

## LOCAL AND OTHER MATTERS.

Correspondents writing for publication are requested to write on one side of the paper only. No notice can be taken of anonymous communications. Correspondents' names must in every instance accompany their communications, and particularly those which affect the sense of responsibility.

THEATRICAL.—This evening Madame Scheller takes her benefit, when she will appear with Miss Charlotte Crompton in Shakespeare's great comedy of "Shylock," the latter lady sustaining the part of the inexorable, unmerciful, but well-tempered Jew and Mine. Scheller that of the noble, eloquent and quick-witted Portia. Miss Crompton has the reputation of being an actress of very superior abilities, and her impersonations are said to be very fine. The play is well cast, and will be followed with a Swiss dance by Miss Clive, and the very pleasing and attractive little comedy, "When Women Weep."

PERSONAL.—Mr. and Mrs. Waldron, after playing an engagement at Diamond City, Montana, with Mr. Langrishe, had returned to Helens, and opened there on the 3d in the "Island King." The Helens papers speak very highly of the performance. The "Marble Heart" was spoken there.

CRIMINAL.—"Jeff Davis" and "Abraham Franklin" were arrested lately in Helena, Montana, for a breach of the peace. They were called "puzzons," though.

COMMENCED GOING.—Bishop Proctor, with thirty men and four teams started out from the 16th Ward for Echo Kanyon this morning, to work on President Young's contract on the Railroad. They are pretty well provided with tools for their work, and have a month's provisions with them.

RETURNING.—By letter from San Francisco, dated the 2d, we learn that Elders Alma L. Smith, Ephraim Green and C. Boyden, with their families, arrived in that city on the 1st Inst., from the Sandwich Islands, on their way to their homes in this Territory. They were all in comfortable health.

FULL FLEDGED.—This morning full-fledged, though not full-grown, grasshoppers were flying around, seemingly enjoying their aerial powers and the warm sunshine. These are probably of the first that were hatched out, and we may look for them moving soon in some direction, whether into neighboring grain fields or to more distant parts, it is impossible to say. Vast numbers, by their size, look as if they would have their wings out in the course of a week.

TRAIN IN.—Mr. Perry's train of 60 wagons got in to-day from the east, and commenced unloading the merchandise which composed the freight.

TROUT SPAWN AND TROUT CULTURE.—Through the kindness of Hon. W. H. Hooper, our esteemed Delegate, who has received numerous letters from this Territory desiring information concerning fish culture, we have received a circular published by Mr. Seth Green, of Mumford, Monroe County, New York, the celebrated experimentalist in fish-culture. Mr. Green has been trying for, and will likely receive, an appropriation from Congress, to enable him to fully test his theory on this subject. We publish the circular for the benefit of the people at large throughout the Territory:

## GENERAL DIRECTIONS.

Build your ponds according to the amount of water you have. If you have but little, build small. The water should be changed every 24 or 48 hours, and the oftener it changes the better. The trout can be very plenty if they have sufficient fresh water and food.

I sell impregnated spawn from the first of November to the first of March, for ten dollars per thousand for lots less than 5000. For 5000 or over, eight dollars per thousand, shipped in moss. I can send them a fifty days' journey packed in a box with moss. I place the moss box in a tin pail, filled with saw dust, so that the spawn will not feel the change of heat and cold.

DIRECTIONS FOR HANDLING THE SPAWN.—Pick the moss carefully off from the top of the spawn. Then put the box in a pan of water and turn it nearly bottom side up, and pick the moss out very carefully. The spawn will sink to the bottom, and you can pick the moss out of the pan. If there is a little left in it will do no harm. Then pour the spawn in your hatching trough by holding the edge of your pan under water, and place them without touching the spawn, by agitating the water with the bearded end of a feather. The dead spawn will turn a milk white color, and should be picked out. MINERS' NATIONAL BANK, and give their names. No more teams wanted until after the work has commenced.

On the 1st of July, Will pay cash once each month. Men who want to secure employment, call at the

JOS. F. NOUNNAN & CO., Salt Lake City, June 8th, 1858. d170-6

WANTED, 300 MORE LABORERS TO WORK ON THE RAILROAD.
