Mr. Butler said he would rather see the ship subsidy bill become a law than o have the pending bill pass containing the present provision for railway mail pay as under the pending appropriation bill a bigger hole would be made in the treasury than would be made by the subsidy bill. Mr. Butler pointed out that accord-

Mr. Butler pointed out that accord-ing to the report of Prof. Adams, the expert of the postal commission, which he was having read, 48 per cent of the amount paid to the railroads for car-rying the mails actually was paid for carrying mail pouches. He had often wondered, he said, why the leather and

the locks in the mails were so heavy. "It seems,' he said, "that the railroads have used their influence to have them made heavy because they are getting the same pay for carrying them as they are getting for carrying mail matter."

He thought there would be just as much sense in charging the weight of

the car against the government. The amendment offered by Mr. Butler to the postoffice appropriation bill to reduce the pay to railways for carrying the mall about 9 per cent was voted down by a vote of 18 to 51.

The pneumatic tube amendment has een ruled out of the post office appropriation bill on a point of order.
