FORTY-SIXTH CONGRESS.

CONGRESSIONAL.

SENATE.

WASHINGTON, 13.—A communication of the Secretary of the Interior recommending the deficiency appropriation of $58,000 for the salaries and commissions of registers and receivers of land offices was referred.

Voorhees submitted a resolution asking the Secretary of the Interior for the names of all land grant railroads, particulars as to the amounts of land owned and earned by each, and also the amounts claimed but not earned, together with other facts, adopted.

The morning hour expired and the Kellogg resolutions came up, and Hampton spoke thereon. He went on to argue that the case was adjudicated and forever settled, and the accession of another party could not change the status. If reheard now the case might be reheard again and again. All his sympathies were with the contestant. He dared not enter into the political questions involved, but the Senate had no power to redress the Louisiana wrongs. He referred to the republicans of the Senate, who sacrificed their own feelings to seat him (Hampton). He referred to his military services in his own State and by implication asserted that it needed no defense from Hill; he could guard his own honor. He would follow his convictions of duty and right regardless of consequences. Adjourned.

HOUSE.

WASHINGTON, 13.—Sanford submitted an amendment to the appropriation bill reducing the President's salary to $25,000; rejected by 75 to 25.

Springer contended that many Venezuelan claims were dishonest, and criticised the action of Orth in acting as attorney for claimants.

Townshend claimed the privilege of introducing a number of petitions for free salt. The Speaker ruled them out.

Cobb introduced a bill appropriating $9,000,000 for deficiencies in pensions of the present fiscal year. There was an angry colloquy between Cobb and Blackburn as to whether the committee on appropriations had directed this bill reported. The bill was referred back.

Monroe explained his position as to the report on the Venezuelan claims.

The Speaker announced the appointment of Culbertson in place of Regan, as a member of the committee to investigate alleged corruption in the election case of Donnelly vs. Washburne.

The House then went into committee of the whole on the legislative bill. The reading of the bill was not interrupted until the clauses were reached relating to the office of Commissioner of Internal Revenue.

AMERICAN.

COMMITTEE RECOMMENDATIONS.

The Mining Bill—Report on Arid Lands—No Cheap Overland Australian Mails—A Navy Yard on the Northwest Coast, Etc.

WASHINGTON, D. C., 13.—The Senate committee on Indian affairs heard the Secretary of the Interior and the chief clerk of the Indian Bureau in advocacy of the prompt enactment of legislation to provide for the opening up of a portion of the Crow (Montana) reservation, which contains mineral lands and for settling the Crows upon the remainder in severalty. It is proposed to reimburse the Indians for their contemplated cession of the tract in question (comprising one and a half million acres) by the annual payment of $30,000 in money or its equivalent in live stock, agricultural implements, etc., during a period of 25 years.

The Senate, in executive session, resumed consideration of the nomination of Robert M. Wallace for reappointment as United States Marshal of South Carolina; his confirmation was earnestly opposed by the South Carolina senators and rejected by a party vote.

The House mining committee today adopted the bill which was agreed upon by the Pacific Coast delegation last Thursday evening, then fully telegraphed in these dispatches, the purpose of which is to provide for the location of flat lodes and exempt from the square location system all veins having a greater dip than 25 degrees. Representative Belford was authorized to report it for passage by a practically unanimous vote of the committee, Warner, of Ohio, being the only member present who refused his concurrence. He took the ground that the passage of this bill will have the effect of preventing action upon any other branch of the public land commission's mining bill, and he is doubtless correct in this view, it being in fact the intention of the framers of this measure, to regard it as a substitute for the whole of the recommendations made by that commission in regard to mineral lands and mining laws.

The full House Committee on Agriculture, to-day, recommend an appropriation of $3,000 for the collection and dissemination of information relative to the agriculture in the arid regions of the United States. This is Horace Davis' proposition with the phraseology so changed as to divest the appropriation of an appearance of sectionalism, by basing it upon a fact of nature. The term "arid," as used in this sense, has been made familiar by Powell's reports, as descriptive of all that region west of the 100th meridian, where the year is divided simply into two seasons, the rainy and the dry, except the coast of Oregon and Washington Territory.

The Senate committee on appropriations in reporting the postal appropriation bill have stricken out Horace Davis' amendment providing for the remission of heavy extra charges against the Australian colonies for overland transportation of their mails, but Booth and Farley will endeavor to have the clause restored in the Senate. Blackfan, United States superintendent of foreign mails, volunteered an appearance before the Senate committee to oppose their proposition, and this official remonstrance settled its fate in the committee. The animus of the opposition appears to be simply that our postal authorities insisted at the Paris convention upon being allowed the power to make the present charge, and that they wish to continue it both as a means of helping to swell the department revenue and as a matter of consistency and private opinion.

The House naval affairs committee to-day agreed to recommend the passage of Representative Whittaker's joint resolution authorizing the Secretary of the Navy to appoint a commission to investigate and report as to the desirability and expediency of establishing a navy yard on the Northwest coast. Chairman Whitthorne has prepared a brief written report in advocacy of the proposed action, setting forth what the growth and importance of commerce and magnitude of the national interests to be subserved by it. The commission are of course to designate what point on the coasts of Oregon or Washington is most suitable.

Senator Farley to-day introduced a bill to authorize the Roman Catholic bishops of California to sell the College Ranch in Santa Barbara County and apply the proceeds to the maintenance of one or more seminary colleges elsewhere. It appears that the lands referred to were granted to Bishop Alemany and his successors by United States patent in pursuance of a decree of the land commission in trust for the religious purposes and uses to which they have heretofore been appropriated, but it is now found that they are not suitably located for these purposes, and an act of Congress is considered necessary to discharge them from the trust.

MORE CAPITAL ITEMS.

Sherman's N. P. R. R. Report—Education Bill—Date for Adjournment, Etc.

WASHINGTON, 12.—Gen. Sherman's report to the House committee on Pacific railroads in regard to the Northern Pacific route, says: In military affairs the extension of this railroad from Bismarck to the Yellowstone and up the valley of the river as far as the mouth of the Big Horn, it will be beyond any estimate of advantage the Quartermaster General may make, because this railroad will transport men and supplies for 10 if not 12 months in the year while the Missouri River and Yellowstone are barely navigable for light draft steamers for two or at most three months in the year. The extension of the road will stimulate emigrants to occupy the line of the Yellowstone east and west to such extent as to form a barrier to nomadic Indians who have heretofore gone back and forth from the Sioux reservation on the south, to the British territory on the north, and will enable us in a very few years to give up forts Keogh and Custer, each requiring for garrison a full regiment of infantry and four companies of cavalry. These could then be moved north to the British line, our permanent frontier. By this process we divide the hostile Sioux and can subdue either moiety with more certainty and much less cost than now. The committee will meet to-morrow, and it is expected they will agree to report favorably on the bill introduced.

Next Saturday evening has been assigned by the House of Representatives for the consideration of bills reported by the committee on education and labor. The members of that committee held a conference to-day for the purpose of determining the order in which its various measures shall be called up from the calendar for action. In case the committee actually obtains the day, it being well understood that all special assignments of this sort are liable to be set aside towards the close of the session in favor of appropriation bills, etc. The committee after some discussion decided that it would be impracticable or worse than useless to attempt to pass the Chinese immigration bill at the present time, in view of the recent appointment of the commission to negotiate a treaty on that subject, and it was therefore arranged that if the committee obtains the floor on Saturday, the House shall be asked to make the fifteen passenger bill a special order for the first Tuesday of next December.

Secretary Evarts will transmit to the House to-morrow the correspondence with the British government relating to the Fortune Bay outrage, accompanied by a letter taking a bold stand in favor of legislative action regarding our fishing interests. It is believed he will favor a resolution of duty on fish as the only means by which the Canadians can be brought to their senses in regard to the rights of American fishermen under the provision of the treaty of Washington.

The clerk of Senator Voorhees, of the exodus committee, left for Georgia a few days ago, carrying away all the papers belonging to the committee, and Senator Voorhees has started a deputy sergeant-at-arms after him to obtain the papers if possible.

Colonel Keogh, Secretary of the national republican committee, left for Chicago to-day, where he will open an office on Tuesday next to furnish information to delegates and others.

The committee on ways and means have fixed upon May 21st for the adjournment of Congress.

The Secretary of War transmitted to-day to the chairman of the House committee on Pacific railroads a report from Gen. W. T. Sherman upon the military advantages of the Northern Pacific Railroad, in which he advocates an extension of the road.

A Dastardly Deed.

NEW YORK, 13.—A dastardly attempt was made to-day by some party or parties unknown, to kill the Spanish General Hypolite Duriante, by means of an infernal machine in a package concealed among his letters. It was about eight inches long and three wide, done up in a brown paper box. He used his pen-knife to open it, and immediately on taking the cover off the box there was a loud explosion and some balls of fire shot out of the box burning the Consul's coat and scorching his hands, but otherwise doing no further damage. Examination of the box showed its purpose was to kill the persons who opened it. Inside of it was a quantity of gun powder, a large percussion cap, and what is supposed to be nitro-glycerine. It was post-marked Philadelphia. Private detectives have been set to work. The Consul General has no idea as to who sent him the deadly package, but surmised it was a Cuban plot to destroy the life of the Spanish official.

Stock Market.

To-morrow the *World* will say of to-day's mining market that the volume of sales at the Mining Stock Exchange was small, the transactions amounting to 33,485 shares. The closing prices show a decline for almost the entire list, although the opinion seems to prevail this afternoon that a change for the better will be experienced, and quotations from San Francisco give cause to believe that at least in stocks influenced by that market an increase of value may be looked for. In the face of such quotations, however, these very stocks have been lower to-day, and some of them close with considerable loss.

Denis' Sympathizers.

An indignation meeting protesting against the confinement of Denis Kearney in California, was held here to-night by the English speaking section of Socialistic labor party. Addresses were made denouncing the sentence and a resolution passed sympathizing with the prisoner. Subscriptions will be taken up to pay the fine of $1,000 imposed on Kearney.

Violating Law.

United States Commissioner Shields has issued warrants for the arrest of fourteen captains of Atlantic steamers who are charged with carrying more passengers in their vessels than the law allows.

Burning Oil.

Oil City dispatches say two tide water tanks containing 36,000 barrels of oil are burning. Three have been destroyed.

A Blazing Almshouse.

ALLENTOWN, Pa., 13.—The Hospital and stables of the Carbon County Almshouse were destroyed by fire last night. Nine horses and 24 head of cattle and 40 hogs were burned.

Disastrous Forest Fires.

TOBYHANNA MILLS, Pa., 13.—This village is almost entirely surrounded by forest fires which are extending through Monroe and Pike County. Large quantities of bark and hemlock and spruce logs are burned and the fires are threatening the destruction of all the bark and logs in the woods. The Tobyhanna and Lehigh Lumber Co. are the principal sufferers.

Now We are Relieved.

CHICAGO, 13.—The *Inter-Ocean's* Washington special says: President Hayes being asked to-day to consider himself a dark horse emphatically declared it was impossible. If a second term was tendered him on a silver platter he would not take it. It is supposed that Sherman is his favorite candidate, although he is discreetly silent and has used no federal patronage to aid him.

Senatorial Weeps.

Senator Jones, of Nevada, had a dispatch that the delegates to Chicago from that State have been instructed for Blaine. He and Senator Conkling had quite a little intermingling of tears over the news.

The Walking Champions.

A London dispatch says: Rowell offers to compete with any American walker for £500 to £1,000 a side, but says the international between Brown and himself and Hart and Dobler cannot be arranged at present, as Brown's backers are unable to leave England. He invites Hart, Dobler and others to England.

Amateur Actresses Burned.

ATLANTA, 13.—At an amateur performance this p.m., three young ladies were severely burned by their clothes catching fire.

The Whittaker Case.

WEST POINT, 13.—Prof. Greener, Whittaker's friend, submitted to Southworth, the writing expert, several questions as to whether recorder Sears had biased his mind by showing him certain alleged facsimiliars in the New York *Herald*. Southworth acknowledged he had been shown the *Herald*, but was not prejudiced thereby. Sears says the court hopes to close this week and will fix on the identity of the writer of the letter. The report may be eventually reviewed by the War Department.

Some Fires.

HUDSON, 13.—The village of Stuyvesant, 11 miles north of this city, was destroyed by fire this morning, involving a loss of over $200,000. The fire caught in the storehouse of the New York and Catskill Steamship Company. Among the buildings burned are the postoffice, the house of the New Jersey Ice Company, railroad depot, Clapp's Hotel, Stuyvesant iron foundry, St. Mary's Church, and all the buildings on both sides of the railroad track, covering a radius of over a square mile. Among the fine buildings destroyed is that of Senator Wendover. A tramp, giving the name of James Smith, was arrested, charged with causing the fire.

The foundry and railway buildings, large ice house, stores, etc., at Sturtevant, are burning. The Hudson River railroad track is blocked with the ruins of the fire and the rails are warped. Trains are stopped on each side of the fire. The wires are also down.

Forest fires on the Pocono Mountains, on the line of the Delaware and Lackawanna Railroad, cover an area of twenty miles. Over 1,000,000 feet of lumber is already destroyed at Toby.

Edward Renseman was killed and five others injured by the explosion of the Mahoning Powder Mill, near Ashland, this morning.

THE NEW LIGHT WEIGHT WATER PIPE!

Fig. 1.

Fig. 2.

Is Superior for Hydraulic Mining, City Water Works, and all other purposes for which iron or wood is used to any pipe now manufactured. It combines

LIGHTNESS WITH STRENGTH

(Being from ¼ to ⅓ the weight of iron,) and

CHEAPNESS WITH DURABILITY.

Is Made of the Best Oregon Pine, and is spirally Bound with Wrought Iron of Suitable Strength to Sustain any Required Pressure. The whole Exterior is Completely Protected from Rust or Decay by a Thick Coating of Asphaltum, while the Interior being Constantly in contact with the water

WILL LAST FOR 50 YEARS.

It is from 50 to 75 per cent. Cheaper than the Iron Pipe, and will sustain a gravity head of 700 feet, or over 300 pounds pressure to the square inch.

It is already in use in many of the leading Cities of the Pacific Coast, and is rapidly taking the place of iron pipe along the lines of Western Railroads. It is used for Gas, Oil and Water. For full particulars, prices, Etc., address,
