MINING, BUSINESS AND STOCKS

UTAH MINES KEEP TRADING LIVELY

South Columbus Con and Colorado Mining Are Doing Much Good.

STIFF PRICES, NO HINDRANCE.

Local Exchange is One of Few in Country Enjoying Good Business -"There's a Reason."

The week continues to grow brighter in the local mining stock exchange beause a number of Utah mines are getring in better shape each day, influencing their stocks for the better, natural-Were it not for the fact that the stock of the South Columbus Con. has been taken in by a few insiders during been taken in by a few insiders during the past several months, this stock would be subjected to the livellest kind of trading. Those who hold stock have heard of the big strike made there a few days ago and of course are not letting go, even at the advanced price of \$2. A few blocks of stock were budged this morning, 1,300 going at \$2. 100 at \$1.95 and 100 at \$1.92%. This stock is going higher and as the Albion ground lies on one side of the south Columbus Con, its stock will be strong with a probable climb from the present price.

COLORADO STRONG.

Colorado Mining company, one of Utah's lottest dividend payers is another worker in the campaign for increased prosperity in Utah. This stock looks good to buyers; so good, in fact that \$3 per share is not a set back to trading. At different payment arrangements. per share is not a set back to trading. At different payment arrangements, 1,600 shares sold at \$3 this morning. All Utah stocks are in domand and firm prices prevail. Sliver King is moving in small blocks, 25 shares selling today at \$223,50. The market is in excellent condition locally, and while outside marketic and the same selections of the same selections. cets are showing up poorly Utah's con-stant x growing dividend list is keeping out: trading lively. The forenoon izo, totals and closing quotations fol-

DALY-JUDGE MEETING.

Impertant Gathering to be Held in Jersey City May 21.

George W. Lambourne, secretary and treasurer of the Daly Judge company leaves today for Jersey City where his company holds its meeting June 21. The results of this meeting will be of more than usual interest to Salt Lake and Park City is there is a number of matters to be cleaned up. A successor to J. J. Daly must be elected and not a work has been whispered as to whom the new president will be. It may be some one in Cincinnati as that is where large blocks of stock are held.

Dividend matters will be considered. The company declared a 25 cent dividend every quarter some time ago but

The company declared a 25 cent divi-dend every quarter some time ago but in his final address to the company President Daly confessed that the bad condition of the roads during the past winter, difficulties in marketing zine and the disappointing showing made by ore bodies on the 1.500 had worried the management considerably. Friends of the property are confident that the mine is in excellent shape and will con-tinue to may the 25-cent dividend every

There are a few persons who see a merger ahead for the Daly-Judge. This may not matrialize within the right near future, they say, but it is a possibility. As the Daly-Judge is being watched closely, the meeting scheduled for the 21st, will be the source of much interesting news to Utahus in general.

WEIMER GROUND GROWS.

Idaho's Big Copper Mining Company

Now Owns Nine Hundred Acres. The Weimer Copper company has just added 26 claims to its holdings in Idaho and as a result now controls 900 acres of ground. This vast area lies along the wonderful contract lode of Fremont and Custer counties. Peter Weimer, superintendent of the mines located this ground some time ago and it was at his suggestion that the company add it to its original holdings. A committee of stockholders was appointed to investigate and examine the new territory and immediately of the content in the latter property is at a greater vertical depth this was not surprising as it was thought the vein dipped toward the north.

VEIN WAS PARALLELED. the new territory and immediately after its report was submitted Mr. Weimer's suggestion was adopted. This committee consisted of Judge A. N. Cherry, J. L. Perkes and James Dyer and these men were requested to examine the books of J. B. Weimer and other officials of the company; appraise and take over considerable personal property and to visit the outlying ground.

personal property and to visit the outlying ground.

Judge Cherry says he is half dubious about trying to describe the new grounds for fear of appearing given to exaggeration. He advises those who want to know to go and see for themselves, for "seeing is believing." Thousands of tons of shipping ore is in sight, while the lower grade stuff is in Thousands of tons of shipping ore is in sight while the lower grade stuff is in deposits which defy calculation. Judge Cherry says the whole territory owned by the Weimer company is rich with ore. The ore is everywhere in the lode on the Valley View group of claims and can be found at any depth from grass roots to 100 feet, the present depth of workings. The Paymaster group on the opposite side of the canyon from the Valley View shows a mass of rock, 200 feet wide between walls and highly mineralized. Conditions at the property are in excellent shape, 30 men being empoyed and all arrangements which might add to their comfort, being carried out. In Judge comfort, being carried out. In Judge Cherry's opinion the stock of the Wei-mer company is actually worth \$10 per

BY AUTO TO ELY.

W. A. Dunlap Covers Nearly Three Hundred Miles in Two Days.

With the whizz of the exhaust from their car singing in their ears, a cloud their car singing in their ears, a cloud of dust completely covering them. W. A. Duniap of Salt Lake, J. F. Mitchell and E. A. Lincoln of New York, pulled their automobile to a standstill before the Northern hotel at 8 o'clock last night after a hard drive from Salt Lake.

Mr. Dunian is a son of the famous

Mr. Dunlap is a son of the famous hat manufacturer of New York, and his companions on the trip are respec-tively, his driver and machinist. They are on their way to Austin, Nev., where Mr. Dunian has mining inter-The party left Salt Lake at 6 o'clock Thursday morning, and came through without accident or delay. The weight of the car, including baggage and the passengers, was 3,850 pounds. On the entire trip to Ely, covering 287.4 miles, only 49 gallons of gasoline was used. During the first 182 miles, 32 gallons were used.

"The trip was delightful," said Mr. Dunian, last night, after he had brushed the dust from his clothing and had caten his filmner. "We had no trouble and no delays. The rends to Utah were executable, but almost as soon as we crossed the Nevada line they became hard and as good as one could wish.

"Our roule was by way of Leekout,

"Our roule was by way of Leokout, Deep Crock and over Shellhourne Pass. We attained an elevation of 7,500 feet on Shellbourne Pass, and the old stage driver at that point, who has been in the district since '76, said was the first auto to go over that

It was the remain here long enough to have a good night's rest, fill our tanks with gasoline and then continue to our destination.

"We had absolutely no trouble, not even a puncture. The trip was delightful, and the route which we correct is an ideal one."—White Pine Nows.

Today's Metal Quotations. ALTA STRIKE GETS BIGGER HOURLY

South Columbus Consolidated is Opening Rich Peacock Copper Ore.

FACE OF DRIFT ALL MINERAL.

Stuff Will Go 25 Per Cent and 100 Ounces in Silver and Maybe

"It's growing bigger and better every hour!" This gladsome news was received by manager Tony Jacobson of the South Columbus Consolidated by phone from that property several times this morning. In fact Mr. Jacobson stayed close to his office to be on hand when his brother, A. Jacobson, in charge of the mine, called up again to report on the showing of the new find made there several days ago. While Manager Jacobson did not term the find a strike, he admitted that he is as delighted as a boy with a new pair of red-top boots over the "improved showing." Strike or ne strike reports from the mine bring the information that seven feet of ore has been opened in the drift started some time ago from the Alia-Quincy tunnel. In this seven feet of one there is two feet of 25 per cent copper ore. Samples in Mr. Jacobson's office in this city show the stuff to be a heavy "Peacock" copper ore. It addition to running 25 per cent copper the stuff will go as high as 100 ounces in silver. Jacobson stayed close to his office to WHOLE FACE IS ORE.

WHOLE FACE IS ORE.

The Alta-Quincy tunnel has been driven in the side of the hill for a distance of 1,800 feet. David Ketth.

W. W. Armstrong and a number of other well known mining magnates, drove this tunnel but failing to reach the real stuff discontinued work. Mr. Jacobson then got in by buying control of the property in the local stock market. This was done as quietly as possible, but repeated buying strengthened the stock and Mr. Jacobson put up a pretty penny to get the ground. If a man ever deserved success Mr. Jacobson does for he spent his own money to acquire a property which the shrewdest men in the intermountain region had failed to prove up. There has been no "promotion," nor stock selling at all. As soon as he got in control he started a drift at right angles with the Alfa-Quincy tunnel, commencing work on a hole started by former managers of the mine. At 500 feet, the distance reached just a few days ago the face of the drift was in heavy copper ore. Since then work has been pushed right into the ore and it is growing richer every hour. No attempt has been made to determine the width of the find, but that it is a big body is as certain as any showing could be.

FIND IS BIG.

FIND IS BIG. The showings in the drift have been excellent right along. Work has been cut through the white lime towards the contract formed by this and black lime and just as was expected the contact is proving to be highly mineralized. The vein being opened in the South Columbus Consolidated is a continuation of the bonanza find" which made the Columbus Consolidated a big mine. The

VEIN WAS PARALLELED. VEIN WAS PARALLELED.

Samples are to be rushed to the assayer so a true value of the rock can be obtained. It is not unlikely that the ore will go even higher than estimated. The find means a great deal for Alta and is another scalp in "Chief Not-atraid" Jacobson. An interesting feature is that former managers of the property in driving the Alta-Quincy tunnel have paralleled for 1.800 feet the very vein they were trying to find.

J. E. BAMBERGER HOME. What Big Mining Man Thinks of Markets, Present and Future.

Jacob E. Bamberger, president of the Daly West, Ontario. Daly and other big mining companies, is in this city after spending six months in New York. A directors' meeting of the Daly West company was held yesterday, but no business of public interest was trans-sected.

Mr. Bamberger is willing to discuss

Mr. Bamberger is willing to discuss market conditions, crops, the weather—anything but the consolidations and mergers in which his companies are rumored to be figuring. He holds the belief of many in respect to the recent slump, which he believes came in time to prevent a worse panic. Business will be made safer by the flurry, he explains. The tendency to eliminate overcanitalization on the part of rulescale. and other big industrial enterprizes is doing away with speculation to a great extent and Mr. Bamberbsr predicts that this will draw the attention of investors to mines and mining securities. He says the western "Tenderfoot" is becoming more cautious and the day of the "wildcat" drawing nearer quickly. "A quiet stock market will be noticed for several months," he explains. "Another unpleasant feature is the government reports which show that 500,000 bushels of winter wheat has been rendered worthless by the lateness of the season. The frost hurt some, too, and with the cereal production off color all business is influenced."

A. T. DAVIS IN DUCK CREEK.

A. J. Davis of this city arrived in By at the end of the week. He is resident of the Steptoc Valley Lead president of the Steptoe Valley Lead and Copper company and his trip was made for the purpose of spending a few days at the property. The company has applied for patents to its ground near McGill. Mr. Davis received a 55 pound sample from the mine a few days ago which assayed 61.2 per cent lead and three cances of silver. The ground shows 23 feet of ore with no walls in right. Mr. Davis is examining the property to map out a campaign of systematic development and to determine what machinery is needed.

OFFICES COME HERE.

Gibralter Mines Syndicate Selects This City as Place of Business.

The Gibratter Mines syndicate of the Bullfrog district, will hold a stockholders' meeting in Goldfield June 4. One of the important things to be carried out in this meeting will be the formal changing of the articles of incorporation to provide for the removal of offices from Goldfield to this city. As most or the officers and stockholders live here, this change is made for convenience. W. V. Rice is president of the company. The Gibratter concern was formed early in Bullfrog's history and was able to get in on the ground foor. Bonanza this season,

hill and surrounding flats looked most tempting and it was there the company located a large number of claims. While little is known about work under way by outsiders, it is said the property is a mountain of milling ore with big quantities of shipping rock.

GREAT SCHEME, THIS.

Goldfield Man Will Send Special Train Across the United States.

Among the schemes being thought up to advertise the mineral resources of Nevada, there are none so novel as that being boosted by Goldfield enthusiasts being boosted by Goldheld enthusiars and live ones in other camps. A special train is to be run from Nevada to New York. Four Pullmans will be used and in these will ride the boosters. Senators Nixon and Newlands are figuring upon making the trip. The state's governor, congressmen, chairman of the publicity commission, newspaper editors trass against and invited citizens.

publicity commission, newspaper editors, press agents and invited citizens will fill the cars.

William J. Brewer, an Indiana man who has made a fortune in Goldfield has offered to contribute the \$20,000 needed to pay the expenses of the trip. He arranged the trip and placed it in charge of the publicity commission of Nevada of which Sam Davis is the head. A collection of one exhibits will be arranged in the cars and banners straing along along the exterior of the train will tell the purpose of the excursion.

Route's legal department has told the committee a Pullman can be added to the train when it reaches this city, The excursion is being planned for

EAGLE DISTRICT EXPLORED.

M. T. Donovan, formerly of this city returned from Ely with several associates several days ago from a prospecting trip through the Eagle district, 90 miles northeast of Ely, The prospectors brought in news of good strikes and 100 pounds of samples, high in silver and copper. The copper averages 22 per cent and the silver 300 ounces to the ton. Mr. Donovan and his partners, Charles Bengtzen, also a former Salt Laker and J. P. Walsh, formerly of New York, have located 13 cialms in the new district and are preparing to Laker and J. P. Walsh, formerly of New York, have located 13 claims in the new district and are preparing to commence development without delay. The Eagle district is not far west of the Utah line and the scene of the finds reported by Mr. Donovan were made within a very few miles of Utah's western boundary. The located claims are on a line with Clifton, Utah. 35 miles to the east. This will be the nearest railroad point when the proposed road from Tintis to Deep Creek is built through Clinton. Deep Creek is so will through Clinton. Deep Creek is so miles on the other side.

Donovan, Bengtzen and Walsh are virtually the first men to reach the new district. They made the trip from Deep Creek by team, crossing Shelbourne pass, east through the Spring and Antelope vaileys into the Snake range.

That the district will attract the attention of the class of people ever-ready to rush to a new district is certain as the samples brought in by the locators show exceptionally high values at grass roots for a number of spectmens had vegetation clinging to them when turned over to the assayer. A heavy gray copper occurs within a foot or so of the surface.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago, May 14.—The wheat market today opened amid intense excitement, with options selling from 18 lower at 18 higher than yesterday's close. Weather conditions in the United States and Canada, which caused the sensational advance of the last three days were still unchanged, freezing temperatures were reported in the Canadian northwest will still further delay seeding operations. The Liverpool market, however, was off over a penny from yesterday's close. This decline brought out enormous realizing sales soon after the opening which carried prices down 1 to 3 cents from the opening quotations. The market then rallied about 1 cents on a strong buying movement. July opened 14 to 26 and advanced to 35½. September opened 18 lower to 36 higher at 37% to 38 declined to 36 and then rallied to 37. December at the start was unchanged to 36 higher at 59% to 39½, sold off to 57%, and then rose again to 38½.

The corn market opened somewhat firm because of the strength of wheat, but trading was not of large volume. With the break in wheat the corn market developed considerable weakness. July opened a shade to 1,4% higher at 52½ to 52% and sold off to 574,4652%.

There was a good general trade in oats, the principal business being in the September and July options. The market opened 1,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off. July opened 4,4% higher at 45 and sold off.

opened \$4,62% higher at 45 and sold off to 414%.
Provisions were weak on selling by local packers who based their action on prospects of increased receipts of live hogs. July pork opened 5 cents lower at 16.99, and sold off to 16.89. Leard opened 5 to 10 cents lower at 9.40 to 9.45, and declined to 9.36, and ribs sold off to 9.134, after opening 5 to 72 lower at 9.174,26.39.

WESTERN IDAHO SUGAR STOCK.

Is the best buy on the market today. A little stock can be delivered at \$10 per share. If you want a good sugar stock, paying 7 per cent dilydends now, and with prospects good for substantial increase call and give your orders while the stock can be had at par.

To those who do not need to sell we say that prospects look good for the advance of Western Idaho. If the proposed amalgamation takes place. Western Idaho stock will be worth from \$11 to \$12 per share; and if no consolidation results this stock ought to sell before another year for the last named figure, and pay its 7 per cent dividend in the mean-

CHICAGO WHEAT MARKET EXCITED

Chicago, May 14 .- A recurrence of yesterday's frenzied excitement characterized initial transactions on the board of trade today, but opening quotations showed a much narrower margin than in the first quotations of the previous session. The tendency at the previous session. The tendency at the start was toward higher prices but enormous realizing sales quickly carried prices down from 1 to 3 cents per bushel. From 96¼ to 97½ the opening quotations on July, the price dropped to 94¾. September opened at 97½ to 98 and declined to 96½. December sold off to 98½ after opening at 99½ to 99½.
