WEBER POWER DAM.

There is a force of men camped in Weber canyon near Devil's Gate who are at work on the big dam planned by C. K. Bannister to utilize the waters of Weber river to generate electric power at a power house to be located about Pacific bridge, and on the Davis county side. The work is being done by the Utah Construction company, preserving the title to the site and to the water for power purposes, but also to get actual construction work under

way, Mr. Bannister planned the work Mr. Bannister planned the work about a year ago and one of the chief advantages of the locality is that the full capacity of the river water, power could be generated without in any way interfering with any irriga-tion rights, as all the canals head be-low the proposed power house.
