Oily substances always aggravate Skin Diseases. Ointments are therefore rather hurtful than beneficial. Glenn's Sulphur Soap, which opens, instead of clogging the pores with grease, has, as might have been expected, widely superseded oleaginous compounds as a remedy for scorbutic affections.

Hill's Instantaneous Hair Dye produces no metallic lustre. deod s&w

NOTICE.

SALT LAKE CITY, 21st Ward, Nov. 9.

Dr. E. L. Plant:

Dear Sir .- I had been suffering from tapeworm over two years, and had been under medical treatment for the same in New Zealand, but could get no cure until I came to you, and you cured me in less than 24 hours after your treatment.

Yours truly, ELIZABETH J. KNIGHT.

THE KING FORTUNE-MAKER

OZONE A New Process for Preserving all Per-ishable Articles, Animal and Vegetable, from Fermentation and Pu-

trefaction, Retaining their Odor and Flavor.

"OZONE-Purified air, active state o. Oxygen."-Webster.

This Preservative is not a liquid, pickle, or any of the old and exploded processes, but is simply and purely OZONE, as produced and applied by an entirely new process. Ozone is the antiseptic principle of every substance, and possesses the power to preserve animal and vegetable structures from decay.

There is nothing on the face of the earth liable to decay or spoil which Ozone, the new Preservative, will not preserve for all time in a perfectly fresh and palatable condition.

The value of Ozone as a natural preserver has been known to our abler chemists for years, but, until now, no means of producing it in a practical, inexpensive, and simple manner have been discovered.

Microscopic observations prove that decay is due to septic matter or minute germs, that develop and feed upon animal and vegetable structures. Ozone, applied by the Prentiss method, seizes and destroys these germs at once, and thus preserves. At onr offices in Cinc musti can be seen almost every article that can be thought of, preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of Ozone as a preservative. We will also preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender for him to keep and test.

FRESH MEATS, such as beef, mutton, veal, pork, poultry, game, fish, &c., preservved by this method, can be shipped to Europe, subjected to atmospheric changes and return to this country in a perfect state of preservation.

EGGS can be treated at a cost of less than one dollar a thousand dozen, and be kept in

an ordinary room six months or more, thoroughly preserved; the yolk held in its normal condition, and the eggs as fresh and perfect as on the day they were treated, and will sell as strictly "choice." The advantage in preserving eggs is readily seen; there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them, can be sold for an advance of from one hundred to three hundred per cent. One man, with this method, can preserve 5,000 dozen a day.

FRUITS may be permitted to ripen in their native climate, and can be transported to any part or the world.

The juice expressed from fruits can be held for an indefinite period without fermentation -hence the great value of this process for producing a temperance beverage. Cider can be held perfectly sweet for any length of time.

VEGETABLES can be kept for an indefinite period in their natural condition, retaining their odor and flavor, treated in their original packages, at a small expense. All grains, flour, meal, etc., are held in their normal condition.

BUITER, after being treated by this process, will not become rancid.

Dead human bodies, treated before decomposition sets in, can be held in a natural condition for weeks, without puncturing the skin or mutilating the body in any way. Hence the great value of Ozone to undertakers.

There is no change in the slightest particular in the appearance of any article thus preserved, and no trace of any foreign or unnatural odor or taste. The process is so simple that a child can operate it as well and as successfully as a man.

There is no expensive apparatus or machinery required. A room filled with different articles, such as eggs, meat, fish, etc., can be treated at one

time, without additional trouble or expense. In fact, there is nothing that Ozone will not preserve. Think of every thing you can that is liable to sour, decay, or spoil, and then remember that we guarantee that Ozone will preserve it in exactly the condition you want it for any length of time. If you will remember this, it will save asking questions as to whether Ozone will preserve this or that article-it will preserve any thing and every thing you can think of.

There is not a township in the United States in which a live man can not make any amount of money, from \$1,000 to 10,000 a year, that he pleases. We desire to get a live man Interested in each county in the United States, in whose hands we can place this Preservative, and through him secure the business which every county ought to produce.

Awaits Any Man who Secures Control of OZONE in any Township or County.

A. C. Bowen, Marion, Ohio, has cleared \$2,000 in two months. \$2 for a test package was his first investment.

Woods Brothers, Lebanon, Warren County, Ohio, made \$6,000 on eggs purchased in August and sold November 1st. \$2 for a test package was their nest investment.

F. K. Raymond, Morristown, Belmont County, Ohio, is clearing \$2,000 a month in handling and selling Ozone. \$2 for a test package was his first investment.

D. F. Webber, Charlotte, Eaton County, Mich., has cleared \$1,000 a month since August. \$2 for a test package was his first investment.

J. B. Gaylord, 80 La Salle Street, Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging 1 1-2c. per dozen for eggs, and other articles in proportion. He is preserving 5,000 dozen eggs per day, and on his business is making \$3,000 a month clear. \$2 for a test package was his first investment.

The Cincinnati Feed Co., 498 West Seventh Street, is making \$5,000 a month in handling brewers' malt, preserving and shipping it as feed to all parts of the country. Malt unpreserved sours in 24 hours. Preserved by Ozone it keeps perfectly sweet for months.

These are instances which we have asked the privilege of publishing. There are scores of others. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of every thing we have said in this paper, we propose to place in your hands the means of proving for yourself that we have not claimed half enough. To any person who doubts any of these statements, and who is interested sufficiently to make the trip, we will pay all traveling and hotel expenses for a visit to this city, if we fail to prove any statement that we have made.

How to Secure a Fortune With Ozone.

A test package of Ozone, containing a sufficient quantity to preserve one thousand dozen eggs, or other articles in proportion, will be sent to any applicant on receipt of \$2. This package will enable the applicant to pursue any line of tests and experiments be desires, and thus satisfy himself as to the extraordinary merits of Ozone as a Preservative. After having thus satisfied himself, and had time to look the field over to determine what he wishes to do in the future-whether to sell the article to others, or to confine it to his own use, or any other line of policy which is best suited to him and to his township or countywe will enter into an arrangement with him that will make a fortune for him and give us good profits. We will give exclusive township or county privileges to the first responsible applicant who orders a test package and desires to control the business in his locality. The man who secures control of Ozone for any special territory, will enjoy a monopoly which will surely enrich him.

Don't let a day pass until you have ordered a Test Package, and if you desire to secure an exclusive privilege we assure you that delay may deprive you of it, for the applications come in to us by scores every mail-many by telegraph. " First come first served " is our

If you do not care to send money in advance for the test package we will send it C. O. D, but this will put you to the expense of charges for return of money. Our correspondence is very large; we have all we can do to attend to the shipping of orders and giving attention to our working agents. Therefore, we can not give any attention to letters which do not order Ozone. If you think of any article that you are doubtful about Ozone preserving, remember we guarantee that it will preserve it, no matter what it is.

REFERENCES:

We desire to call your attention to a class of references which no enterprise or firm based on anything but the soundest business success and highest commercial merit could secure. We refer, by permission, as to our integrity and to the value of the Prentiss Preservative, to the following gentlemen: Edward C. Boyce, Member Board of Public Works; E. O. Eshelby, City Comptroller; Amor Smith, Jr., Collector Internal Revenue; Wulsin & Worthington, Atorneys; Martin H. Harrell and B. F. Hopkins. County Commissioners; W. S. Cappeller, County Auditor; all of Cincinnati, Hamilton County, Ohio. These gentlemen are each familiar with the merits of our Preservative, and know from actual observation that we have without question

The Most Valuable Article in the World.

The \$2 you invest in a test package will surely lead you to secure a township or county and then your way is absolutely clear to make from \$2,000 to \$10,000 a year. Give your full address in every letter, and send your letter to
