Astronomers report a terrible commotion on the disk of the sun on the 11th, 12th, 13th, and 14th of August last. The whole solar face was disturbed by violent upheavals, and large sun spots appeared and disappeared with great velocity. A marked effect was produced upon the instruments at the various observatories, and the magnetic needle made such variations as to be wholly unreliable.

A coording to the first "slate" is sued, ex-President Grant is to be elevated to a position in the cabinet of Garfield. What with the presidency of a Panama Canal Company, and of a New Mexican Mining Company, and of Secretary of War in the next administration, and of the Republican nomination to the presidency in 1884, the hero of Richmond receives a large share of his countrymen's comment. Wonder what he will do, anyway?

A sad accident occurred in Canada a week or two ago, pathetically described by the Dominion papers The engineer of an express train saw a dog ahead, and commenced whistling to frighten the animal away. It refused to go and remained barking and crouching on the track. It was run over and killed and with it was found the body of a little child who had wandered from home and gone to sleep on the fatal spot. The faithful beast had signalled in vain, and died at his post with his charge.

# PURIFIED BY TRAVEL.

THERE was some controversy a short time ago on the power of running and passing several hours visiting water to purify itself from substances with which it might have be- land and was invited to participate come impregnated, some taking the in a republican demonstration. He ground that the saying "water puri- reviewed a torch light procession and fles itself" is a fallacy. We expressed our opinion in this wise: "In the decisive. He said the weakest part same way that water is cleansed by of our system is the inadequate propassing through a filter, it loses many vision for the declaration of the reimpurities after it is befouled, by a sult of a presidential election. not. The conclusion arrived at is withal. Doing this to the adminis-that the laboratory of nature is suffithat the laboratory of nature is suffi- al act required on his part will be cient to change the noxious sewage cheerfully and gladly done. Exwhen it is exposed by union with running water to the action of the atmosphere. We clip the following from a report on this subject made in Washington, D. C.:

"Opponents of the plan contend that water has no purifying power, no power of aeutralizing sewage; but their theories are controverted by the stubborn logic of facts. Water does purify itself and in a swater does purify itself, and in a marvel-ously short space of time. Whether it destroys the impurities contained in it, or exposes them to destruction by the oxygen it contains or by ani-mal and vegetable organisms, it is none the less the powerful agent of purification. This is too well movement of the Northern men, and to who-ever is a citizen of the United States. I thank you for your hearing." President Hayes was followed by Hon. Stanley Matthews; after whose speech the crowd dispersed. Still Lower. none the less the powerful agent of purification. This is too well known to require argument, in the case of running water, but I have seen it stated that the water of the Thames, off London, is shipped for drinking S1.80, former rate \$10. There is a Water for long voyages, and while barreled up destroys the impurities contained in it, and becomes aweet and clear." Facts are said to be "stubborn things." They are at any rate strong-er than theories, and it is pleasanter

er than theories, and it is pleasanter to think that water, which, on its way from the mountains to our door yards, is liable to receive deposits of substances which we would not volsubstances which we would not vol-untarily choose to be mixed with our beverages, can and does purify itself on its journey, and is not necessarily nasty or injurious because of disa-greeable and unclean associations by the way. the way.
