

# Can You Afford to Turn Down An Investment In This Growing Enterprise?

Work will be commenced this week on a thousand barrel refinery on the banks of the Missouri at Atchison. Business men of Atchison furnish thirty-two acre valuable refinery site with sidetrack and railroad switch and bonus of \$2,500. Only five hours by river to St. Joe, four to Leavenworth and ten to the two Kansas Cities. Rigid investigation of the Missouri river proves that oil barges with 900 barrel capacity can be run as far north as Omaha and Council Bluffs. From these railroad centers the big cities of Nebraska, Iowa, Southern Minnesota, Wisconsin and North Dakota and Northern Illinois can be reached by short haul, while Missouri, Kansas and Oklahoma will be patrolled by pipe lines and the Missouri river.

COUNCIL BLUFFS 35,000 POP

## TAKE 1,000 SHARES ON THE MONTHLY PAYMENT OFFER.

BY SENDING \$16.00, DRAFT OR CHECK, NOW AND PAYING THE SUM OF \$19.00 PER MONTH FOR THE NEXT SIX MONTHS WILL PAY FOR ONE THOUSAND SHARES OF STOCK IN THE UNCLE SAM COMPANY. THE CHANCES ARE THAT LONG BEFORE YOU HAVE THE STOCK ALL PAID FOR IT WILL BE WORTH DOUBLE WHAT YOU CAN SECURE IT FOR NOW. A SAVING OF EXPENSE MONEY MIGHT SECURE YOU THIS ONE THOUSAND SHARES, AND IN FIVE YEARS IT MAY BE WORTH \$3.00 PER SHARE, OR \$3,000.00. BETTER SECURE THIS STOCK AT ONCE BEFORE IT IS ALL SOLD OR ADVANCES.

With another great refinery built, with the 180 miles of pipe line completed and oil barges on the Missouri, any sane man must admit will increase the stock of this company in solid value to at least \$1.00 per share, or nearly ten times the present selling price.

On a conservative basis there is 350 per cent profit in refining oil. Compare our own production, pipe line, river barges, tank cars and surrounding our oil consuming territory with hundreds of stockholders places this company in a position to secure all there is in sight.

One of the Most Valuable Holdings of the Uncle Sam Company.

Among the thirty-two thousand acres of oil and gas rights owned and controlled by the Uncle Sam Company are 45,000 acres, about four miles southwest of Bartlesville, Oklahoma. This tract of land consists of eleven hundred acres. There are already five producing wells completed. Two pumping plants. Two miles of pipe line have been laid down on well No. 4, and about 100 barrels per day, and is now making over 50 barrels per day. The oil is high grade, testing between 25 and 35, and is being refined at the company's refinery at Atchison, Mo. On this lot 45 the company has room on proved grounds for 225 acres. The oil is high grade, testing between 25 and 35, and is being refined at the company's refinery at Atchison, Mo. On this lot 45 the company has room on proved grounds for 225 acres. The oil is high grade, testing between 25 and 35, and is being refined at the company's refinery at Atchison, Mo.

Thirty-Two Thousand Acres in All.

The Uncle Sam company is pursuing the safe course of owning its own production. It has room for over six thousand acres on its different holdings. There are already NINETEEN (19) wells on the pump on properties owned and controlled by the company. We are independent. We have our own oil, and when refined we can get what it is worth.

Uncle Sam Refinery No. 1 at Cherryvale, Mo. Turning Out the Finest Grade of Oil Ever Manufactured in the West.

When you buy stock in this company you join a strong man, a business concern, at Cherryvale, Mo. refinery No. 1. It is now turning full blast. This refinery is worth to the stockholder at least a QUARTER OF A MILLION DOLLARS. From this refinery are miles of lateral pipe lines connecting the larger portion of the Cherryvale field. More lines are being completed. This refinery will be used to distribute the company's refined oils over the southern and central territory.

Storage and Distributing Stations for Kansas.

At Hutchinson, Topeka, Wichita, Salina and Concordia the company is putting large distributing and storage stations. In less than three weeks the company will be selling all the refined oil it can put out at Cherryvale and then some at these different points.

People Will Buy Uncle Sam Oil in Preference to Trust Inferior Goods.

The Uncle Sam company is making a specialty of manufacturing a very high grade oil. Our best oil tests 150 and better. From every section of the country comes in the report that the Uncle Sam independent oil will receive a preference over the cheap trust oil. Don't wait until the company has everything complete and running like clockwork and then expect to buy at present prices.

Missouri River Refinery.

Few people realize the great work the Uncle Sam company is now doing. In time the company will have a pipe line running clear across Kansas, pumping oil right to the doors of thousands of taxpayers of the state, besides reaching Topeka, a city of nearly fifty thousand people and rapidly growing in manufactures. From the banks of the river the company can barge oil all over the central west. An oil barge of 900-barrel capacity can be run clear to Omaha, where both refined and fuel oil brings a high price the year around.

Can Barge 900 Barrels to Omaha for \$120.

To give you an idea of the great advantage of the river on which to deliver the oil, will say that upon careful investigation we find that an oil barge sufficient to carry 900 barrels can be run to Omaha and the boat returned for not over \$120. Figure for yourself.

Can Pump Oil From Cherryvale to the Missouri River for Six Cents Per Barrel.

The fact that we can pump the oil over our pipe line when completed for about one-fifth the present railroad rate and then from the river deliver it to about one-fifth of the population of the United States at very little cost ought to be argument enough to convince any fair-minded man that stock in this company is a fortune maker. Suppose you do not buy even one thousand shares, you will have property that stands a good show of going to par, while you now can buy it for 12 per cent of par.

PROPOSED REFINERY AT ATCHISON 18,500 POP

With Pipe Line Completed and Missouri River Refinery Built, Company Will Clear Close to \$4,000 Per Day.

With our pipeline to the Missouri river bank will afford larger tax rate than we can fill. The company needs money now to complete this work and to offer the stock at a sacrifice price. It will not remain this way for long. It will be better secured down \$1.00 and accept our special offer of \$1.00 for ten thousand shares.

Forty Miles of the Pipe Line Now on the Grounds and Work on This End Has Commenced.

Every day will find this company near its goal. Work of laying pipeline is under way. This pipeline will be completed as fast as the company can build it without interfering with the building of refinery No. 2, on the banks of the Missouri. We can pump the oil in the pipeline as far as we have it completed and tank cars to the balance of the pipeline. We should not have the entire pipeline completed by the time the refinery at the river is ready to receive oil.

Over One Hundred and Twenty Thousand Dollars Subscribed on Gift-Edge Monthly Payments to Help Along This Work.

Besides the income from the refined oil sold from the Cherryvale refinery daily, the company has subscribed on gift-edge monthly payments, over \$120,000. This money is coming in at the rate of from \$200 to \$1,500 per day. It will be but a matter of a few months before you will see another refinery completed, and it will be but a matter of time, in fact, until the pipe line is completed. Can you afford to let this stock get out of your reach with this great development? Walking right along! Just stop and think a minute where this company will be in a year. Don't you know, with this pipe line completed and two refineries and river barges, that there will be very little of this stock to be had under \$1.00 per share? Most everyone is looking for a good investment and you will not have an opportunity very soon again to place your money where it will have an equal show to earn you great profits along with other small investors. This is a company that is working for a good cause, and by securing this stock now your money will not only make you a good investment but will assist to success the only independent company in the west that is strong enough to take care of itself and place its products on the markets of the world, regardless of any combines or criminal estate system.

Stockholders in Every State and Territory in the Union, Also Old Mexico, Canada and Philippine Islands.

When you join this company you join a band of over 3,000 strong, representing influential men from all sections of the country. From Maine to California, from Canada to Old Mexico, unlimited financial aid is being poured in for stock in this great company. The time to invest in an enterprise of any kind is while the work of development and construction is in progress. Now is certainly the time to secure your interest in this one.

Four Drills Running Night and Day.

Every week completes additional production on the vast holdings of the Uncle Sam Company. Drill No. 1 is rigging up today for well No. 5, on the Uncle Sam Central holdings just north of Cherryvale. There are seven producing wells within a quarter of a mile of this location. Drill No. 2 is within 100 feet of the oil sand on the holdings north of Peru. Drill No. 3 is at work right up against the Ogea Mountains, south of Bartlesville. One of the largest flowing wells in the Cherokee nation is within three-quarters of a mile of this location. Drill No. 4 is at work on lot 45, Ogea. As before stated, there are five producing wells already on this land and only about 200 feet south is a well that started off at 260 barrels per day. There is bound to be found some big well bet some of these locations. The time to buy your stock is before they are completed. The company owns its own drill rigs, does its drilling at cost.

Financial Condition of the Company.

Authorized capitalization is \$10,000,000, divided into 10,000,000 shares of a par value of \$1.00 each. There is no deadweight stock in the company. Everyone who

LEAVENWORTH 30,000 POP

Better Start Today Than the Oil Trust Had at the Beginning.

Stock in the oil trust one time sold at \$600 per share. It is now selling for over \$600 per share. It is a well known fact that the Uncle Sam Company today has ten times a better start for the first seven months of its existence than the present oil trust had in the first two years of its existence. Refineries and pipe lines are not going to run away. They are valuable property. They will be money while you sleep. Money invested in them is safer than in loss of trust companies or saving vaults. The stock can not help but double in value by the time the Missouri river refinery is completed, while the chances are that it will put it close to par, or \$1 per share. Then let a reasonable dividend be paid yearly for the next five years, and the greater part of the profits

placed into developing our large oil territory, you will find out that this stock will prove a fortune-maker in fact as well as name.

Second Pumping Station Will Be Near Topeka.

The second big pump that will push the oil through the pipe line will be near Topeka. At this relay station plans are being made to run a branch line into the Kansas city area. The Topeka Company, which has been promised by the company, will be one of the oil at right prices. We can pump it right to the furnaces of her manufactures. We can pump both crude and fuel oil over the same pipe line.

Fuel Oil Will Bring Good Prices at the Cities Along the Missouri River.

A trip along the river cities of the Missouri will find business men who will be willing to pay good prices for fuel oil. A half mile of where refinery No. 2 will be built, there are brick yards making brick with wood for fuel. Fuel oil is the most practical, is easier to put in the furnaces and will reach the market at such places as this. We can pump the oil from the Cherryvale plant to the Missouri river over our own pipe line now being built for six cents from points on the Missouri river up to Omaha or down to St. Louis for 4 to 10 cents per barrel. We have plenty of this oil. Figure for yourself what the profits will be.

Can Complete 150 Wells Per Year.

With the drills now owned by the Uncle Sam Company we can drill over 150 wells every twelve months. The line, when completed, will pay substantial dividends and run at least three dollars a share. Don't you see, by securing stock in this company now, you are drawing on the self-sustaining property that will develop itself. You are welcome to buy 100 shares at \$1.00, or to take 2,000 shares at \$50.00. This is a common stock company, the rights of the smallest stockholder will be fully protected.

Reasons Why the Company Can Sell This Stock at Practically a Sacrifice Price and Make Money by So Doing.

Most every successful enterprise that has in time paid handsome dividends has at some time in its history been in general public to invest in its capital stock. You can readily see that with a few hundred thousand dollars more that this company can complete its pipe line and another refinery, and complete its river barges and build its tank stations and drill additional wells. We have this organization, have the work well under way, have the money to pay thousands of dollars already invested. \$14 from this man, \$23 from another, \$50 from another, and from \$100 to \$1,000 from another, all added together, when you are drawing from the entire United States, soon make it possible to complete our great work and put our company on a dividend paying basis, where it can soon earn back the stock at a price that is certain to make you good money. In other words, we need your capital to help make our properties more valuable and offer you value received.

Financial Condition of the Company.

Authorized capitalization is \$10,000,000, divided into 10,000,000 shares of a par value of \$1.00 each. There is no deadweight stock in the company. Everyone who

ST. LOUIS 800,000 POP

Two Kansas Cities 325,000 POP.

The western people know that the oil trust is practically stealing the oil from the independent producers in Kansas and Oklahoma. All that is needed to check these highwaymen is to place the Kansas maximum freight rate law and anti-discrimination law on the statute books of the aforementioned states, and by that time the Uncle Sam Company will have to increase its plant to meet its demands. Anyone who can read the signs of the times knows these conditions are

certain. Why not join the Uncle Sam Company and do your part to help bring them about and realize the great profits that will be made, and at the same time help a worthy cause?

Hundreds of Investors Have Paid What We Ask You to Pay.

When you buy this stock you not only secure property that will greatly increase in value and in time pay dividends, but you pay no more than hundreds of other investors who have fully investigated the merits of the Uncle Sam pipe line and stock at the same prices offered herein to you. Bankers, merchants, laborers, farmers and professional men who know the value of a dollar, have during the last month purchased this stock at this price. It is a good property for them, why not for you?

Pipe Line Will Extend Through an Oil Field for Over Sixty Miles—Lateral Lines Will Reach Fifty Miles More.

Omaha, St. Joe, Kansas City and St. Louis will be served by the pipe line that is being pumped from the wells in Kansas and Indian territory. These are facts worth thinking over. Don't you see that the Uncle Sam pipe line and river barges we have a market that no trust on earth can interfere with and that our company will be free and independent and can secure for its stockholders the handsome profits that will naturally be earned?

The Size and Plan of Our River Barges.

The river barges will be built on the plan of the sand barges that you see every day along the river front, only one size larger. They will draw two feet of water and will carry from 100 to 120 tons. Five flat tanks will be built on the barges, and before the year ends will have them both completed. Now this is the kind of a company to invest with. It has kept its promise this far and has gone past the doubtful stage. If there ever was one in its career, hundreds of thousands of dollars have passed through the hands of the managers of the company, and faithful accounting can be made of every cent. With great success already achieved and greater success in the future assured, the same old story is being told over and over again. There are no swelled up guys connected with our company, no millionaire frenzied financiers, just the plain, every-day, hard-working people, working for principle as well as for gain, and contending with the same old enemies of the oil trust that any citizen has the right to contend with. THE INDUSTRY OF PRODUCE AND REFINING AND SELLING PETROLEUM AND ITS BY-PRODUCTS WITHOUT THE CONSENT OF ANY FOREIGN TRADING COMBINE. If you are willing to help us in this great work we will be glad to enroll you among our band. If you are not in sympathy with our efforts you will oblige every stockholder in the company if you will keep out.

Laying the Foundation for a Great Future—With Hundreds of Stockholders All Over the Central West, the Kansas Maximum Freight Rate Law Will Go on the Statute Books of the Central West States.

With our refined oil laid down by pipe line and river to within a few hundred miles of the principal cities of Iowa, Nebraska, South and North Dakota, Minnesota, Wisconsin and Missouri, how long do you think it will be until the Kansas maximum freight rate law will be copied bodily and passed, word for word, in all of these states? As has been demonstrated, the people in these states look with vengeance upon the aggression of the oil trust. The west does things. They will not stand idly by and see any kind of robbery with impunity. The great industries in a sister state

Two Kansas Cities 325,000 POP.

The company will accept a limited number of deals to one man or a club of men for ten (10,000) thousand shares at the lump sum of eleven (\$1,150) hundred and fifty dollars on payment of \$350 down, \$350 in sixty days and \$450 in 120 days. Contract binding company to fulfill its part of this offer will be sent by registered mail promptly on receipt of the first remittance. If you do not have the money right by you to make the first payment send in a smaller amount to hold the deal for a few days as this offer will not remain open long.

One of the Expert Still Men Took Five Thousand Shares Today.

As an additional confidence shown by those who are working at the plant we mention the above. One of the expert still men who just came from the east only a few weeks ago, unacquainted, walked into the office today and took 5,000 shares at \$20.00. This man is an old refinery man and his judgment should certainly be good. If you will follow the example of this man you will probably be glad of your investment in less than ninety days.

Within Five Hours' Run by River to St. Joseph.

There are close to 100 barrels of refined oil being sold daily at St. Joseph, Mo. Besides this there are large packing plants and other manufactures that will be glad to buy fuel oil. We will have a pump right on the river barge and will pump oil ashore at our storage tanks at St. Joseph. We can reach St. Joseph in five hours over the river.

Keeping Its Promises and Completing Its Work.

Everyone who has followed the advertisements of the Uncle Sam Company from the start, now over six months ago, must admit that the company has "made good" from the word go. It promised to be selling refined oil from its Cherryvale plant in five months from the start and did it. It promised to build a pipe line to the Missouri river and refinery Number 2 on the banks of the Missouri during the year. It is running on schedule time. It has the pipe line well under way and work commenced on the refinery on the Missouri, and before the year ends will have them both completed. Now this is the kind of a company to invest with. It has kept its promise this far and has gone past the doubtful stage. If there ever was one in its career, hundreds of thousands of dollars have passed through the hands of the managers of the company, and faithful accounting can be made of every cent.
