Queer remark. But our town is good enough to teach in, so that is some-thing to be sure, even though we are inferior in every other way. Poor back-woodsy Salt Lake! But does she need such teachers?
"The people, here, have no appre-dation of real art; in fact they know absolutely nothing about it."
Another disgrace!
"Especially the older ones," contin-ued this shining light; "they look at you in blank amazement at the mere mention of the word. Now in the east they begin young, and by the time they are elderly, well, they know something about art."
"Do you know the west is very young?" was the retort. "Let me add the west is also very broad and pro-gressive. Her day will come. Did you ever stop to think about these 'older ones,' you speak of? Let me tell you something. Had these 'older ones' given their younger days to art --that is your kind of art--you would no doubt have found but the arid plain, with not so much as a tent for your studio."

A. C. NELSON'S REPORT.

State Superintendent of Public Instruction on High Schools of Utah.

Apropos of the discussion of the sit-Apropos of the discussion of the sit-uation with respect to high schools, by the legislature and others, and the standing of the public school in regard to teachers, a few extracts from the re-port to the governor of A. C. Nelson state supprintendent of public instruc-tion are appended. Supt. Nelson says there are public high schools situated at the following named places in the state giving from a one year's to a four year's course of instruction: Rich-mond, Smithfield, Brigham City, Wil-Bountiful, Park City, Tocele City, Grantsville, Satt Lake City, Forest Dale, Mill Creek, Granger, West Jor dan, Bingham, Draper, Lehl, American Fork, Pleasant Grove, Spanish Fork, Springville, Payson, Mantt, Sallas, Richfield, Ferron, Moab, Neph, Eureka Fillmore and St. George. "Most of the high schools," the report to the cities in which they are situated. Among these is the building st Manti school purposes and which add beauty to the cities in which they are situated. Among these is the building at Manti erected at a cost of almost \$21,000, a similar structure at Richfield, and a. "From an economic point of view, nu-merous and efficient high schools are greatly to be desired. Recent statistics show that in a country such as ours the chances to achieve success and dis-tinction are: Uneducated, one in 150. 000; with common school education, one in 40.000; with a high school education one in 1,700. It can be shown that, in the aggregate, persons who complete eight years' work beyond the grades carry with them more than twice the earning capacity than do those devoid of high school training." Continuing, Prof. Nelson says: "I sincerely hope that, acting on the su-thority conferred on it by the recent constitutional amendment, the legisla-ture will see its way clear to appropri-ate a portion of the state funds for high school purposes. It is to be regretted that the wording of the amendment re-ferred to seems a little ambiguous. It is stated that the legislature may au-thorize the use of state school funds for high school purpose. From this state-ment, it has been argued that whatever much may be appropriated by the legment, it has been argued that whatever funds may be appropriated by the leg-islature to the high schools will necassarily be taken from the funds accru-

ing from the three mill school tax which each legislature since statehood has granted. As a matter of fact, the state school tax is not necessarily three mills. It is whatever the legislature says it shall be. If the legislature shall say that the state school tax for the succeeding biennium shall be three and succeeding biennium shall be three and one-quarter mills, and that one-quarter mill of this amount shall be given to the high schools, then the appropriation the high schools, then the appropriation would come within the meaning of the constitutional amendment, and the high schools would receive funds which they so greatly need to carry on the work which they have so commendably be-gun. To take any part of a state three mill school tax for the support of high schools would be little less than disas-trous, for much as high schools are for trous, for much as high schools are to be desired, they can not for one mo-ment be maintained at the expense of

"In many districts the common schools are without sufficient funds for their work. Public common schools must be maintained: public high schools certainly should be."
