LONDON WOOL AUCTIONS.

London, Jan. 16 .- The first series of wool auction sales this year opened today with a large attendance. Compe-tition at the opening was rather quiet, out improved later in the session, esbut improved later in the session, es-pecially so with continental buyers, who secured the bulk of better greasy mer-inos. The bidding on scoureds was not so good, owing to the inactivity of the home buyers. There was a larger rep-resentation of American buyers than period and they operated in conscience. resentation of American buyers that usual and they operated in crossbreds quite freely, paying December rates for all grades suitable for their require-ments. The home trade absorbed the

EL AMIGO SAMPLES. Ore Streaks Shows \$53.00 in Gold Vein

Matter-Runs Up to \$15,40.

Wm. Dix has forwarded some samples from the El Anigo property in Park Valley which show up encouragingly. Samples of ore from the ore streak show \$53 in gold, while a sample of talcy vein matter shows \$2.89 in the yellow metal per ton. Some samples of schist in the vein give \$7.44 per ton in gold and a sample of quartz schist proves under the fire test a value of \$15.40 in gold per ton. The samples all show a trace of silver and are taken from a drift run on the nineteen foot vein about 265 feet from the entrance to the tunnel.

STAR GOLD MINE. Mill to be Increased - Shipmenta for Past

Year Over \$10,000.

As intimated by the "News" some time ago the affairs of the Star Gold Mining company of Bingham reached a climax yesterday afternoon, when the shareholders met and discussed condition of the property. No lack of confidence is expressed in the value of the property. The mill capacity is the most serious consideration just now. The present mill is said to be working quite satisfactorily, but its capacity needs to be increased, and one of the results of yesterday's meeting, it is said, will be the doubling of the mill capacity as soon as the present indebt-edness of \$8,000 is wiped off. To do this a 3 cent assessment has been decided upon. The payments will be made in installments, the first to be paid by the 29th inst., and the second 60 days later.

The amount of cyanide product sold during the past year amounted to \$10,-987, which is thought to be a very fair showing considering the size of the mill and the fact that it was not run continuously throughout the year.

The meeting, which lasted for several hours, was productive of some feeling at the outset, but it is understood that everything has been amicably settled. Several parties made affidavit that two cans of cyanides were shipped in one shipment and one was never accounted for. This was apparently an at-tempt to injure Mr. Moffat, but it was exploded by the testimony of several gentlemen.

A committee was suggested to lock A committee was suggested to lock after the mine, and in the face of the objections of one or two parties the following men were elected to act, viz: C. H. Plant, Wm. Everett and Sam Williamson. John Treweek was after some discussion elected to the position of manager. This was ratified today by the beard of directors.

THE CYANIDE PRODUCT.

Big Consignments are Not Positive Evidence of Good Mill Work.

At times a marked increase in the cyanide shipments from some mines may be noted by the readers of the may be noted by the readers of the mining columns of the papers and the natural inference is that, such an in-crease in the weight of the cyanide product is evidence of the mine's doing better work. This may or may not be the case. It may as often be taken to indicate bungling in the mill's opera-tions. The truth is, but little reliance can be placed in the weights which are published with each consignment in the papers from day to day. A consignment of 600 pounds of cyanide product may not represent any more gold val-ues than another shipment of 100 pounds. Theoretically it may be pos-sible for all zinc shavings to be decomposed with the same amount of gold. Practically, however, this is never true. Various other elements.

gold cyanide

John Dern left for Mercur today. The completion of the new mill addition at Manning is retarded owing to the delay in the arrival of the tank bottoms.

No. 1-From Provo. Grand June quarantined it and the mill. A third order was finally placed, and that is now being delivered. D. J. Huntsman has exhibited some samples of very fine looking copper ore secured, it is said, near the La Sal district in the south. Before leaving for Salt Lake, Frank

E. Wilson said he saw no reason why The Taylor-Brunton sampler reported there should be another assessment on Aetna, while the improvement need six cars of ore from Park City, two from Bingham and fifteen from the Centennial-Eureka.

not be very great to make dividends. Hon. A. J. Crook has succeeded in getting installed at his claims in Cop-Gill S. Peyton, the well known minper basin and has begun work. He is now in Ketchum anxiously awaiting his ing man, received a check for \$1,000 to-day from Helen Gould as a contribuassay outfit, which is comnig from the west by his own teams. This outfit tion towards the erection of the pro posed Jackson college to be built in this valley. On its arrival it will be hauled over to Cop-per basin, and Mr. Crook will then

The Swansea Mining Company has had the Deleware lode claim in the Tintic district surveyed for patent, the having been filed in the office

of the surveryor general. A réport has reached the city which says that some rich silver and copper ore has been opened up in the property in the Bristol district, near Pioche, Nev., which was recently secured by Samuel Newhouse.

Superintendent Ed Cutler writes that the Red Wing mine, at Bingham, is looking well. The mill is working Ogden, Jan. 17.-The articles of incor-poration of the Eldorado Gold Mining and Milling Company have been filed looking well. The mill is working smoothly and the quality of ore now being run through is much improved with Clerk Hollingsworth. Their prop-erty is situated in the Willard Hill min-Three cars of concentrates, it is stated. will be on the market this week.

Plute Pioneer: Manager Sumsion brought down a 75-pound sample of fine lead ore from the Chattanooga mine Thursday. It was sent to Springville Friday morning. The Chattanoogn is in the same mineral zone as the Web-ter mine which has marketed a great ster mine, which has marketed a great deal of rich ore in the past.

a par value of \$1 per share. The of-ficers and stockholders of the company are John Logan, president: J. C. Wil-liams, vice president: Don Maguire, secretary and treasurer, and these gen-tlemen form the board of directors. The gentlemen have, at the present time, a number of men working on some of their claims, and expect within a few weeks to be able to ship ore. Word was received today from the Shoebridge Bonanza that the drift off the 450 level is now enlarged and timbered, and an upraise has been started in the ore chute. The opinion is ven-tured by the superintendent that the chute extends up to the old Mackin-tosh shaft. If this is so connections Directors Elected - Officers Chosen-Report will be made from the 200 and 300 levels.

The Boston News Bureau comment-The annual meeting of the Martha The Boston News Bureau comment-ing on the report given out by the di-rectors of the Utah Consolidated, says it is remarkable for the information which it does not give. No figures are presented to show what was received for the copper, gold and silver products separately, or the cost of mining and smelting the copper which is the com-pany's major product. pany's major product.

> that will handle twenty tons a day of the copper ore that is being taken out of the newly discovered mines north of Reno. The Jackson-Libby process of electrolysis will be used, and it is said that two per cent copper can be profitably worked.

BUSINESS NOTES.

day afternoon held its annual election, at which the following officers and directors were re-elected: John R. Barnes, president; George Ronney, vice president; W. S. Barnes, scoretary, and Arthur F. Barnes, treasurer. These, together with William J. Crowther, John C. Cutler and Edward Laird form
