Artistic designs in dinner rings worn on the thumb reach from one knuckle to the other, and are set with blazing gems of all kinds. It is really a passion nowadays to possess imita-tion jewels. And it does not indicate, by any means, that small sums are put into these baubles.

> It is a question whether or not it is a wise practise to drink a cupful of hot water immediately upon arising every morning. The hot water fiends fancy that they cannot live without their morning drink, but there are their morning drink, but there are physicians who claim that the practise is delibitating to the stomach, and that it cannot fail to do injury. The habitual use of cold water is an excel-lent habit to form. It is natural to drink cold water. Cold water is a tonic to the stomach, as it is to the skin. It gives tonicity to the mucous walls of the stomach and increases the functional ability of the stomach in every way. The practise of taking five or six glasses of cold water a five or six glasses of cold water a day is a good one. It will clear the complexion, brighten the eyes, and is almost a sure remedy for puffiness under the eyes.

tired, emaclated woman needs plenty of food and plenty of sleep, while her more robust sister probably needs plenty of work and exercise, and less food and less sleep. There is such a thing as eating and sleeping one's life away. Slender, high-strung women are usually extremely active, mentally as well as bodily. They think and eat quickly. This uses up their strength, and they need nourishing food and absolute relaxation to restore them to the normal condition. There's no doubt that a quiet temperament, self-control and patience will keep one in a healthy condition. Every fretter must soon become a dyspeptic. Worry has a certain effect upon the appetite, irritating the sympathetic nerves of the stomach. Eight hours' sleep will do for many individuals, but some men and women need more sleep than that.
