

TEACHERS' STIPEND TO BE INCREASED

Board of Education Will Make
Substantial Addition to Pedagogues Pay Check.

RELATIVES NEED NOT APPLY.

W. J. Newman Puts a Motion Barring
Them from Participation in
Official Plun' Crop.

When the board of education met last night to consider the salary schedule for the coming school year, W. J. Newman moved that on account of the many changes of nepotism that have been made against the board, that no more relatives of members of the board be employed. It is his intention to present a list when the appointments come up and have the names stricken from them.

After discussing the schedule for some time, it went over until next Thursday night when it will be adopted with a number of changes. It was decided that the high school teachers should receive a raise of about \$8,000 this year, but it will be distributed according to efficiency. The increase in the salaries of the teachers in the public schools will be material. The maximum will not be raised this year but these teachers will receive 10 percent and get a 10 months' salary. The intermediate teachers will obtain an increase from \$2.50 to \$4 a month and be given a 10 months' salary. This will take about all of the \$30,000 which has been set aside for this purpose.

Contracts were let to a number of firms for janitor's and school supplies. These will amount to about \$10,000. It was also announced that the Colonial theater had been secured for the afternoon of June 14 for the annual commencement exercises. The board adopted a resolution appropriating not more than \$250 to prepare an educational exhibit to be sent to the Alaska-Yukon-Pacific exposition. This is to be expended under the supervision of D. H. Christensen. A recommendation that M. N. Hough of the High school be released from the terms of his contract was approved.

CUNNINGHAM LOSES EYE.

Injury Inflicted by Brutal Ogden Robber is Responsible.

F. M. Cunningham, a well known newspaperman formerly of this city, and of Ogden, submitted to an operation at Groves L. D. S. hospital yesterday for the removal of his right eye. The operation was performed by Dr. D. B. Prouty, of this city. The sight in the eye had been destroyed by a blow inflicted by a robber, who held Mr. Cunningham up on the streets in Ogden on the night of May 16. The blow burst the eyeball, and it was decided to remove the eye to prevent the affection of the other eye. Mr. Cunningham was brutally attacked from the rear by the hold-up, who struck him down with a club. The thug made his escape after inflicting injuries on the helpless man.

COLONEL ROOSEVELT'S COWCATCHER RIDE; FIRST PICTURES OF HUNTERS IN AFRICA

The accompanying pictures of the start of the Roosevelt hunt in East Africa are the first to reach this country since the former president landed in the dark continent. Colonel Roosevelt had called from Aden to have a special train ordered to take him and his party from Mombasa to Nairobi, and when the start was made he climbed on the cowcatcher of the locomotive. In the picture the men on the engine are Colonel Roosevelt, Governor Jackson, the British resident executive, F. C. Selous, the famous English hunter, and Mr. Sandford. The other photograph was taken just before the party left Nairobi to begin the actual hunt. The hunters have now gone to Comit, where they will hunt the hippopotamus. This is the most dangerous work before them. Up to May 23 the party had bagged sixty specimens of big game.

SUCCESSFUL FLIGHT.

Roy Knabenshue's Dirigible Balloon Cuts Some Atmospheric Capers.

The people of Salt Lake witnessed the maneuverings of a real airship last evening. For the space of half an hour the dirigible balloon, owned by Roy Knabenshue and making ascensions at the Nat. Reiss carnival at the Salt Palace, ascended to a height of 1,000 feet, and after making a number of evolutions through the air, encircled the dome of the Salt Palace several times and landed just where it started. The operator was in perfect control of the airship from the beginning of its flight. The hydrogen gas in the bag was produced from the action of sulphuric acid on iron filings. At 6 o'clock the moorings were cut loose, and the operator took his position at the rear of the bamboo frame which is suspended beneath the gas bag. The nose of the balloon pointed upward and the airship rose into the air. The small gasoline engine was started and the propeller, attached to the rear of the frame, began to move. When at a considerable height the operator began to make evolutions and showed his complete control of the ship. He guided it back and forth by shifting his position on the frame and steering the machine with a rudder.

The descent was as perfectly controlled and several graceful circles were described about the Salt Palace before reaching the starting point. Prolonged applause greeted the successful flight of the airship. Not only the 2,000 people present at the carnival grounds witnessed the aerial flight, but the ship was visible from all parts of town, and everybody who knew of the flight started his occupation to watch the dirigible balloon. Another ascension will be made this evening at the same time, and if weather conditions are favorable, the operator hopes to bring the airship up town and allow it to hover over the city for some minutes, before returning for descent to the Salt Palace.

The airship is only where it started. The Nat. Reiss carnival attractions, holding forth this week at the Salt Palace. There are several features at the circus, among which may be named the glassblowers and the minstrels.

Only a Little Longer Will Ourfalian's Unusual Sale of Oriental Rugs Last.

OF ORIENTAL RUGS

The time of Mr. Ourfalian's departure for the Orient is drawing near. He expects to pick up many rare floor coverings at advantageous prices, owing to the recent disturbed conditions over in Turkey. In the meantime Mr. Ourfalian is doing everything in his power to reduce stock. The result is, the time is most opportune to buy choice rugs. Indeed, there was never an occasion in the history of this store which warranted the selling of fine rugs at such decided reductions in prices. It takes money to go to Turkey and Persia and make a collection of finest specimens. But it is a chance too important to overlook, so Mr. Ourfalian is converting into cash every rug that is possible. Many of them are being sold lower in price right now than at any time in the past. Some are being closed out at cost, others at a fourth, a third discount, and so on.

In view of the activity in building, and at a time when new furnishings are being purchased for the home, it does seem that it is worth while to come to the store and look into the matter. Certainly it is the time, the very time, to obtain at small expense valuable Oriental rugs. Even if domestic rugs cover the floor, it is all the more reason why you should investigate, for many handsome pieces can be had at domestic prices. It is just choice whether you prefer a domestic to an Oriental covering. Then, too, you know what you are getting. Mr. Ourfalian is reliable, well known—and the store stands back of every transaction.
