

MINING, BUSINESS AND STOCKS.

MAY DAY SELLS AT GOOD FIGURES

Daily-West Closes a Little Stronger on the Market Today.

MAMMOTH IS WEAKENING.

Centennial-Eureka Is Called - Joe Bowers Stronger - Lower Mammoth Advances.

TODAY'S METALS:

SILVER 60%
LEAD \$4.57 1/2
CASTING COPPER 15

While no remarkable changes are chronicled of today's call on the Salt Lake Exchange the prices of some stocks have moved up a few points. Grand Central closes stronger today with 5.50 bid, while Daily West also shows a slight upward movement at 12.15.

May Day appears in good tone at 90, at which price a block of 5,000 changed hands.

In spite of ore which has again entered the workings, Bunker Hill closed weak at 27.

Utah made a transfer at 65, while Dakota did a little business at 7, and Geyser-Marion at 14.

Mercur dropped 50 at 5.25. Joe Bowers was in little better form today at 50. Emerald was handed out at 2.

Midnight Bowers brought 1 1/2, and Bagley was loosened up at 14. Boston and De La Mar went over the counter at 34.

Northern Light touched the 7 mark at the close.

CHANGES WERE NARROW.

Trading Was in Moderate Volume at the Opening Today.

General Upward Movement - Bonds Were Irregular - Live Stock and Produce Improves.

New York, Feb. 1.-Wall Street: Trading was in moderate volume at the outset and changes either way were narrow. The confused opening was immediately supplemented by a general upward movement. Heavy buying of the American car issues advanced them 3 1/2 and 3 points respectively. Kindred properties also worked rapidly upwards. Colorado fuel figuring for 24 and steel and wire ruling within a shade of 59. While the response in the standard stocks was not pronounced, still it was quite general in view of the favorable character of the December earnings of numerous lines. The higher level brought out renewed offerings of the traction. Third Avenue declined 9 points, touching 99. Metropolitan gave way 3 1/2, and sugar dropped 1 1/2. Toward midday Tennessee coal surged up 5 and there was a general rise elsewhere in sympathy. Metropolitan recovering fully. Most of the bonds tended upward, but there were many exceptions elsewhere, which imparted an irregular tone to the market.

SUGAR.

Sugar-Raw strong, fair; refining, 4 cent. 1/2, 96 test, 4 1/2-16; molasses sugar, 2 1/2. Refined firm.

MONEY AND BONDS.

SAN FRANCISCO MARKET.

San Francisco, Jan. 31.-Wheat firm; May, 10 1/4 @ 10 1/2; Dec, 10 1/4 @ 10 1/2. No sales of barley; cash barley, 75c.

BOSTON WOOL MARKET.

Boston, Jan. 31.-The American Wool and Cotton Reporter will say tomorrow: "Several of the large consumers of wool have been in the market during the past week, and they have purchased about all the medium and low wools, especially quarter-bloods, which they could get at a reasonable price-especially fleeces."

As a result of the almost unprecedented demand for such wools, stocks of that grade in this market must be reduced to a pretty low point, but there are foreign stocks of the same grade on the way to this country which will fill up the gap, and it is needless to say that there are more obtainable, as outside of the United States supplies of such wools are plentiful.

"The wools are firm but quiet. Prices generally are steady and as high as they have been at any time, and the prevailing feeling in the trade is one of confidence and strength. Holders of wool will not provide, and consumers have to pay full prices when they purchase."

"The sales of the week in Boston amounted to 4,204,000 pounds domestic and 250,000 pounds foreign, making a total of 4,454,000 pounds for the previous week and a total of 4,655,000 pounds for the corresponding week last year."

"The sales since January 1st amount to 17,809,000 pounds, against 17,832,000 pounds for the corresponding time last year."

THE DALY-WEST PAYS DIVIDEND.

One of 25 Cents a Share Payable on 17th Inst.

BIG CAVE IN THE MAMMOTH

Roasters for the Sacramento-Samples from Bunker Hill-Silver Shield Assessment.

The directors of the Daly-West Mining company met this afternoon at the office on South Temple street and declared the monthly dividend of 25 cents a share, payable on the 17th inst. The books will close on the 14th inst. and open again on the 20th. The reason for the payment of the dividend on the 17th of the month is that the annual meeting is booked for the 19th inst.

The dividends for the past month amounted to \$254,500, which is no doubt greater than that which will be paid out this month, as, besides the Mammoth, the quarterly dividends of the Mercur and Ontario will not be in evidence. There is said to be a probability that Grand Central will hand out a dividend this month.

CAVE IN MAMMOTH.

Occurred Between the 1300 and 1000-foot Levels-One Man Hurt.

A telephone message from Tintic today conveyed the news of a big cave-in in the Mammoth mine. It is believed that only one man was hurt, his leg being broken. The cave occurred in some old workings between the 1300 and 1000 levels. It is said by a man who is thoroughly conversant with the property that the place where the cave occurred has been used as a dump for waste during the past two years. No one worth speaking of has been taken out of the place during that time. The extent of the cave-in is said to be about 100 feet long by 50 feet wide and is stated to be above from the 1300 to the 1000 level. The assurance is given out that it will not interfere in the least with the successful working of the mine.

THE SACRAMENTO MINE.

Examinations Have Been Made With View of Putting in Roasters.

The matter has been mooted for some time past, but it now seems to be an almost settled fact that the Sacramento of Mercur will have a roasting plant installed before many moons. Messrs. Bothwell and Conough have spent several days at the mine this week and it is stated that part of the time was spent in making an examination of the wonderfully successful roasting plant at Captain De La Mar's Golden Gate mill. It has not yet been fully decided what course the company will adopt, but it is known that some of the heaviest stockholders favor the installation of a roasting plant as soon as possible. If this is done the Sacramento will likely keep out of the dividend list for a few months longer, as the roasters will cost well on to \$50,000. The mine contains a great deal of base ore and as it is reported to show higher gold values than any of the oxidized ore, it would appear that the long run roasting plant will greatly increase the earning capacity of the mine.

SAMPLES OF GOOD ORE.

Bunker Hill of Stockton Shows Good Ore in Four Places.

Very encouraging conditions are said to exist in the Bunker Hill of Stockton, by parties who secured the following assays today from ore taken from four different places on the vein. A three-foot vein of ore is reported in a drift from the incline shaft about 150 feet below the ore body from which the assays were taken. The ore was recently shipped. Samples taken from the strike show 26 per cent lead, three ounces silver and 3 1/2 in gold per ton. Some iron ore is also found, which shows 25 per cent lead and over 3 ounces silver. Several inches of copper ore is reported, which will assay over 13 per cent. In addition to the above ore exposures, the company has now a nice body of galena, which shows 75 per cent lead, 34 ounces silver and 1 1/2 in gold per ton. Some carbonate also exists, which shows 67 per cent lead, with 13 ounces silver and some gold. The appearance of the property is said to be better than ever and early shipments are promised.

SILVER SHIELD ASSESSMENT.

Stockholders Reminded that the Ninth Payment of \$6,000 is Due.

Under date of Feb. 1st, a letter is being addressed to the stockholders of the Silver Shield Mining company which says:

"The ninth installment of two cents per share on the stock subscribed for by you in this company, will be due on the 1st of February, leaving but a single payment to be made a month later to complete the purchase price of the property."

The company has just marketed a three-car lot (60 tons dry) of first-class ore, netting \$70 per car over all expenses. Two cars more of first-class and three of concentrates are now on the way to market. All of this output comes from the one level now being worked. A committee of the board have just returned from a visit to the mine, where they arranged for an immediate resumption of sinking on the wino, with a view to opening up another level when the property being paid for, and without any indebtedness-the accumulation of a surplus will be in order."

It was hoped at one time that the property might be made to pay the last assessment of 2 cents a share or \$6,000, which becomes due next month. In spite of the fact that the property is looking very well, this is now seen to be impossible.

IRON COUNTY LEASE

Calls for the Payment of \$15,000 Today-May Grant Extension.

Up to press time no word had been received by Colonel Miller regarding the payment of the twenty-year lease on ten claims of the Miller-Deer-Larch coal and iron property in Iron county, which falls due today. A small payment was made some time ago by the Colorado Fuel and Iron Company, but the contract calls for the payment of \$15,000 today. It is thought that the extension of time will be asked for as the Fuel and Iron Company is anxious to secure more property in that section. Then again there is the railroad facil-

ties which, at present, are not very favorable to taking up a vast iron deposit and working it profitably. The company may, therefore, wait if possible until it can find out just what the railroad company intends to do. At present, thirty men are working on the property and it is the intention to secure patents for the whole of the tract owned by the Miller-Deer-Larch party as soon as possible.

THE GOLDEN EAGLE.

Stockholders Meeting to be Called-A Reduction Plant is Needed.

A general meeting of the stockholders of the Golden Eagle Mining company will be called within the next few weeks, at which the condition of the company's affairs will be presented for approval. Such is the statement of the Rev. D. Douglas Wallace, who is secretary and treasurer of the company. Mr. Wallace states that there has been no intention of keeping anything hid. Checks have been issued in payment of all demands against the company and vouchers have been taken. Although, through press of other duties, Mr. Wallace has not kept his books exactly as some other companies do, he avers that everything is in such a shape that with very little arrangement it can be spread before the stockholders in an intelligent manner, which will shortly be done. After this is done, it is more than likely that Mr. Wallace will relinquish the position to some one else, who has more time on his hands. It is only just to Mr. Wallace to state that he considered the manner in which he was approached recently by a few small holders of the stock a little exasperating, and gives that as his reason for resigning them a little curtly. It is believed that the recent squall will clear the atmosphere. There is not a great deal of high grade ore blocked out in the mine, and in the shipment of what there is the expenses eat it up. A great amount of low grade material has opened up and the situation, in the opinion of many stockholders, demands the erection of a reduction plant. It seems certain that returns will never come to the stockholders until a mill is erected. The recent discord may lead to an understanding on this point. Manager Chas. Wilbur arrived in the city yesterday and promises an exhaustive report to the directors within the next few days.

NEW INCORPORATION.

The Mid Vale Will Operate in the Detroit District.

Articles of incorporation of the Mid Vale Mining Company have been filed with the county clerk. The amount of the capital stock of the corporation is placed at \$75,000, divided into 300,000 shares of the par value of 25 cents. The names of the incorporators are: W. A. Ray, George A. Lowe, Lucien A. Ray, A. T. McKane, of Salt Lake City, and A. Mikesell, of Abraham, Millard county, W. A. Ray is president; A. Mikesell, vice president; George A. Lowe, treasurer, and A. T. McKane, secretary.

The company will operate the Tip Top, the Wedge, the Ophir, the Wonder of the Hill, the Lattier, the Copper Chief and the Missing Link mining claims situated in the Detroit mining district, Utah county.

MINING NOTES.

The Conklin sampler reported seven cars of ore today from Tintic.

The Mammoth, of Tintic, had seven cars of ore on the market today.

The Taylor-Bruntson sampler reported four cars of ore from Bingham today.

Harvey J. Jones, of the Conklin sampler office, is visiting the No-Yon-Don't property at Stockton today.

Superintendent George Z. Edwards left today to resume his labors at the Mercur mine.

Manager Geo. H. Dern went out to the Mercur mine today in company with Charles J. Devereaux of Boston.

Four cars of ore were on the market today from the leases on United States property in Bingham.

Glen R. Bothwell is making an inspection of the Congor property in Bingham today.

It is estimated by the transportation companies that 65,000 persons desire to go to Cape Nome as soon as possible.
