GOLD and silver mining—quartz veins—feet—assessments and per cents thereon and thereof—are still so much the rage, from Kootenai to Arizona, that the Chinese temples and heathen worship established in San Francisco receive only a brief passing notice by a few of the local papers. This course is Constitutional and correct—to permit them to unmolestedly worship as they please; but one cannot help observing the contrast, that the more perfect the plan for delivering mankind from the toils of the adversary, the more are it and its followers misrepresented, slandered and howled about.

In the Sandwich Islands sugar making and cotton raising are receiving much attention; and in many places in Southern California preparations are making to plant large fields with cotton.
