# DESERET EVENING NEWS.

NO. 68

## AN HAWAIIAN EXILE.

Charges of an American Against the  
Island Government.

## FORCED TO LEAVE THE REPUBLIC

Although He Took No Part in the  
Revolution—The Case to be  
Investigated.

Washington, D. C., Feb. 11.—The side department will take vigorous measures in the case of J. Crandon, exiled at Vancouver yesterday on the Warlike, exiled from Hawaii. A protest statement has been received from the United States commercial agent at Vancouver, alleging that Crandon, an American citizen, guilty of any participation in the revolution, was forced to leave without any trial and subjected to severe pecuniary loss, Minister Williams said.

He is absent from Hawaii, and doubtless only investigating the matter. Should Crandon's assertions bear fruit today, there can be little question that he will have good cause for indemnity against the Hawaiian government.

## Cashier Threatens to Strike.

New York, Feb. 11.—The Libertytown Association of Cashiers met last night and discussed ways and means to bring about strike. Their funds, they say, are singularly low.

## BROKER BY GUATEMALA.

Three Americans Taxed on a Tax of  
Exemption.

OAXACA, Mexico, Feb. 11.—Three American citizens, who had been unknown, left a week ago to the state of Chiapas, to make explorations of the ancient Aztec cities of that section. Advice was brought to today by mail carrier, indicating that they were captured near the village of the Javie, and had been taken to Guatemala, refugees and reduced of the money and valuable which they carried.

## FOR BETTER GOVERNMENT.

Ministers Endorse the Reform Move-  
ment in San Francisco.

SAN FRANCISCO, Feb. 11.—The agitation in a negative committee of the Legislature of California in this city received an added impetus to-day by the action of the American Institute of European Policy.

It was decided that the bill which the

Legislature of California introduced

last year to prohibit the importation of foreign labor and to limit the number of foreign workers in California, should be passed.

The position demands in part should

and wages to be equal to those of the present pay which hardly averages \$200 per month, and of all new immigrants to the country.

The bill, it was decided, should be passed to-day or tomorrow, but they could not be verified. The fall-

ing officials declared it untrue.

## NIAGARA CANAL.

The Friends of the Little Niagara Over-  
the-Prospectus.

CHICAGO, Feb. 11.—The Turners have withdrawn from its Washington conference.

"The friends of the Niagara canal in the House last made more hopeful over the prospects before that measure within the last few days. It will be remembered that this is not the bill introduced by Mr. Weller, but the bill introduced by Mr. House. It is to be

seen that the bill is in committee.

The House committee simply amended the bill to remove the language of the preceding clause and inserting its own measure. This, if passed, will be sent to a conference committee, and then be made the subject of compromise on the part of the two houses.

## The Missing French.

KANSAS CITY, Mo., Feb. 11.—For miles along the Missouri river banks men and farmers are becoming apprehensive that they shall no longer be irrigated.

Most of the irrigation in Kansas is done

by the Missouri River, and the water

is taken from the river by pumps.

At the point the river has been

dammed, the water is held back,

and then pumped through pipes to

irrigate the land.

At this point the river has been
