WASHINGTON, 31.—Dr. Norvin Green, President of the Western Union Telegraph Co., addressed the Senate committee on postoffices and post roads in opposition to the proposed government control of the telegraph. He said unless there was something defective in the service rendered, there seemed no reason why the government should take hold of the telegraph. He maintained that we had telegraph facilities in larger proportion to our population, and a better and cheaper service, than any country in Europe. He explained the cheaper rates of Europe by saying there a message was counted once in every country through which it passed, while in this country it was counted but once. A senator thought the statement an extraordinary one and referred to the rates of France as being only 20 cents for 20 words within the limits of that country, and an average of half a cent within other European countries. He cited the rates from France to Algiers two thousand miles, which were only 20 cents for 20 words. Green replied: The Algiers line was operated at a loss. No company could send twenty words for 20 cents without loss. A new tariff was in process of preparation to go into effect March 1st, giving a maximum rate of \$1, for which sum a message 1d be sent 4,500 miles, from Halifax to Washington Territory. He could furnish the committee with a copy of the contract with the Associated Press. It contained a clause that no cheaper rates should be made.

CORRESPONDENCE.

The Governor and the P. E. Fund.

KAMAS, January 30.

Editor Deseret News:

I was somewhat surprised when I read that portion of the Governor's Message referring to the Perpetual Emigrating Fund Company wherein he wishes the repeal of the incorporation of said company, and the emigration business to be placed in the hands of an officer or board of the Territorial government. I asked myself what officer or board does he wish to place the control of the P. E. Fund in, and it struck me that he might expect to be that officer and the board one of his own appointment. If so I am more than ever astonished, for in my associations with him two years ago in a law-making capacity I could plainly see that he would like to manipulate
