MUNICIPAL ELECTION.

Monday, Feb. 13th, 1892.

MAYOR:
WILLIAM JENNINGS.

ALDERMEN:
First Ward, E. F. SHEETS,
Second, H. D. WOODLEY,
Third, A. H. RALEIGH,
Fourth, D. O. CALDER,
Fifth, A. O. PYPER.

COUNCILORS:
First Ward, RAMP PETERSEN,
Second, J. E. WATSON,
Third, J. E. WATSON,
Fourth, J. E. WATSON,
Fifth, J. E. WATSON.

RECORDERS:
JOHN T. CAINE.

TREASURER:
PAUL A. SCHEITLER.

ASSESSOR AND COLLECTOR:
JOHN R. WINDER.

MARSHAL:
ANDREW BURE.

A GREELEYITE ON THE UTAH QUESTION.

THE annexed letter from a Greeleyite was published in the Denver Republican, and we reproduce it, as in the language of that paper, "a common sense view of the Utah question, embodying the ideas of a good many people who do not join in the senseless howl which has been started all over the country by certain priests and noisy demagogues."

Greeley, Jan. 20, 1892.

In regard to the Utah question, you call for a mass meeting to consider how polygamy may be exterminated in Utah; and you join them in recommending co-operation throughout the country to accomplish that end, and there is evidently a general willingness to do so. Polygamy is the form that theocratic evil takes in Utah; to almost the entire exclusion of promiscuity, the form which the same evil takes in all the rest of our country. If we can eradicate the theocratic evil in Utah by any amount of meetings and petitions, it will be worth our while to do so, but if we can only suppress the polygamous form, and change it to conform with the prevalent kind of adultery, I sincerely doubt if we shall have accomplished any good. Take the terrible picture that the same number of the Inter Ocean has published, in this call draws of the evil in its promiscuous form in the heart of Chicago. They publish a map of the district called the Levee, containing a forty-five block area, and aver that on those blocks live 3,000 prostitutes, and the district is visited daily by at least 12,000 men, a perfect sink of debauchery, robbery, murder and all the vilest debauchery. And this is only the center of the Chicago sore, the unconcealable part. A far greater part of the evil is in the suburbs, and the public gaze is turned from the city to the suburbs, and the suburbs are the scene of a more complete and not partial or local in application.

If we distrust the adulterers in Utah, let us do so throughout the land. If Congress is to suppress Mr. Cannon for adultery, let it also expel all other Congressmen guilty of the same crime. Laws that are not general are seldom just, and those that punish one form of crime and ignore the same another and worse form of the same crime, are seldom productive of good. Adulterers control elections in Utah, and, too, they very frequently control the candidates and decide their election in Chicago, and, if we can believe Denver papers, sometimes control affairs even in Denver.

A square fight against the whole evil, and that each community had better commence on that which is nearest to it, making its fight at close quarters instead of at arm's length.

The writer of the above is mistaken on the actual situation in Utah, but correct in his argument and deductions. There is nothing in common between the social evil of Utah and the social evil of Chicago. The former is a theocratic evil, the latter is a promiscuous evil. They are founded in lust, born in sin and shaped in iniquity. It bears the fruits of disease and decay, feeds the sources of vice and crime, smites both body and soul with the blight of corruption, and leads down to death and to hell. The latter extends the blessings of matrimony and the influences of love; it multiplies offspring born under family regulations, inculcates chastity and honor, and governs by religious impulses and ordinances, and is pregnant with life and health, and makes the union of men and women in the family relation perpetual, thus binding the ties that join them forever, and making the family basis firm and enduring. It strikes the axe at the root of the tree of the social evil, and is its most uncompromising and effective foe.

"Counting polygamy as adultery" is a common misstatement. It is a palpable error. Living with two wives by mutual consent, under a marriage ceremony considered by them divine and authoritative, is not to be compared with taking another man's wife. The two acts are totally different in essence, in fact, in law and reason and in effect. Those who believe in and practice "Mormon" plural marriage abhor adultery. They believe the former, governed by certain restrictions, to be right, while they regard the latter as a deadly sin, which ought to be punished with death. Adulterers do not "control elections in Utah." They and their fellows outside of Utah would like to do so, and are moving the whole country to effect

their purpose, but so far they have not accomplished it.

Waters with J. S. is a theocratic light against the whole social evil, adultery and promiscuity. We regard them as the besetting sins of this lascivious age. "Mormonism" is at war with them uncompromisingly. And it is the spirit which leads to them that is inflaming the public mind against Utah to-day.

The adulterous and lustful politicians and Pharisees, gauging us by their own standard, are making a tremendous bellowing through the land, but they have no conception of the purity and sanctity with which we regard the family relation, nor the restraint and self-denial which "Mormon" marriage properly understood imposes.

The Greeleyite touches the Inter-Ocean in a tender place. And the inconsistency of declaiming against "Mormon" marriage, and at the same time winking at the notorious and monstrous evils in their own vicinity, is a characteristic of most of the newspapers that join in the present puritanic crusade. That Chicago sors have their counterparts all over this Christian land, with fibers of corruption reaching into unnumbered households, poisoning the very fountains of life and breeding sorrow, sickness, distrust, contention, infamy and death. Yet these common and crying evils excite no commotion, while those who gaze upon them every day or read about them in the public journals pass them by as naught or as "necessary evils," and go wild with excitement because a few "Mormons" in Utah marry and take care of all the women with whom they live, and father the offspring of their unions. Verily, Humbug is king; and Hypocrisy prime minister!

STREET SCENES IN PIOUS BROOKLYN.

BROOKLYN is a very pious city. It contains a number of "Christian" churches of the very first class, if money, which is the God of this age, is to be considered as giving tone to them. Some of the most famous preachers with the most famous congregations in the country proclaim their kind of religious doctrines and sentiments from Brooklyn pulpits. That sanctified city also boasts an anti-polygamic society composed of women with plenty of spare time on their hands, and who are therefore ready to undertake the management of other people's affairs, and so waste a large amount of sympathy over their sisters in Utah, none of whom would change places with them for a moment, and a great quantity of indignation over the "Mormon" evil, who would die before they would stoop to the villanous of the Brooklyn women's husbands.

Well, Brooklyn ought to have been a puritanic city, and a pious one. Perhaps it has been. But following from an eastern paper does not favor the idea that Brooklyn is the moral paradise which it ought to be with its pretensions and its motive-picking from other people's eyes.

"The increase of petty crimes and of drunkenness among women in the large cities is a deplorable fact. It has become so patent that it can no longer be ignored. In Brooklyn, one of the papers of that city states: 'women are often carried to the station houses so intoxicated that common decency is outraged in their appearance, with clothing torn from the bodies, and smeared with the filth they have gathered in their revelry with drink.' Many women are daily arrested for stealing, and these women are sometimes sent to the reformatories to be searched and afterwards guarded in police stations until acquitted or convicted of crime."

Just suppose that such scenes were enacted in Salt Lake City. Would not the news be published throughout the continent and be cited as proof of the tendencies of "Mormonism?" When will the kidded, silk-clad and scented reformers who are so scandalized over faded evils in Utah turn their attention to the flagrant disorders of their own sin-stained cities and the banners that lie across their own visual organs?

AMERICAN LATEST DISPATCHES.

\$10,000 FIRE.

CHICAGO, 9.—What promised to be a big sensational fire broke out in Neely & Hamilton's elevator, and for a time endangered \$10,000 of the insurance. By shrewd work of the firemen, however, the loss was confined almost entirely to damage to water, and will not exceed \$10,000. Insurance \$10,000.

The Searchers—Life on the "Jeanette."

The N. Y. Herald has the following:

The new search party builds hulls and goes over every inch of the region, which is now covered by heavy drift ice every spring.

Life on the Jeannette.—We visited Nordenskiöld's winter quarters, and found he was safe before we entered the ice near Herald Island. The general health of the crew during the 21 months drift was excellent. No scurvy appeared. We used drift ice for fuel, and meat was secured twice a week. No rum was served out. Divine service was regularly held.

Everybody hunted; game was scarce. We got about 20 geese, 20 ducks and 30 walrus. No fish or whales were seen. All possible observations were made during the drift. The result was a northwest coast. The ship was holed over and heavily pressed by the ice most of the time. The mental strain was heavy on our ship's company. The result of the 40 miles. There was a scurvy epidemic, but it was very rapid. The soundings were pretty every 400 to 500 fathoms near Wrangel Land, which was often visible 75 miles distant. The greatest depth found was 50 fathoms and the average 35. The bottom was blue mud. Shrimps were brought up from the bottom. The surface of the water had a temperature of 20 deg. above zero. The extremes of temperature were 85 deg. below zero and 85 deg. above zero. The first winter the mean temperature was 33 deg. below zero. The first summer the mean temperature was 40 deg. above zero.

The heaviest gale showed a velocity of about 50 miles an hour. The barometer and thermometer fluctuations were not great. There was a distance between the winter gales of ice was eight feet thick. The engineer says the heavy truss saved the ship on Nov. 21, from being crushed. The telephone wires were broken by the movement of the ice. The photographic collection was 3,000 aerial photographs. The notes were also lost. The naturalist's notes were saved. Jeannette Island was discovered May 10, in latitude 73 deg. 47 min. north, longitude 158 deg. 59 min. east. It was small and rocky and we did not visit it. Henrietta Island was discovered May 23, in latitude 77 deg. 5 min. north, longitude 157 deg. 33 min. east. It is an extensive island, animals scarce, glaciers, plants, birds, etc. The heaviest ice seen was 23 feet thick. The engineer says the heavy truss saved the ship on Nov. 21, from being crushed. The telephone wires were broken by the movement of the ice. The photographic collection was 3,000 aerial photographs. The notes were also lost. The naturalist's notes were saved. Jeannette Island was discovered May 10, in latitude 73 deg. 47 min. north, longitude 158 deg. 59 min. east. It was small and rocky and we did not visit it. Henrietta Island was discovered May 23, in latitude 77 deg. 5 min. north, longitude 157 deg. 33 min. east. It is an extensive island, animals scarce, glaciers, plants, birds, etc. The heaviest ice seen was 23 feet thick. The engineer says the heavy truss saved the ship on Nov. 21, from being crushed. The telephone wires were broken by the movement of the ice. The photographic collection was 3,000 aerial photographs. The notes were also lost. The naturalist's notes were saved. Jeannette Island was discovered May 10, in latitude 73 deg. 47 min. north, longitude 158 deg. 59 min. east. It was small and rocky and we did not visit it.
