

MINING, BUSINESS AND STOCKS

COLUMBUS CON.
SOFTENS AGAIN

Alta Stock Was Offered Freely
During the Forenoon Open
Board Call Today.

DALY JUDGE DROPS ALSO.

Activity in the Unlisted Stocks—Bidding for Newhouse—Closing Quotations and Sales.

The bulk of the business of the forenoon calls of the mining exchange was transacted on the open board. Columbus Consolidated was offered freely and dropped 15 cents a share. The stock closing on a sale at \$5.85. Colorado Mining moved up slightly, while Daly Judge dropped to \$11. A small lot of Little Bell was bought at \$5, and Yankee sold down to 63 cents. There was some active trading indulged in among the unlisted stocks. Bingham Copper made its appearance and 2,000 shares were at 40 cents; 500 shares of Seven Troughs Con. went at 25 cents; 600 shares of Concor at 50 and 45 cents. For Ohio Copper \$5.20 was asked; for Emma Copper, 50 cents and \$1.10 was bid for Standard Copper, while \$1.20 was asked. For Copper Glance, 26 cents was bid and 27 cents asked. Wheeler Gold was quoted at 40¢; Ely, 52¢; Cedar, 47¢; Western Nevada Copper, \$1.40; Newhouse, \$20.50 was bid, while McDonald Ely was offered at \$1.20. A bid of 20 cents was made for Western Pacific.

The closing quotations and sales were:

UNCLE SAM BUSY.

Gathers in a Bunch of Denver "Wildcat" Mining Promoters.

Denver, Feb. 28.—C. L. Blackman, fiscal agent, and Arthur Levan, attorney, of the Lost Bullion Spanish Mines company, with offices in the Temple Court building in this city, were arrested yesterday by Deputy United States Marshal I. L. Frank, on charges of having used the mails to defraud by advertising and selling worthless stock. The charges were made by Postoffice Inspectors Macomic and Biedford, who have investigated complaints made against the company. The company's books, the inspectors say, show that \$60,000 has been secured in the last four months from the sale of stock at 40 cents a share. The promoters were taken before United States Commissioner Hinsdale and furnished \$5,000 bonds each for appearance at 10 o'clock Friday morning for a preliminary hearing.

The company's property is located eight miles northwest of Silver City, N. M. The company was incorporated last November, with 10,000,000 shares at the par value of \$1 each. The original incorporators were R. C. Hunt of Denver and William E. Wilson of Boulder.

The original board of directors consisted of R. C. Hunt, W. B. Cameron, Arthur Levan, William E. Wilson and Charles Douglas. Hunt was elected president; Cameron, vice president; Levan, secretary and treasurer; and Leo Dubois, superintendent. Dubois is the son of the man for whom the property was purchased.

The company represented in its advertising that the entrance to the "old workings" of the mine was inadequate for modern methods of mining, and that money was needed to drive shafts and tunnels to tap the veins. The inspectors claim to have found that the so-called "old workings" which were said to be miles in length, are only a natural cave of irregular shape and the mine was said to be visible could not be found.

One of the circulars mailed by the company to prospective purchasers of the stock, and which was reproduced in Press dispatch, telling of the alleged rediscovery of the lost mine, which had been originally found by a Spaniard, and which was killed 10 years later by Indians, after he had taken much gold out of the mine.

Officers of the company have declined to affidavits furnished by them to the inspectors that an error was made by the printer who set up this article for a mining company, and that they did not intend to represent that it was an Associated Press dispatch.

MINING SUIT ENDED.

Judge Morse has handed down a decree in favor of plaintiff in the case of Judge Morse vs. Isaac Rhodes.

The action was brought to recover possession of the Julia lode mining claim located in Bingham Canyon. The claim was allegedly unlawfully elected by defendant on July 2, 1902. She also asked damages for said ejectment and for being deprived of the rents from the property. Judge Morse held that she is entitled to the ground in controversy and also to damages and rendered a decree accordingly.

NEW YORK ORE DISPLAY.

Mineral Exhibition to be Held Off in Grand Central Palace in April.

A lot of New York brokers and mining machinery men have formed what is known as the New York and Mines Exhibition company, the object of which is to hold a mining exhibition in the Grand Central Palace, beginning April 2, and lasting two weeks. Requests have been received by several local mining concerns have been asked to co-operate by sending on a collection of ores for display purposes.

A New York paper in referring to the coming exhibition says: "In the center of the building will be seen a plastic relief map of North America, which will show the exact location of all known mining properties, and the relative location of properties not yet developed, but with good prospects. A strata of rock formation of the known lode-mining districts will be shown, and likewise a strata of those mines yet to be developed. The plastic relief map will designate in an appropriate manner each and every claim represented."

WANTS RIGHT OF WAY.

Suit has been filed in the district court by the Rio Grande Western Railway company against the Atlantic Mining and Milling company to condemn a right of way over certain mineral property of defendant's near Bingham.

WILL FIGHT IT OUT.

Butte Operators Propose to Resist Miners' Union Dictation.

Butte, Mont., Feb. 28.—Three thousand miners and toponen are idle in this camp, owing to the demand for an increased scale of wages. 1,000 of the number have been laid off, in addition to the 2,000 on Tuesday last. All development work and surface improvements at all of the larger properties has been suspended. It is understood that at several of the Amalgamated mines bulkheads have been built in the lower workings to prevent flooding in event the pumps are forcibly stopped, and this is taken as an indication that the companies fear a further complication of the labor trouble, and a complete suspension of operations within a short time. There is a decided feeling of unrest among the people of the city.

COMPLETE TUNNEL CONTRACT.

Special Correspondence.

Provo, Feb. 28.—B. F. Woodward and J. F. Beck have finished their contract for 1,650 feet of tunnel on the Tidal Wave mine between Provo and Springville. The face of the tunnel is now in copper stained rock and it is expected another hundred feet will reach the vein for which the company has been driving. A contract for 100 feet has just been let to James and Hugh Pierce.

GREATEST
ALL THE WORLD

This is What J. H. Turner Has to Say About the Camp of Yerington.

TALKS ABOUT THE IRONSIDES.

Says Yerington Con. May Make Another Nevada Douglas—District Is Booming.

"You can simply say that Yerington is the greatest copper camp on earth," said J. H. Turner, secretary of the Yerington Ironsides Copper Co., who returned from a trip to the western coast of the United States, and who is looking for a new location for the company. "The country is booming and the copper industry is being developed in a most satisfactory manner," he said. "The development of the Yerington Consolidated property has begun in earnest and there is every reason to believe that it will open up into one of the big mines of the camp and may become a second Nevada Douglas."

"At the Yerington Ironsides, Manager Fred Flint of a force of men at work. Conditions there are most encouraging and those of us who are interested in the property are confident that we are going to open up another winner. Only the best reports continue to come from other mines in the camp. The Nevada Douglas has its traction engine in operation, and will soon be marketing ore; and the Yerington Copper has responded to development surprisingly well."

Mr. Turner says the opinion is freely expressed that the camp of Yerington will be cut off by the railroad to be built in the district, by about a mile and a half. It is claimed, said he, that the sanitary conditions in Yerington are not of the best and that the elevation being only six feet above the bed of the river makes it a difficult matter to provide a means of sewerage, which the town will need if it increases in population. Mr. Turner says there are out bigger and better than ever and the Yerington Copper has responded to development surprisingly well.

George Gunn of the Mason Valley and Fred Flint of the Ironsides are the two men who are most active in the camp. Mr. Gunn is president of the camp and Mr. Flint is secretary. The capital stock of the company is \$300,000, divided into shares of the par value of \$100 each. Mr. Gunn is president and Mr. Flint is secretary. The company owns the Birthday group of claims located in the Big Cottonwood district, Salt Lake county.

SAN FRANCISCO QUOTATIONS.

James A. Pollock & Company furnish the following quotations on Nevada stocks from San Francisco today:

that the metal is to reach a still higher level, close observers agree. The reported refusal of 25¢ cents per pound on Monday for 400,000 pounds of lake-copper for May and June delivers lends color to this belief. This extraordinary rise in price in time tell on the stock market prices of the producing mines.

The years 1906 and 1907 will go down in history as the most successful in the history of the metal, not only as to price but also for the metal. The reason for this is that the demand for the metal was never reached in the big producers has added immeasurably to the confidence of investors.

Calumet, Hecla and Tamarack, in the Lake Superior district; most of the Butte mines in Montana, and Calumet & Arizona and Copper Queen in Arizona, all show increasing richness at

CARLIS LOOKS BETTER.

W. N. Rossberg, superintendent of the Carlisle mine in the Tintic district

Third South St. and
Rio Grande West-
ern's New Depot

Are the talk of the town. Are you interested in real estate? If so, have you thought of the fact that sales of business real estate within one block either way from 3rd South Street have averaged, during the past twelve months, more than the sales made of all other business real estate in Salt Lake City? There is a reason. Watch this district grow.

We have the exclusive agency for some of the best buys on 3rd South Street. We have also other business property, and homes and building lots. No trouble to show property to intending purchasers.

GEO. M. CANNON CO.

Rooms 312-313 Templeton Building.
Phone Bell 57.

has returned from an inspection trip to that property on which he was accompanied by Manager Sidney M. Bamberg. Mr. Bamberg gave the conditions have never been as satisfactory at the property as they are now since he became connected with it and reports a large increase in the value of the property. The bad condition of the roads is interfering somewhat with ore shipments at the present time.

AMALGAMATED HIGHER.

London, Feb. 28.—At the opening of the stock exchange today Amalgamated Copper was supported and advanced 3/4 over yesterday's close.

LAWSON IN PICCHE.

Reports come from Boston to the effect that Thomas W. Lawson is booming Nevada Utah stock in the eastern markets. Information received today indicates that Lawson is making a big push for a further advance. The stock sold yesterday above \$7 a share.

The Nevada Utah company holds a bond and lease on the properties of the Pioche Consolidated and other ground at Pioche, Nev., an equity in the Comet mine in Beaver county and owns the last Chance mine in Bingham outright. The initial payment on the purchase price of the Pioche properties is due in May next when \$10,000 is to be paid on the principal—\$470,000. The Nevada Utah company has until 1910 to complete payments. Out of the total consideration the stockholders will receive \$70,000, the old Pioche consolidated company, the bondholders will be indebted to him for that amount.

NEW PARK CITY VENTURE.

The Reed's Peak Mining company of Park City filed a copy of its articles of incorporation with the secretary of state today. The capital stock of the company is \$300,000, divided into shares of the par value of \$100 each. The company owns the Birthday group of claims located in the Big Cottonwood district, Salt Lake county.

LOCAL MARKETS.

There is another slump in eggs which are now selling at \$5 to \$6 per case, instead of \$7, as Utah hens are awakening to the fact that spring is at hand, and they think of their eggs and do not care to sell them at such a low price. Poultry is also plentiful and prices reasonable. Artichokes are in the markets today, and selling at 15 cents. Bananas are in plenty and in fine condition. The best oranges of the season are in fine flavor, color and size, are being received daily in car lots, so they may be bought in any quantity. A car of lemons is also at hand, leaving a scarcity in that line. Chicken livers continues in the market, also western lobsters, with southern California vegetables, such as artichokes, asparagus, and a fine car of Ben Davis, Gano and Wine Sap apples from Idaho. The prices obtaining in today's market are as follows:

RETAIL.

Alfalfa, per cwt.	1.75
Barley, per cwt.	1.40
Wheat, per cwt.	1.40
Oats, per cwt.	1.15
Barley, rolled, per cwt.	1.45
