inches from the floor except such as have no fireplace on the lower plate, such can be set within four inches of the floor on which they stand; and the top and side plates thereof shall not be set nearer than twelve inches off any wood partition, or other woodwork without protecting the same effectually from fire, by a metallic, or other covering; and no pipe belonging thereto shall be put up, unless it shall be conducted into a chimney made of brick, stone or other incombustible material, or if passing through the woodwork or roof of a building, there shall be a space of not less than four inches between the pipe and the wood, and the pipe shall be kept from nearer contact with the wood, by some safe material, and shall project four feet above or beyond the roof or wood work. *Provided*, the Mayor or any Alderman shall deem the above to be equally safe, then to be certified under his hand.

SEC. 4. No person shall be allowed to carry or cause to be carried in any street, thoroughfare or lot of this city any burning coals or brand of fire, unless the same be in a covered vessel.

SEC. 5. All forge and furnace chimneys or flues shall be raised at least four feet above the roof, by or through which they pass and shall have a deadening flue, or fire spark arrester of wove wire placed on the top or within such chimney or flue.

SEC. 6. The owner or occupant of any house, shop or other building shall cause the flues or chimneys thereof to be swept or burnt out as often as may be required to keep the same cleaned. In case of burning out flues, it shall be done in the day time, and only when the roof and other surrounding combustibles are wet. Any person suffering the flues of any house occupied by him or her to become foul and take fire, or be fired at any other time than herein specified, shall be liable to the penalties prescribed in the first section of this ordinance.

SEC. 7. It shall be the duty of the Inspector of Buildings to examine carefully, under the direction of the City Council, any cause from which immediate danger of fire may be apprehended, and remove or abate, with the consent of the Mayor or any Alderman (in case of neglect or refusal of the owner or occupant) any cause from which danger may be apprehended, and to cause all buildings, chimneys, stoves, pipes, hearths, ovens, boilers, ash houses, and other apparatus used in any building which be found in such condition as to be considered unsafe, to be without delay, at the expense of the owner or occupant thereof, put in such condition as not to be dangerous in causing or promoting fires.

SEC. 8. If any person shall obstruct or hinder any person under the direction of the Inspector of Buildings aforesaid, in the performance of his duty, under the preceding section, such person for every such offence shall forfeit and pay the penalty of twenty-five dollars.

Passed January 7th, 1862.
A. C. SMOOT,
Mayor.
ROBERT CAMPBELL,
City Recorder.

Territory of Utah, } ss.
Salt Lake City. }

This certifies that the foregoing is a true copy of the Ordinance passed by the City Council of Great Salt Lake City, January 7th, A. D. 1862, and now in force, entitled "An Ordinance for the Prevention of Fires," as appears from the Records on file in my office.

Given under hand and the corporate seal of Salt Lake (L.S.) City, this 3rd day of December, A.D. 1873.
ROBERT CAMPBELL,
City Recorder.
