ma combined 3,000,000 and Colorado 1,-£00,000. Kansas City is thus shown to be the central point and natural market for the greatest cattle producing territory in the world. During the first year of the new century receipts of cattle amounted to 2,000,165 head exceeding the heavlest previous receipts by over 30,000. There were also 126,410 calves received, while the hog receipts which aggregated 3,-716,404, were the largest ever recorded and over 600,000 in excess of the previcus year's arrivals. Sheep receipts reached a total of 980,078, and of this number 776,691 were slaughtered in

of live stock passing through the Kansas City stock yards was \$130,377,-658, over \$4,000,000 greater than in 1900. Notwithstanding the severe drouth which prevailed over the entire trans-Missourl country, Kansas City showed its supremacy as a feeder market, hav-ing sold 50,000 more cattle to range and feeding points during the year there eeding points during the any other two markets combined, and having approached within less than 9,000 head of the greatest of all dis-tributing years, 1900, when from Kan-sas City alone about 670,000 cattle and calves found their way back to the country. Two thousand thoroughbred cattle sold at auction at Kansas City at an average price of \$226.15 during the year. In fact the year of 1901 was the most successful year in the history of the Kansas City market and shows the steady trend of business to that point Kansas City, representing 79.3 per cent which is destined to be the greatest of the total supply and eclipsing all live stock market in the world.

The company owns five patented claims and it is hoped that the ore chutes will soon widen out. The statement is complete, frank and to the point and if other companies would do the same the exchange would soon feel very beneficial effects.

ROB ROY VEIN.

# Recent Earthquakes Exposed Vein

of Rich Ore. P. T. Farnsworth, owner of three-fourths of the Rob Roy mining prop-erty near Beaver City, and A. L. Fatheringham and Eben Gillis, of Milford

the other owners, are extremely happy over a discovery of a vein of very rich ore on the property. The assays on samples brought up yesterday give 5.4 ounces gold and 110 ounces silver per It is believed that the recent earth-

quake uncovered the lost vein of the famous Rob Roy mine, and that it has just been discovered.

# PARK CITY SHIPMENTS.

### Bad Condition of Roads from Quincy Delay Shipments.

Shipments from Park City properties for the week ending today amounted to 3.822,200 pounds exclusive of Silver King shipments. The Mackintosh sampler reports the shipments as follows: Pounds

The Quincy shipments showed a con-siderable failing off consequent to the very bad condition of the roads from the mine. Anchor shipments are pretty steady and Daly-West and the Ontario ,made very large shipments.

## Location Notice Filed.

Provo, Jan. 18.-The following notices of mining locations have been filed with the county recorder. Summit No. 7. petroleum claim, about two miles north of Soldier Summit near

the forks of the west branch of White River, in Utah and Wasatch counties, by W. H. Hackney, Sego Lily Nos, 1 to 6, inclusive, in (

West canyon, right hand fork, three-

## NEW THIRD SOUTH BUSINESS BLOCK.

The above is the elevation of the Halloran-Brisacher business block, excavation for which is now being made on east Third South street. For the present the frontage of the new building will be 38 ft, 2 in, but when the leases on the one story store building to the west expires, the entire frontage of 86 ft., 8 in, will be built. The structure will be three stories and the entire cost on completion will be \$100,000. The present depth will be 52 feet, 5 inches, but this will be doubled when the full building is up. C. M. Neuhausen is the architect.

we offer some thoughts on the subject. To make Utah lake a reservoir above its normal capacity does not seem to be feasible because of a lack of liquid element wherewith to raise it. The complaint is that there is not enough water to raise it to the compromise point. It is thought by a great many that the opposite course would be much better. That if a canal were dug on the east shore of the lake, catching all the water during the irrigating sea-

son, Salt Lake county would have all the water needed, if economically used. If not the lake could be drawn upon until below its flowing level and after by using a pumping plant. When we consider the immense amount of water that flows into Salt

Lake and that it is all evaporated, and considerable more thus reducing its level, we must admit that there is an immense amount of water wasted in Utah lake by evaporation. A direct canal to carry the water would save its evaporation to a very great degree its evaporation to a very great degree during the irrigating season. Such a canal would drain the lands bordering the lake instead of submerging them and would improve them instead of do-ing damage. Such a canal could be made by a dredge the embankment being thrown on the lake side mostly to form a level in case we should be more fortunate some year in having a heavy snowfall and water enough to a heavy snowfall and water enough to

raise the lake's level. raise the lake's level. The seepage water from Provo Bench we know to be excellent, and contains no alkali, from the fact that it is filtered through 20 to 30 feet of gravel and the same amount of quick sand before it reaches the water level and then must pass through the quick sand on its way to the lake. The more high water used on Provo Bench the better

water used on Provo Bench the better for Salt Lake county, because after it gets into the lower soli it looses noth-ing by evaporation and it comes out gradual for further use. During the low water season Wa-satch county shuis off all the water of Satch county shuis off all the seepage Provo River and we have the seepage after they have used it. Some of our canals are filled by nothing but seepage water. This is as it should be and make the water do double duty. It

would be a manifest injustice to prevent water from being used near its cource, because it was wanted lower, when it would reach the lower level later any way. It is true, there is a necessity for careful observation and equitable laws along these lines to work out the best inter-

sta of the community. In the meantime it is a necessity that we should direct our attention to a greater econ-
