

EDUCATORS ARE SLIGHTLY STIRRED

Caused by the Adoption of the Directors' Report Relative To Reincorporation.

MARGARET HALEY OBJECTED.

Young Lady from Chicago Said It Was A Plan to Turn Matters to an Incubate Corporation.

Asbury Park, N. J., July 6.—President Roosevelt's flying trip here tomorrow, when he will deliver two addresses, will bring to a close the annual convention of the National Educational Association. The first address of the president will be at the auditorium and the second at the beach front.

Officers were elected today and directors from the different states were chosen.

There was a slight stir at the meeting of the national council over the adoption of the directors' report relative to reincorporation. The original incorporation as a national body was for a period of 20 years, and the association by limitation will cease to exist Jan. 20 next.

The directors expect special laws to be passed by Congress and reported in favor of taking advantage of them and forming a new organization to succeed and continue the present one.

When the report came up for adoption Miss Margaret Haley of Chicago objected to the approval of the plan, who charged that the report was a plan to turn over to a corporation not yet formed the rights and property of the association. President Maxwell ruled her out of order.

Miss Haley appealed to the meeting from the president's ruling, but failed to have her appeal sustained. She then announced she had power of attorney from a large number of the members and would make a fight in the courts against the plan. The report was adopted, but Miss Haley continued to speak and the meeting was in an uproar when she moved to adjourn.

This was carried.

The officers of the association chosen today were: President, Nathan C. Haeffer, Pennsylvania; vice president, William H. Maxwell, New York; Miss N. Cropper, Indiana; J. H. Hinesman, Arkansas; Ed S. Vaughn, Oklahoma; John H. Riggs, Iowa; Joseph O'Connor, California; D. H. Johnson, South Carolina; A. S. Shaw, Ohio; D. C. Wheeler, Vermont; J. Y. Joyner, North Carolina; J. W. Spindler, Kansas; J. Stanley Brown, Illinois; treasurer, J. M. Wilkinson, Kansas; secretary, Irwin Shepard, Minnesota.

The directors chosen include: Arizona, A. J. Matthews; California, Arthur H. Chamberlain; Colorado, L. C. Greenlee; Idaho, Miss Frances Mann; Illinois, Perryman; Indiana, Bennett; Kansas, I. B. Whittemore; Montana, Oscar J. Craig; Oklahoma, Andrew R. Hefman; Utah, D. E. Christensen; Wyoming, L. T. Tynan; Washington, J. B. Mathews.

Mr. Emily E. Williamson, president of the New Jersey State Charities Aid association, made an order to donate 200 prizes, one for \$200 and the others for \$100 for the best and second best form of report for use in the work of child savings and probation. The association declined the offer on the ground that it was contrary to its principles.

At the general meeting in the auditorium the first speaker was Lorenzo D. Harvey, superintendent of schools of Minneapolis, Wis. His subject was "Moral Training in the Grades."

Mr. Harvey was followed by William Barclay Parsons of New York, who delivered an address on "The Practical Efficiency of Educational Work."

Frank A. Vanderlip, vice president of the National City bank of New York, spoke on "The economic importance of Trade Schools."

In the department of child study Frank Webster, assistant president of pedagogy, University of Nebraska, Lincoln, discussed "Child Study in Normal Schools."

In the department of school administration, Seymour Davis of Philadelphia talked on "School Architecture."

Prof. Frank M. McMurry of the Teachers' college, Columbia university, discussed "Cooperation of Universities and Normal Schools in Training Elementary Teachers."

In the department of business education, a paper on "The Value of Government Publications to Teachers of Commerce in Secondary Colleges" was read by James C. Monaghan, chief of the division of consular reports, bureau of statistics, department of commerce at Washington.

Edward D. Jones of the University of Michigan discussed "The Essential Elements of Study in a University Course in Commerce, from the Point of View of the University of Michigan."

Results of the Organization of Higher Courses in the Ames Truck School of Administration and Finance, Dartmouth College, was analyzed by Harlow S. Person, secretary of Ames Truck School of Administration and Finance, Hanover, N. H.

Miss Florence M. Hopkins, librarian of the Central high school, Detroit, Mich., read a paper on "The Method of Instruction in the Use of High School Libraries."

"The Music of the American Indian" was described by Miss Natalie Curtis of New York City, who sang religious, ceremonial and cradle songs of the Indians. J. J. Dunn, school inspector, Pine Ridge agency, South Dakota, spoke on "The Necessity of More and Better Equipped Day Schools."

A number of other addresses covering a variety of subjects, were made by prominent educators.

SMALL CHARGE OF DUNNITE.

Will Crumple in Side of Heaviest Armor-clad Ship.

New York, July 7.—That a 12-inch shell loaded with only a small charge of Dunnite, the world's most effective explosive, will crumple in the side of the heaviest armor clad vessel though the shell fall short of its mark by 20 feet, has just been demonstrated at the beginning of a series of tests at the government proving grounds at Sandy Hook.

President's Eyes Are Improving.

Boston, July 6.—"President Roosevelt's eyes are wonderfully improving, in spite of all that they have to go through to stand the strenuous pace," declares Dr. John Morgan. "I have attended all the Roosevelt family eye troubles, and find that the president's are the strongest and are improving the most rapidly. The rumor that the president strained his eyes in the Cuban campaign is all bunk. I have attended the Roosevelt family eye troubles and find that their optic weakness is hereditary. The president came to me

The Song of the Cradle.

Bye, bye! Hush, hush! high! There's a sweet little cradle die hung up in the sky! A dear little life that is coming to die!

Two soft chubby hands that will pat and caress! A pure little soul winging down from above! A darling to care for, a baby to love.

One of the grandest agencies which enlighten and save has discovered a remedy for the motherhood from excessive suffering is the "Favorite Prescription" devised by Dr. R. V. Pierce, chief consulting physician of the Invalids' Hotel and Surgical Institute of Buffalo, N. Y.

This wonderful "Prescription" imbues the entire nervous system with natural, healthy vitality; gives elastic vigor to the whole system; specially concerned in motherhood, and makes the coming of baby entirely free from danger and almost free from pain.

I wish to state that I have used Doctor Pierce's Favorite Prescription with very good results. Write Mrs. Katie M. Andrus of Hudson, New Hampshire. "I had been in poor health for four years and had been twice in the hospital. My husband brought some of your Favorite Prescription, and it cured me. We are now blessed with two healthy children, and I am sure your medicine has done me more good than all the other treatment I have ever received."

HAD HEADACHES generally arise from bad stomachs. Bad breath, bitter taste, constipation, or belching of gas, are common symptoms. Do not let all present in every case. To cure, take small doses, only one or two each day of either Dr. Pierce's Pleasant Pellets, the Original Little Liver Pills, first put up by him over 40 years ago, or one of two a laxative, three or four cathartics.

while on his last Massachusetts trip to have his glasses changed and his weaker ones substituted. In a short while he may overcome all requirements for wearing vision stretchers."

Atty. Henry Sued for Libel.

Portland, July 6.—Charles F. Leed, now under indictment in the United States district court for having attempted to bribe the character of United States Dist. Atty. E. J. Henry, has commenced suit in the state circuit court against Mr. Henry for libel.

He asks \$50,000 damages. Prominent attorneys in this city pronounce the action ridiculous and say the complaint will be thrown out of court.

Kansas Anti-Trust Law Valid.

Topeka, Kan., July 6.—The Standard Oil company has filed an answer in the supreme court to the ouster suit brought against the company by the state of Kansas. The answer denies everything alleged by the state against the Standard, and in addition, as its main argument, attacks the validity of the Kansas anti-trust law. If the court decides the law to be valid, the case will be appealed to the United States supreme court.

Farmer O'Keefe Heir to Fortune.

New York, July 7.—Thomas O'Keefe, a Green town, N. Y., farmer, has learned that he is one of the heirs to a fortune of \$55,000,000, supposed to have been left by Dennis O'Keefe, his cousin, who died some years ago in Texas. The information came from a lawyer in Ireland, who had been searching for Irish, where Dennis O'Keefe lived until 1901, when he sailed for America. Thomas O'Keefe is about 60 years of age. He has placed his affairs in the hands of Douglas Conklin, cashier of the bank of Huntington.

Killed Woman, Then Suicided.

San Francisco, July 7.—Alban Leidlhold has shot and instantly killed Mrs. Augusta Hiner in her home at 158 Boutwell street, where her husband was at work. Leidlhold then turned the pistol upon himself and sent a bullet crashing into his brain.

Leidlhold formerly worked as a waiter on the Pacific Mail steamship company and was about 33 years old and Mrs. Hiner was 25.

ISTHMUS OF PANAMA TO BE A PARADISE

Life There is to be Made Healthful, Comfortable and Enjoyable, Says Chairman Shronts.

THEN DIGGING WILL BEGIN.

Much of an Exaggerated Character About Health Conditions Has Been Said.

Washington, July 6.—Life on the Isthmus of Panama is to be made healthful, comfortable and enjoyable before the real work of digging the canal is begun, according to an announcement of policy made today by Chairman Shronts of the Panama canal commission. Mr. Shronts said:

"Our first duty is to create sound underlying conditions. This is now vastly more important than the moving of dirt. The men must have suitable houses in healthy surroundings; they must have wholesome and nourishing food at reasonable cost; they must have suitable transportation facilities to get to and from their work, and they must have opportunity for recreation."

"It will be the policy of the commission to provide these conditions as quickly as possible, and to only increase the working force, until the approach of the canal, to provide these conditions, as fast as the facilities indicated can be furnished."

"So much has been said by the press of an exaggerated character about health conditions here that it may be wise to recapitulate the facts regarding yellow fever. There have been between 5,000 and 10,000 employees on the Isthmus since the disease first appeared in May. During that month there were 20 canal employees stricken and two deaths. In June, 20 canal employees were stricken, and four deaths, two of those dying being Americans appointed by the United States and two persons appointed locally on the Isthmus. There were also three cases of fever among employees of the Panama Railroad company and no deaths. During the month of July, up to the present, there have been no new cases and there is but one employee under treatment."

"In regard to the wages paid and the statements that so many men have left because of reduction in salaries, the fact is that wages, instead of having been reduced, have been very considerably increased in every branch of the service of the canal during the life of the present commission. It will be the fixed practice of the commission, as far as practicable, to fill the higher and more desirable positions by the promotion of deserving employees. The commission of beginning salary for clerical positions, such as bookkeepers, stenographers, typewriters, etc., is \$1.50 per annum, and for draftsmen from \$1.50 to \$1,000. The wages received in the outdoor railroad positions are from 10 to 25 per cent higher than those paid in the United States, being in general for switch engineers, \$125; engine firemen, \$100; track foremen, \$85 to \$100; and supervisors, \$150 to \$175 per month. All the mechanical tradesmen, such as carpenters, blacksmiths, machinists, etc., receive 40 cents per hour. In addition, all employees are furnished quarters or allowed 15 per cent increase in pay in lieu thereof, and are given six weeks' leave of absence per year on full pay."

"In order to know exactly what has been done and what the actual condition of work now is, the commission has sent two of its engineering members to the Isthmus to make a personal examination of the ground and make a formal report of their investigation. A cablegram received from Gen. Magdon today reports no additional cases of yellow fever and no deaths, and but one case under treatment on the Isthmus of Panama."

Against Bible in Schools.

Cleveland, O., July 6.—The reading of the Bible in the public schools was denounced in the report of the committee on secularism of the central conference of the American rabbis, which closed here today.

To Reduce Ferry Fares.

New York, July 7.—The Hudson county, N. Y., board of freeholders has adopted a resolution directing the managers of the West Shore Railroad fer-

THE FARMER'S HOME

SHARES IN THE BENEFITS OF SCIENTIFIC PROGRESS.

Mrs. L. O. Law Shows How the Burden of the Farmer's Wife May Be Lightened.

The traveler through fields of corn and grain in such states as Kansas, sees from the car windows numerous applications of modern inventive skill to the production of the farmer's wealth, and in every county may be found a large display of machinery for cultivating and harvesting crops. He cannot so readily learn to what extent the farmer's home has shared in the general advance, but he knows how essential to the farmer's happiness must be everything that adds to his strength and cheerfulness of his partner—the faithful housewife. Groups of farmer's wives in the Great West particularly, will read with interest the story of the struggle of one of their number to meet the constant demand upon her strength and will be glad to find that she was being ground in the unequal contest, and must cease to be a helpmate and enter the class of confirmed invalids, if help did not come from some source that would renew her strength.

Mrs. L. O. Law, of No. 351 North street, Horton, Kansas, says: "In 1897, while we were living on a farm in this neighborhood, I became severely debilitated as the result of overwork. I had serious indigestion, lost my appetite, suffered from a sense of suffocation and from obstruction of the circulation, so that artificial means had to be used to restore it. After suffering for months without finding any relief, I tried a box of Dr. Williams' Pink Pills which I had seen advertised in a newspaper. The first few boxes made me feel better, and after using the third box I felt entirely well. About two years afterward I ran down again and immediately resumed taking the pills. In two months I was fully restored to vigor and have held the gain ever since. I am now in excellent health and am able not only to take care of my home but also to assist my husband in a store which he has lately taken. Pink Pills have helped me every time I have taken them. They are so simple, so easily taken and so prompt in their action, I have said this to many already and am paid to say it to still more."

"This remedy, being in the form of a pill, is manifestly free from alcohol, against which so much has been printed, and it is guaranteed to contain nothing that can injure the most delicate constitution. The pills can be obtained from all druggists and at most general stores."

rise from Weehawken to Manhattan, and of the Bayonne and Staten Island ferry to reduce the fare from 5 to 3 cents.

The board also appointed a committee to visit each ferry and tender 2 cents as a rate. This tender, it is assumed, will be refused. The committee will then report to the board and its counsel will be directed to apply to Justice Dixon for a writ of certiorari.

Fourth of July Victims.

Chicago, July 7.—Four victims of Fourth of July accidents have died in Chicago. In addition two deaths were the result of injuries received on the evening of July 4. One of these already had been counted in the totals which now in the entire country, says the Tribune, reach the number of 64.

Threw Baby into Chicago River.

Chicago, July 7.—Mystery surrounds the identity of a well-dressed man who has thrown a six months old baby into the north branch of the Chicago river near the Webster avenue railroad bridge. The baby was discovered and its body was recovered by the bridge lamp tender, who witnessed the act and fished the baby out with a pole.

Two men saw the deed, but the child murderer escaped, although an attempt was made to catch him. The only clue the police have to work on is a description of the culprit furnished by the witnesses. He is believed to be the father of the child.

Against Taxing Commercial Men

New York, July 7.—The chamber of commerce has received a dispatch from the Toronto board of trade stating that the council of the board repudiated the action of the legislative assembly of Quebec in attempting to enforce a prohibitive tax on American commercial travelers.

To Climb Mt. Rainier.

Portland, Ore., July 7.—Several members of the Appalachian club of Boston, who will join the Sierra and Mazamas in the ascent of Mount Rainier, have arrived, and more are expected to-day.

day. Great interest is manifested in the expeditions to Rainier, and the climbers are coming in big numbers. There will be 28 from the Appalachian club, and 105 from the Sierra club of California. The Mazamas will turn out 15 strong.

The excursion party will leave here July 14 for Tacoma, whence the start will be made the next day for Mount Rainier.

RUMMAGE SALE.

At 136 East First South Thursday, Friday and Saturday.

Gardner Daily Store News.

The term Gardner Clothes is not confined to any one line in particular.
