varieties of wheat have been
selected by men during the past week
who came to inspect an Eastern
firm who are introducing a new
variety of wheat, which they claim
will produce more flour than any
other than any other variety.
They seem to sell them, but make
contracts to furnish it and take half
of last year's crop for their pay. To
encourage the farmers to make a contract
they agree to buy all their wheat
for sale at 10 per cent. above, but
get to make 10 per cent. of their contract.

search kept up for the missing
Charles Givens, who is supposed to
have been abducted through political
influence from a house at Miss., to the
mining camp of Gold Hill, Oregon.
The sheriff is keeping the movements
of a mysterious eight wagon team at
different places in the neighborhood
as the sight of the abduction.

The mine owners are being analyzed

Dale's Race for Congress.

NEW YORK, Aug. 2.—A telegram
from Frank Fiske, N. D., announces
that Bill Dale, who has known all about
driving a driving horse to victory, has
entered himself in this race over a
track which is said to be sometimes
so thick, very difficult and very much
given to flying debris.

Mr. Dale proposes to run a race on
the uncertain course of politics in
which there is no cash prize at stake
but Dale wishes to win the race.
Dale, the son of the former member of
Congress, is to take the lead for
Astoria. Dale is about 20 years old now
and there is not a race track of any
size in the country over which he has
not run. He is a good runner, but
has not yet had his chance.

He is not a campaign hand, though
probably he is not, there are plenty of
men of business who might very well
step in to make up a Congressional
team. It is not an easy task to run in
the congressional race.

bad the action of the pendulum
which probably may discharge a bullet

in a theater. The police say they will
however permit me to leave to England.

GENEVE ELEPHANTINES.

Prisoner Escaped from a Hotel in
Geneve.

BUSSEAU, Aug. 2.—John Etche, a
laborer, 23 years of age, was arrested
at the sister's hospital for a genocine
case of Elephantiasis. His leg will
be to the very medical mission
in Washington, D. C., where he can
have full attention for 10 years,
and the leg increased in size until a
month ago was about as large as
the thigh. The leg was horrific
object. The skin had cracked
and the bone protruded. This leaves
the patient in constant pain and
will probably never recuperate.
Elephantiasis is common enough in the
far east, but it is very rare in this country. Local
doctors say Etche's leg was the most
perfect specimen of the disease yet
found in this country.
