The week's business on the exchange consisted in the sale of \$1,160 shares of stock for \$43,039.97. On the whole prices show little change, Mammoth was strong on Monday, which was expected when the news of the new strikes leaked out on Saturday afternoon, The stock sold up to \$2.44. On later advices that the main chute had not been encountered on the 1900 level the stock weakened to \$2.28 yesterday, from which

communications of the same of

figure it sold down to \$2.21 today, Daly West closes the week a little stronger, thought it sold during the week up to \$19.12%.

Dexter also shows a little more firmness this week, as does Four Aces, for

which 4% was bid today. Eagle and Blue Bell has made advances since the news that connection has been made with the shaft and the

owest workings. The stock sold at \$1 Joe Bowers shows itself in better form than it has been for weeks. After closing at 5 bid on Monday last it ends

the week with 814 bid, 9 asked. Grand Central sold down to \$5.40 during the week, but advanced next day to \$5.78, after which it declined to \$5.60 sterday. The stock was a little firm-Mercur, which sold down to \$4.75 since

the declaration of the last dividend, has gained strength during the week on news of the improved condition of the mine's base ore bodies, hitherto but lit-

May Day was weaker today, after banging around \$1.12 all the week. Sacramento was also a little off today after selling up to 23 during the week.

Yankee Con., which has remained around 14 for a long time past, shows liself much weaker today, closing with H asked, 10 offered,

WEEK ON WALL STREET. ket has shown some recuperation from the shock of the deep cut in prices an nounced by the American Steel and Wire Company. The over-extended short interest had much to do with the range in prices. New York, April 28 .- The stock mar short interest had much to range in prices, especially in sagar which dominated the tone of the whole market for several days. The appar-ently unanimous testimeny of authoriles in the iron trade that prosperous conditions have undergone no change as served to offset to some extent the niluence of the steel and wire episode Railroad earnings continued at a very high level, and the fallure of predic-tions of large exports of gold and con-tinued case of money counteracted the efforts of the bears for reaction.

FORMING A UNION.

Smelter employes, profiting by the example furnished in the failure of the example furnished in the failure of the strike at Murray, are forming a union under the jurisdiction of the Western Labor union. It is alleged by mem-bers of this organization that the smellers are violating the State eight-hour law. The union now quiefly and slowly coming into organization is to be composed of smeltermen at Murray and Sandy. and Sandy.

# ACCEPTED TODAY

James W. Neill to be Succeeded by A. F. Holden.

GOLD IN THE R. G. W. GROUP

Black Quartz Filled With Yellow Pellets - Tin Ore Assayed in the City-Week in Hingham.

A telegram was received today from Boston notifying General Superintendent James W. Neill of the United States Mining company .at his resignation had been accepted. Mr. Neill will step out of office on May 1st, and the conducting of further work on the property will be left in charge of A. F. Holden. Mr. Holden has not had anything to do with the United States company for ome month's past, and when seen today regarding his appointment he said there was nothing to give out at present. Later on he will look into the mpany's affairs and will then be able to outline the policy to be pursued It is not thought that the change will affect the proposed new smelter in the least. The experts have finished their examinations and have left for Boston where their report will be spread before the directors. As to what the report will contain nothing has been revealed. But the fact remains that the company has sunk a lot of money in the big Bingham property, and about the only prospect of their ever getting it out, lies in the erection of a smelter. The resignation of Mr. Ueili appears

to have come because of personal matters between Mr. Holden and nimself, believed to have originated during the recent flurry in United States at Bos-

PLENTY OF FREE GOLD. Thick Clusters of Pellets Seen in Ore from the R. G. W. Group.

Some excellent samples of gold bearing are have been brought to town by Dr. Meyer from the R. G. W. group in Tintic. Samples of ore have been seen previously in which specks of free gold appeared, but nothing has been brought to town showing the richness of the samples seen today. The rock is a dark quartz impregnated with iron and shows thick clusters of yellow pellets ranging in size from a pin's head down to small specks scarcely discernible with the naked eye.

RICH TIN ORE

Reported to Have Been Discovered Near Utah Border. Experiments are now being conduct-

ed by three assayers and mineralogists of the city to determine beyond a doubt that tin ore has been found near the that tin ore has been found near the boundaries of this State. The exact location is withheid for the present, but the particulars given out are to the effect that 20 pounds of ore was sent to the Consolidated Kansas City sampling rooms, from which 1½ pounds of builion was derived. The builion is said to contain between 50 and 60 per cent lead with a trace of silver. The greater part of the remainder of the builion is said to be tin. An analysis has already said to be tin. An analysis has already disclosed that fact, it is said, but to make assurance doubly sure, other an-alyses will be made during the next few days. Should the statement prove cor-rect it will prove a rare find as well as

A large sum has been expended during the past year in upground im-provements at the United States mines, but considering the forbidding, tum-ble-down condition that prevailed it

was a wise investment. Ed. Baker and Frank Gibeaut, leasling the Summit claim of Dalton and Lark company, are sinking a vertical shaft to connect with Grav Eagle tun-nel for air. It is now down 75 feet and will make connection in a total of 118 feet. The boys lately encountered a streak of ore that assays 33 per cent lead, 23 per cent sliver and \$5 in gold, and are hopeful of soon being in a good body of the mineral. The Summit idjoins the Northern Chief and Silver

MINES NOT SOLD.

Capt. De Lamar Has Not Purchased the Blue Ribbon Group.

The Blue Ribbon group of mines, located near Granite, were sold a few days ago to P. P. Donohue, representing the De Lamar interests, for \$70,-000, says the Baker City Democrat. The owners of the property were Pendie-ton parties. The terms of the sale are \$7,000 in thirty days, \$27,000 in sixty days, and \$25,000 in ninety days. The property embraces several claims, some of which are largely developed.

Mr. Donohue reached town last night from the Oregon gold camp and when seen this morning disclaimed all knowledge of any sale. It is true, he | Ed Loose of the Grand Central cents.

said, that one of captain be Lamar's staff had looked over the district, but further than securing an option of the property nothing had yet been done. The option will expire in thirty days, before which time an examination will be made by H. A. Cohen, who will decide whether or not the purchase will cide whether or not the purchase will

e made. Mr. Donohue says there is a great deal of activity in that section and a few big mines will doubtless be developed. Among the Salt Lakers in the field he saw C. C. Higgins, C. L. Preble and others. The camp has some good things but like most camps it has been boomed too much, probably more than the facts warrant.

DREDGE TO BE BUILT.

Will Handle 2000 Yards Per Day of the Sands of Colorado River.

Major R. B. Stanton well known because of his connection with the placer mines on the Colorado river, is back from that locality where his company is preparing to erect a large placer dredge, with which to secure the fine gold in the river bars. The dredge will have a capacity of something like 2,000 yards per day. Contracts for hauling the machinery have been let to Charles A. Gibbons, of Hanksville. The haul will be made from Green river station to a point near Hall's crossing, a distance of 130 miles. It is expected that the whole of the machinery and ma-terial to be hauled will weigh about 250

Tintic's Weekly Output.

Special Correspondence. Eureka, April 27.—During the past seven days the shippers of Tintic dis-trict have sent 106 carloads of ore and reliable mines around Eureka, in-cluding the Centennial-Eureka, Gemini, Uncle Sam, Humbug and Godiva, contributed heavily toward the week's to-tal, the Centennial-Eureka coming to nine carload shipment. The May Day, an infant benanza which promises to rival the old producers in the Eureka nice consignment of four carloads, of very high grade ore. The former leas-ers of the Buckeye, H. T. Sappington of ore, but as they have now given up the lease, the Buckeye will doubtless be absent from the shipping list for a short time. The shipments for the week are as follows:

Centennial-Eureka ...... 16 Gemini (Keystone) ..... Buckeye (Sappington lease) ..... Ajax.... Carissa .... ..........................

The Bullion-Beck mine falled to ship any ore this week. The ore taken out of the mine at present is being run through the mill. The Beck mill mar-keted two cars of concentrates while the Mammoth mill sent out three car-

MINING NOTES. The Horn Silver of Frisco marketed four cars of ore today, The Grand Central of Tintle had four
