It entered at once into the head of the mischievous fellow to play a trick upon Snyder. He went out and called half a dozen of his comrades with whom he arranged that they should drop into the saloon one at a time and ask Snyder "what's the matter with that nose?" to see how long he would stand it. The man who put up the job went in with a companion, and seating themselves at a table called for beer. Snyder brought it to them, and the naw-comes exclaimed as soon as he saw him,

"Why, Snyder, what's the matter." Patent Medicines Perfumery,

Is fast winning supreme favor in the household, as shown by the rapidly increasing sales, over all other machines.

This New Family Machine is now capable of a range and variety of work such as was easily recently thought impossible to perform by machinery. We usim and can show that it is the cheapest, must beautiful, delicately arrayed, nicely adjusted, easily operated, specify and smoothly running of all the Family Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, linen or cotton thread, fine or coarse, making the interlocked-classis-stitch, ailte on both sides of the fabric sewn; the early stitch which is universally approved, or is at all adapted to first-class work. Thus, heaver cloth, or leather may be sewn with great strongth and uniformity of stitch, and, in a moment this willing and never-wearying instrument may be adjusted for fine work on gause or gossamer tissue, or the tucking of tariatan, or ruffling, or almost any other work—even by a child—which delicate fingers have been known to perform. Even the care-less and thoughtless have little or no trouble on this machine. CHICAGO TRADE. HALL KIMBARK & CO.
