MINING, BUSINESS AND STOCKS.

MARKET HAS BETTER TONE

Con. Mercur Shows Indications of An Advance.

STAR CON. MUCH STRONGER.

Daly-West Opened at $43.50 and Weakened—Sale of Silver King—Quotations and Sales.

The week opened with the sale of 21,390 shares of stocks this forenoon, for which was checked out the sum of $27,658.25.

In some respects the tone of the market was improved over Saturday's close. Consolidated Mercur is stiffening up and sold at $1.29 and $1.30. Daly-West opened at $43.50, but weakened, closing at $42.75 bid and $43 asked. Lower Mammoth began selling at 97 cents and stiffened to $1, but dropped back to half a cent above the starting point, at the close. On the open board the stock sold down to 96 cents. Carisa offered at 8 cents, was taken.

May Day failed to participate, but was quoted practically unchanged, while Star Consolidated found ready takers at an advance. A 100 share lot of Silver King transferred at $70.50.

The closing quotations of the forenoon were as follows:

KITTY CLOUGH ORE.

Sensational Values Have Been Found In This Property.

All kinds of sensation rock are now coming from the Kitty Clough and there seems to be no end to the sensational performances of this property, says the Milford Times. An average sample from the strike made last week gave assay returns of 26.5 per cent copper, over $16 gold, 34 per cent iron and little silver, the total value of the metals being $90.39. This character of ore is scattered all through a six-foot vein of iron, all of which carries the gold values. A selected sample showed the presence of over 54 per cent copper and Mr. Sawyer, one of the owners, carries in his pockets a button of gold-copper bullion, weighing over an ounce, that was taken from two and a half ounces of ore.

This ore was encountered in the drift run from the 100 foot level, which has gone into the mountain until it is now about 150 feet below the surface. It is the belief that a more compact body of the high grade copper ore will be found at greater depth and a winze is now being sunk for the purpose of getting beneath the iron.

The developments at this property, which is located near the Vicksburg, are attracting much attention and the lucky owners are naturally very much elated.

To-day's Metals:

SILVER, Bar, 52 1-2 cents

LEAD, $3.75.

CASTING COPPER, 13 5-8 cents a lb.

NEW YORK METAL PRICES

Copper, quiet, 14.00.

UTAH'S FIRST METAL MINE

Will be Sold at Sheriff's Sale on July 6th Next.

PROPERTY IN BEAVER CO.

A Mortgage of $50,000 Ordered Foreclosed—Incompetency Displayed by Illinois Syndicate Not Long Ago.

The first metal mine discovered in Utah is to be sold at sheriff's sale on July 6 next. An order to this effect was made a few days ago at Beaver, by Judge Marioneaux, in the case of Frank Frorer vs Rollins Mining Co. The suit was in the nature of proceedings to foreclose a mortgage of $50,000. A Mrs. Angle, of Chicago, who claimed a one-fifth interest in the mine, appeared as intervenor. After listening to the evidence and arguments in the case the court rendered judgment in favor of the plaintiff for $50,000 as principal, $7,000 interest, $600 attorney's fees and $136 costs; at the same time fixing the day of sale.

The Rollins mine is located in the Lincoln mining district about midway between Milford and Beaver, and is said to contain some very rich ore bodies. But the mine has undergone a series of misfortunes in the past and was never operated in a businesslike or systematic manner.

The lower workings contain a great quantity of water and in order to cope with this disturbing element, powerful pumps will be required.

The latest failure in connection with the Rollins property took place a few years ago, when a syndicate of Illinois citizens bonded the property. After spending something over $75,000, the undertaking was abandoned. A worse display of ignorance was never perpetrated upon a mining camp anywhere. Instead of employing capable, experienced men to conduct the work, the position of general manager was given into the hands of men who did not know the first rudiments of mining. The display of incompetency was something fearful.

Several thousand dollars was expended in the purchase of machinery; the management succeeded in "burying" several sinking pumps in the shaft, while making an effort to unwater the mine.

It is said that in all probability the mine will be bid in by the plaintiff and that in the course of a little time another effort to operate it will be made again.

IN STATELINE CAMP.

A 90-foot Ledge Discovered on the Atlas Property.

Geo. F. Buel and George Tyron have something in the way of a mine that few in this section can boast of, says the Oracle. On the Atlas property about a mile and a half from town they have a 50 foot shaft sunk and drifts run off east and west. The ledge on that property is 90 feet in width and the average assays are $4 to the ton in gold and one or two ounces silver. The vein shows every indication of growing richer at a depth, but even though it did not, with such an immense body of ore and considering the cheapness of the extraction of ores at this day and age, the gentlemen certainly have a bonanza and some time soon they are going to realize handsomely on that piece of property.

SIX FEET OF ORE.

New Ore Body Opened on Third Level of Utah Mine.

The local officials of the Utah mine are in receipt of information from that Fish Springs property today to the effect that a new ore body, measuring 6 feet in width, has been encountered on the third level. While assay returns are lacking, Secy. Weller says the new find undoubtedly carries shipping values.

The next mail will bring the result of a fire tests made since the communication received here today was mailed.

MAY DAY JIGS.

Manager Snow in Camp to See Them Started.

Manager Alviras E. Snow, of the May Day Mining company is in Tintic today for the purpose of seeing the new jigging plant go into commission.

Manager Snow expects to have a shipment of concentrates in market the latter part of the week.

Local shareholders are awaiting results with the deepest interest and there seems to be a unanimity of opinion that the plant will solve the problem of handling profitably the vast bodies of low grade ores in the mines.

GALENA SHIPMENT.

High Grade Ore Being Extracted at Deep Creek Mine.

Harry Joseph returned yesterday from a trip to the Galena mine at Fish Springs. He came back well pleased with conditions at that property and says that a shipment of ore will soon reach the market.

Some very fine ore is being hoisted and the new hoist recently installed is running smoothly.

Do You Enjoy What You Eat?

You can eat whatever and whenever you like if you take Kodol. By the use of this remedy disordered digestion and diseased stomachs are so completely restored to health, and the full performance of their functions naturally, that such foods as would tie one into a double-bow-knot are eaten without even a "rumbling" and with a positive pleasure and enjoyment. And what is more—these foods are assimilated and transformed into the kind of nutriment that is appropriated by the blood and tissues.

Kodol is the only digestant or combination of digestants that will digest all classes of food. In addition to this fact, it contains, in assimilative form, the greatest known tonic and reconstructive properties.

Kodol cures indigestion, dyspepsia and all disorders arising therefrom.

Kodol Digests What You Eat
Makes the Stomach Sweet.

Bottles only. Regular size, $1.00, holding 2½ times the trial size, which sells for 50 cents.

Prepared by E. C. DeWITT & CO., Chicago, Ill.

Sold by All Druggists.

INVOLVES SUM OF $800,000

The Transfer of DeLamar-Wall Group Complete.

MAGNITUDE OF ORE BODIES

Site for 500-Ton Concentrator Selected—Will be in Bingham—Work To be Pushed.

The great territory at Bingham known as the De Lamar-Wall group, is now under the control of the Utah Copper company. Final details were arranged late Saturday and Col. E. A. Wall pulled down the first payment of $50,000. The total sum involved in the transfer, it is said, aggregates $800,000 and the colonel still retains a one-fifth interest.

The gentlemen representing the purchasing company, who have been here for the past week for the purpose of bringing the negotiations to a close, visited the ground yesterday and decided upon the location for the initial concentrating plant which will start out with equipment sufficient to handle 500 tons of ore per day. The spot selected is at a convenient point along the line of the Copper Belt railway, at the lower end of the property. The plans for the concentrator will be drawn without delay. The construction department will be in charge of Mr. D. C. Jackling, who has instructions to proceed with as much haste as possible. The Utah company will open a suite of office rooms in a few days.

Although a youngster, the Utah Copper company will at once rank among the first mining institutions of the state. The importance of its domains is not fully appreciated by many, but when it is considered that a conservative estimate places the amount of ore blocked out about the 500 level at about 15,000,000 tons, something of its magnitude can be realized. These figures seem enormous, yet they cover an area of something over 200 acres developed to a depth of 500 feet. In the mine has been done over 4,000 feet of development work. Ten tunnels have been run, the shortest being at least 300 feet in length. To still further determine the extent of the ore measures drill holes have been sunk below the lower tunnel level several hundred feet.

Col. Wall estimates that these enormous bodies of ore carry a gross value of $8 to the ton, and that 80 per cent of the values will be saved in concentration, or a little over $5.50 per ton. The copper values will average about 2¼ per cent. Col. Wall declares that the expense of mining and milling will not exceed 60 cents per ton.

The concentrates from the mill will be delivered to the Rio Grande in lower Bingham over the Copper Belt railway for shipment to the valley smelters.

Utah Con. Smelter.

George K. Fischer, mechanical engineer for the Utah Consolidated Mining company, placed the plans for the proposed enlargement of the smelter at Murray, before Manager Channing today for his approval.

Park City Shipments.

A total of 3,649,000 pounds of ore was the extent of the shipments from Park City last week, as reported by the Macintosh sampler, the shippers being the Comstock, 33,000 pounds; Daly-West, 1,974,000 pounds; Silver King, 1,642,000 pounds.

MINING CONCENTRATES.

The metal market is quoted lower today.

Five cars of Ophir Hill concentrates came in today.

E. W. Young returned from a pilgrimage to Milford yesterday.

John Dern, president of the Con. Mercur, is in Tintic today.

Taylor & Brunton receipted for 12 cars of ore today; five from Stockton and seven from Tintic.

Duncan McVichie, manager of the Bingham Con., is expected to return from the east this week.

The Amethyst and Wild Irish properties at Pikes Diggings, Nev., may be taken in hand by the Royal company.

President A. B. Lewis of the Royal Gold and Copper Co., is expected home from the east the latter part of this week.

Clarence K. McCornick, who is heavily interested in the Gold Roads mine at Kingman, Ariona, has returned from a trip to California.

The difficulty of getting prompt deliveries of lumber may interfere with the rapid construction of the Yampa smelting works at Bingham.

On account of a lack of a quorum the annual stockholders' meeting of the Comstock Mining Co., called for last Saturday afternoon an indefinite postponement was taken.

Herman W. Horne returned last night from Beaver county, where he completed the final survey of the Ole Tipe claim, owned by the Skylark Copper Mining company, for patent.

The Uncle Sam Con. Mining company is still waiting for Philo T. Farnsworth, manager of the Bullion-Beck & Champion mine to sign a contract to furnish water for the proposed concentrating plant.

The transfer books of the Con. Mercur Gold Mines Co. close tomorrow. Only shareholders of record at that time will be permitted to participate in the annual meeting to be held in New Jersey on July 6.

Joseph T. Kescel, who has left the Sheba mill of Humboldt county, Nevada, has arrived in the city. He will take up the duties of his new position at the Keith-Kearns property at Park City at once.

Geo. Teasdale returned from a short visit to Salt Lake and when he went out to the mine was accompanied by a couple of four-horse freight teams which are now on the road hauling ore to Modena, from whence it will be shipped to Salt Lake to be treated. They expect to keep the teams on the road constantly henceforth.—Stateline Oracle.

Wm. McHale, the famous prospector of Frisco, announces that he has struck the great Cactus-Comet vein on the east side of the San Francisco range, about 3,000 feet west of the Carbonate & Rattler. He proceeded upon Mr. Pellier's theory that the Cactus-Comet vein was identical with the Carbonate & Rattler and in prospecting across between the two points came upon a 25-foot outcrop of ore greatly resembling that of the Cactus and Comet.—Milford Times.

The Beaver Consolidated shaft has now reached a depth of 400 feet and the flow of water increases. There is no longer any doubt that the workings have gone below water level. This water is heavily impregnated with copper, iron, manganese and other mineral and is unfit for use. Sinking will be continued for another 100 feet, when crosscuts will be run east and west to open up two veins and there will be some interesting developments about that time.—Milford Times.

J. L. Dunn and Tom Wilkinson of the Wild Rose mine, were arrivals yesterday from Pierce. They brought out about $4,000 in bullion. Since the mill run was resumed at the Wild Rose mine a few weeks ago, about 100 tons of ore have been crushed and the returns have reached betwen $9,000 and $10,000, the average being close to $100 a ton. The full importance of this remarkable output is better understood when it is realized that while no ore has yet been stoped below the 40-foot level, $28,000 has been realized by the owners through the operation of a little mill with a capacity of one and one-half tons daily.—Lewiston, Ida., Tribune.

BOYS AND GIRLS AT WORK.

Three Hundred of Them Will Earn Good Money Thinning Beets.

Special Correspondence.

Idaho Falls, Ida., June 3, 1903.—A trip through the beet fields in this section, at the present time, reveals an inspiring sight. The lands of the Snake River valley, to the extent of nearly 5,500 acres are devoted to beet culture for the first time, and standing at an eminence at the site of the sugar factory, which is located as near as possible in the dead center of the beet growing section, one can see on every side as far as the eye can reach, the waving fields of beet tops. The fields are now dotted in every section with workers who are engaged in thinning the beets. Mr. Mark Austin, the local manager, has scoured the country for help, and at the present time there are over 300 boys and girls working in the thinning localities. Their age is from 14 to 15 years, and they obtain for thinning $5 per acre, at which rate they can earn from $1 to $2 per day, according to their industry. All are doing quite well, and the farmers throughout the entire Snake River valley are pleased to have an industry built up in their midst, which will bring them from $20,000 to $25,000 cash, and that from the labor of children, who have hitherto been idle immediately after the close of the school year.

In spite of all that can be done, enough help has not yet been secured, and a few Indians and Japanese have been hired to aid the white labor. This feature of employing the young people in a line of labor easy and profitable for them to perform, is only one of the many boons which the community will receive by the establishment of the sugar factory here.

SPRAYING OF ORCHARDS.

Should be Done at Once, Says County Horticultural Society.

The Salt Lake County Horticultural society held its meeting Saturday afternoon at the city and county building. Mr. J. A. Wright spoke on "Fruit Thinning." In stone fruits the strength of the tree goes to form the pits, and if thinning is neglected, small fruit only will be produced. Large fruit brings better returns and does not robb the tree so much.

A discussion arouse about the appointment of county fruit tree inspectors and the St. Louis exhibits. Messrs. Elliot and Walk were appointed a committee to see the state board of horticulture with a view to co-operate on the St. Louis fruit exhibit.

In regard to spraying it was urged by all members of the society, that spraying for the pear and cherry slug and codling moth and all biting and eating insects should be done at once and continuously.

Meeting adjourned to Saturday, June 20.

TURNED ON THE GAS.

Discovery of a Plot to Fire the St James Hotel.

What is supposed to be an attempt to blow up two rooms in the St. James's hotel and fire the building, was the cause of considerable excitement among the guests of the hotel yesterday morning. At about 11 o'clock gas was detected issuing from a suite of rooms on the second floor, and when the doors were opened the volume of gas was stifling and only needed a lighted cigar to cause a serious explosion and fire the building.

It was discovered that the gas jets in the two rooms had been turned on at full head. Who did it at that time of day and for what purpose is quite a mystery. The rooms are occupied by Mathew Gisborn, a prominent mining man, who has some very valuable papers in his trunk which would prove somewhat of a temptation to some parties in this city who would be very glad to get them out of the way.

Mr. Gisborn was out riding with his attorney yesterday morning and it is believed that some one took advantage of his absence to loot his rooms. The chambermaid cleaned up the rooms about 9 o'clock and she said that the gas jets were all right at that time. It seems very mysterious that both jets should have been turned on in broad daylight, unless there was some ulterior motive on the part of some one, and it is, therefore, believed, that an attempt was made to fire the building.

The Tyfold Collar

The picture shows how the collar is cut out on each side to allow for adjusting a neck tie without springing the collar open. The collar comes close together in front, it keeps the tie in place and you don't see the cut-out part. Besides the tie is retained just over the button, which is also kept out of sight. Your summer comfort will be increased if you wear one, and you'll thank us for the style. Dealers sell them.

PRESSURE PUT ON LEADERS

Union Pacific and Others Lost Two Points.

HEAVY SALES AT OPENING.

Buying Orders Did Not Cause Much Recovery—Heavy Declines Made On Dormant Stocks.

New York, June 15.—Sales of stock at the opening and blocks of 1,000 to 3,000 shares of most of the leaders were thrown on the market at declines running from a large fraction to over a point. There were 3,000 shares of Atchison sold at 68⅝ and 69⅛, compared with 69¾ on Saturday. Depressions in London were reflected here. Not much of a recovery was made when the buying orders appeared. Union Pacific, Southern Pacific and Amalgamated fell 1½ or over and a number of stocks lost 2¾ to 3. Before noon Atchison got more than 2 points under Saturday and Reading and Missouri Pacific fell 1½.

Bonds were irregular.

Pressure was more concentrated against a few leaders, notably Union Pacific, Baltimore & Ohio and Amalgamated Copper. Losses in these reached 2 points and some of the other speculative favorites also sold lower than in the morning. Substantial declines on small offerings were made among the dormant stocks. Westinghouse Electric declined 5, Railway Steel Spring preferred 3¾, Sloss-Sheffield 3½, General Electric and North American 2½, and Pressed Steel Car 2. The market was steadier in tone by 1 o'clock, but the demand was light.

The market was intensely dull during the greater part of the afternoon and there was a shading of prices for the less active stocks. Lackawanna and Michigan Central gave way 1½, Wheeling & Lake Erie first preferred, Lake Erie & Western 2 and Kansas & Texas preferred and Delaware & Hudson 2¼. St. Paul sagged to 151 and Atchison's loss reached 2½.

LIVE STOCK.

CHICAGO.

Chicago, June 15.—Cattle—Receipts, 30,000. 10@15 cents lower. Good to prime steers, 4.90@5.50; poor to medium, 4.00@4.80; stockers and feeders, 3.00@4.75; cows, 1.60@4.70; heifers, 2.50@4.85; canners, 1.60@2.80; bulls, 2.50@4.25; calves, 2.50@6.75.

Eggs—Receipts, 12,200 packages. Steady. Western extras, 18½; western seconds and firsts, 15@17.

Sugar—Raw, steady. Fair refining, 3¼; centrifugal, 96 test, 3 19-32; molasses sugar, 2 29-32. Refined steady. Crushed, 5.45; powdered, 4.85; granulated, 4.85.

Coffee—Quiet; No. 7 Rio, 5¼.

KEITH GIVES $5,000.

Mining Man Helps the Y. M. C. A. Building Project.

David Keith has given the Y. M. C. A. building project $5,000, and there remains now $7,000 to be raised, in order to get Mr. Peabody's $25,000. Secy. Cox and the directors of the association are making a gallant struggle to make up the amount, and they are confident of succeeding. It is hoped to raise the $7,000 by tonight; but if this is not entirely done, it is not believed that Mr. Peabody will withdraw his offer.
