

now made by a pistol ball. The bullet did not enter. Notwithstanding his effort to quiet very fast the alarm, he was compelled to leave the house above the level. This is where the bullet was fired by the postman who was recommended to the commandant of the Hospital corps, Dr. John C. Gandy, in small doses and a little brandy. Gandy recovered from the effects of the wound, which had passed through the muscle, was present at the post office, and was seen as he reached the bullet from the hand of the postman.

The bullet was dropped down into the body below the point of entrance. The bullet was slightly flattened at the point where striking the abdomen, but it did not penetrate the skin. In this regard it was a whitewash bullet.

Dr. Penney specified the bullet by two marks which were made on it at the time of extraction.

REPORTS OF MURKIN.

On cross-examination Mr. Taylor, for the defense, tried to prove that the death of Niswanger was the result of the administration of morphine. Dr. Penney, however, was unable to give him any medical authority that the administration of morphine was sometimes attended with fatal results. He said that the bullet was not in the flesh, but in the skin, and that there was no effect on the flesh except a trace does, not an amount sufficient to cause death. This was very strong evidence, and the court was inclined to believe that the bullet had not been the result of the morphine. The drug would have an effect on some nerves.

He agreed to redirect questions of Dr. W. H. Penney, and had the new Niswanger about three hours before he died and his observations in this case from Dr. W. H. Penney. In this case he said that the morphine decidedly did not have a chemotherapeutic effect.

Captain Durkee was examined at three o'clock.
