MINING, BUSINESS AND STOCKS.

STOCK MARKET WEAKER TODAY

Lower Mammoth Comes Down Several Points.

WABASH RATHER STRONGER

Victor Con. Sells Down—The Sales and Quotations of the Forenoon Calls On the Exchange.

The mining stock market was inclined weaker today. The traders that displayed an upward tendency yesterday, turned the other way. Lower Mammoth lopped off a few points, influenced, no doubt, by the prospect of a scrap with the Black Jack company, which has insisted on an accounting for ore alleged to have been extracted from its territory. Sacramento sold at 24 cents and Star Consolidated held firm at 28½ cents. Ben Butler remained unchanged, while Wabash closed slightly to the better. Victor Consolidated opened with a sale at 19 cents, followed by a decline. Daly-Judge dropped to $9.80, the closing bid.

The sales of the forenoon aggregated 11,800 shares, which brought $4,786.75. The closing quotations and sales were:

UTAH OFFICIALS ARRIVE.

Pleasant Green Citizens File a Protest — In Bingham Today.

Charles M. McNeill, president, and D. C. Jackling, manager, of the Utah Copper company, arrived from Colorado yesterday afternoon and in company with Col. E. A. Wall, departed this morning for Bingham. Late in the day a conference was had with officials of the Copper Belt railway, at which the matter of the extension of that line of road to the company's properties was discussed. While the result of the meeting was not given out, it is known that the Utah people desired to ascertain the feeling of those in control of the Copper Belt regarding the matter of building a line down to a point near Garfield beach, where the Utah company contemplates the building of its permanent works, for which the plans will call for 3,000 tons of ore per day capacity. But the initial plant will reduce to concentrates 500 tons daily.

The arrival of the Utah officials was awaited by a number of citizens of Pleasant Green, who entered a protest against the erection of the permanent works on the Adamson estate property near Garfield beach. The protestants claim that the water of the springs located there have been controlled by the citizens of Pleasant Green for 45 years and has been appropriated by them for the irrigation of their lands. The officers of the company claim that the protestants do not understand the situation; that the waters it proposes to utilize do not reach their lands at all, but goes to waste in the marshes below. Those who signed the protest to the Utah Copper company were: H. T. Spencer, Peter Le Cheminant, Edmond Le Cheminant, James Bartache, J. B. Toronto, Samuel G. Spencer, Anthony Cockerill, Austin M. Brown, Peter J. Reid, A. C. Reid, George A. Reid, W. S. Reid and D. H. Jacobs.

COLUMBUS CON. POWER PLANT

New York Electric Construction Firms Making Estimates.

PROBABLE COST IS $3,500.

Four and a Half Miles of Wire Will Be Required—Two Six-Foot Water Wheels.

(Special to the "News.")

New York, July 10.—Electrical construction firms are making estimates for the contract for the erection of a powerhouse for the Columbus Con. Mining company of Salt Lake City, Utah. The probable cost of the plant will be about $35,000. Two six foot water wheels, Pelton pattern, two 3,000 kilwatt kynamos, 4,500 feet 20—22 in. steel water pipe and four and a half miles of line will be needed for the contract.

Manager Tony Jacobson states that the contracts will probably be let some time next week. The plant will be put up with all possible speed and will be in operation in September or October. With the power plant out of the way the company will next give its attention to the building of a mill of generous proportions. It is not likely, however, the mill will be built until early next year.

LOING ITS DUTY.

A Tonopah Paper Waging War on Top Heavy Concerns.

The Tonopah Bonanza has opened war on the overcapitalized corporations being floated in that camp and sounds a note of warning that if it continues great injury will be done to the camp. Utah has been quite free from these top heavy concerns, hence it has not been a Mecca for the fakirs that have been doing the mining industry inestimable damage throughout the east.

As a usual thing these corporations place their stock in the hands of irresponsible brokers and it is through them that it is placed at a price many times its actual worth, perhaps it is of no value at all. In buying stocks many people, especially the uninitiated, never stop to consider the capitalization; but they should do so.

The Bonanza says:

"Tonopah gives promise of being one of the famous camps of the west, and that means the world. But it will not achieve greatness until some changes are made. In the first place the camp, or its mines, is over capitalized. There are too many shares in each corporation. Nearly all of the leading ones are incorporated for 2,000,000 shares. Complaint is made now because the stock brings low prices upon the market. A mine with over 80,000,000 of ore in sight blocked out, is selling on the board at the rate of $8,000,000. Many explanations are offered for this. It is said that combinations are hammering the price down and discriminations are made against operators. It is claimed by others that stock will not rise in value greatly until a mill is erected and dividends are paid. Not so. The trouble is that there are too many shares. One share out of 2,000,000 in a mine, even though it be as rich as the Mizpah or Belmont, is worth nothing. It cannot bring in any dividend of consequence and is bound to be an unmarketable commodity. Let those companies disincorporate under the special act relating to that matter and reissue their stock upon the basis of 100,000 shares and Tonopah will begin to boom instantly. The point may be aptly illustrated as follows: The Nevadan who would recognize a dime as coin of the realm and worthy of consideration, would turn up his nose at ten one cent coppers and chuck them into the scrap box. Perhaps the ten coppers are as valuable as the dime, but no Nevadan recognizes it in his every day business dealings. So with stock. The stock of the leading companies is issued in the form of coppers. Reduce the capitalization and issue dimes and it will be of value. Until that time Tonopah mines will be worth comparatively nothing on the open market, and the camp will be hard up for ready cash."

WAR TO A FINISH.

Chances Are Favorable for One Involving Tintic Mines.

It is a pretty sure thing that the Lower Mammoth and Black Jack companies are going to lock horns. The directors of the former corporation held a meeting yesterday afternoon: President James Chipman refuses to give out any details as to what transpired, but it is pretty certain that the Lower Mammoth is going to render no accounting to the Black Jack as to the amount of ore alleged to have been extracted from the territory of the latter. The Lower Mammoth directors will claim that no ore has been extracted or hoisted but what rightfully belongs to their company; they will contend that they have followed the ore from their own ground and that the Black Jack has no title to it whatever.

The attorneys for the Lower Mammoth are preparing a reply to Manager David Evans, of the Black Jack, and it will probably reach his hands late this afternoon.

It looks like war to a finish between these two Tintic mines, and it may take several months to settle the controversy.

WHITE MARBLE SPECIMENS.

Dr. H. J. Faust Brings Them to Salt Lake from Kinsley, Nevada.

Dr. H. J. Faust has just returned from a trip to Deep Creek, bringing with him a sample of white marble from his quarries at Kingsley, Nev., which, he says, contains mountains of just such material. The marble takes on a good polish and is noted for its hardness and fine quality generally. It has been pronounced to Mr. Edison, to whom a sample was submitted, superior to everything but the African, which is conceded the very best in the world. Mr. Faust's property is located at a point within six miles of a line surveyed some years ago by the D. & R. G., but which, however, was checked by the C. P. It is hoped by the doctor and his associates that the line may be taken up by the Gould's in which event their property will be of great value.

CON. JEFFERSON IN LITTLE COTTONW'D

An Energetic Campaign is Being Conducted There.

OMAHA AND CHICAGO PEOPLE

Are Backing the Enterprise—Has Ample Funds to Proceed—Is Splendidly Equipped.

The indications are favorable for the opening of a good mine at the mouth of Little Cottonwood canyon and within 15 miles from Salt Lake City. The property is the Consolidated Jefferson, which is backed largely by Omaha and Chicago capital. The company owns nearly 1,000 acres of ground which includes the old Jefferson, Belcher, Yellow Jacket, Twin Peak, Josephine and New State groups.

A modern hoisting plant, capable of operating to a depth of 700 feet, was recently installed and the work of sinking the shaft is now in progress; as it goes down it is proposed to run drifts off from levels, to be established at a distance of 160 feet apart, commencing with the 200. These various drifts will cut the veins exposed in the New State tunnels in which ore of sensational value has been encountered.

During the past year and a half the New State has produced, from the narrow veins exposed in the tunnels, several shipments of ore running from $100 to $830 in gold, and the company is now preparing to cut these veins at or below water level, with the expectation that they will there be stronger and richer. The shaft is now down over 90 feet, and progressing at the rate of three feet a day, three shifts of eight hours each, are being worked.

The shaft has a hoisting compartment 4½x46 feet and pump and manway 3x4½ feet. A full electric equipment for lighting and drilling is used. In going down stringers of high grade ore have been encountered and every indication points to their coming together at depth. The ores of the Consolidated Jefferson, carry good values in copper, Secy. H. B. Windsor states, ranging from 8 to 12 per cent. The property is situated about six miles from the nearest valley smelters.

At a recent meeting of the shareholders, held in Omaha, the company was provided with ample funds to conduct a very vigorous campaign.

MINING CONCENTRATES.

The option on the Eagle and Blue Bell mine, held by the Bingham Consolidated Mining company has been extended. It was to have expired on Aug. 27.

R. K. Kasper and F. F. Frisbee have returned from a two months' prospecting trip in southern Nevada.

The old Daly hoisting works at Park City was destroyed by fire yesterday afternoon, the origin of which is unknown. The loss to the company will not be heavy inasmuch as the machinery was removed several months ago; it having been purchased by the Naildriver company. There being no facilities at hand to fight the blaze no effort was made to save the building.

The new compressor ordered for the Yankee Consolidated some time ago is being installed and will be ready to start up next week. The company will then begin sinking.

The ore and bullion settlements reported late yesterday afternoon were as follows: Crude ores and concentrates, $19,600; base bullion, $24,300. Total, $48,900.

Supt. John McSorely, of the New York Bonanza, came down from Park City last night and stated that crosscutting to the vein will commence in a few days. The shaft is nearing the 300 foot level.

Fred McGurrin departed for Chicago yesterday on mining business.

Judge J. T. McConnell, manager of the Raven Mining company, departed for that concern's property on the Uintah reservation last evening.

The shareholders of the Sapho Mining company completed their deliberations last night after agreeing to increase the capital stock of that corporation to $1,500,000, divided into an equal number of shares of a par value of $1 each. Of this number 300,000 shares is to be sold for development purposes and 100,000 is to be held in reserve. The properties of the company are at Ely, Nev., and are considered to be as good as any in the camp.

Manager McVichie and other officials of the Bingham Consolidated are in Bingham today.

Carl W. L. Wiswall, who is investigating Utah diggings in the interests of the Green Reduction company, went to Mercur this forenoon.

Andrew S. Wise has been appointed manager of the Black Swan Mining company, whose mines and mill are located near Salida, Boulder county, Colo. Cyanide tanks are to be added to the milling facilities. The principal owners are Meadeville, Pa., people.

Seymour H. Bell, a prominent Oregon mining man, was in the city between trains yesterday afternoon and departed for the northwest last night.

Superintendent W. G. Scott of the Consolidated Alta mines, is in the city today. He is getting work well under way and expects to make things hum around the properties during the balance of the year.

Manager J. J. Trenam, of the Stockton Gold Mining company, is looking over that Stockton property today.

President J. E. Bamberger, of the great Daly-West mine, will return from an inspection of that Park City property tonight.

L. C. Doty, formerly superintendent of the Ely Mining & Milling company's properties at Ely, Nev., has been appointed to the same position at the Pilot Knob mines at the same place. Mr. Doty is well known in this city.

LIQUIDATION IN N. Y. CENTRAL

It Was Heavy and Dominated the Entire Market.

PRICES RECEDE ALL ROUND

Losses Generally Ran From One to Two Points, and in Some Cases Exceeded That.

New York, July 10.—Opening quotations receded all around under free offerings. Large amounts of stock were thrown on the market, offerings increasing as prices reached a lower level. Blocks of 100 shares and upwards were frequent and here was a sale of 5,000 United States Steel at 28½. Representative stocks, including the coalers and the specialties, fine grades, United States Steel preferred, Pacific coast, grangers and trunk lines, fell 1 to 2 points and some of the inactive stocks to a greater extent. The market was entirely dominated by the heavy liquidation in New York Central, which fell to 3 points under last night during the second hour. Losses generally ran from 1 to 2 points and exceeded that in some less active stocks. A number of stocks touched the lowest of the year. The market steadied and became dull and nervous.

Bonds were heavy at noon.

The higher range brought out fresh offerings on a large scale, which drove prices down lower than before. New York Central, St. Paul, Atchison, Baltimore & Ohio, Missouri Pacific and Union Pacific were the most affected on the break. New York Central sold at 118, and St. Paul touched 147¾, the lowest of the year. High priced active stocks continued to dip sharply. The market was steadier at 1 o'clock, but there were no rallies of consequence.

WESTERN MARKET LETTER.

Special Correspondence.

Kansas City, Mo., Monday, July 6.—Last Monday's market was the best of the week, prices tending downward after that, and closing the week 20 to 30 cents lower. Outside markets were likewise lower, and although bids were unsatisfactory in most cases, everything sold except a few range steers, as there was little incentive to forward shipments. Declines were general and included all classes. Best fat native steers brought $5.15, and top westerns $4.80. Best feeders sold up to $4.25, and most western cows sold around $2.90 to $3.15. Veal calves took a big slump, and are $1 to $1.50 cheaper than 10 days ago, and bring around $4.50 for the best. Total run last week amounted to 26,958 head, against 33,552 head the same week last year.

Today's run is 6,000 head, including 2,000 Texans, and the market is fully steady, and more active than any day since last Monday. In many cases prices are better than the low time last week, and the situation today is better than the close of last week indicated.

The sheep and lamb market went from bad to worse last week, and prices went off 50 to 75 cents. Receipts here at Kansas City have been running light, 11,950 last week, and packers were paying liberal prices up to Wednesday, when a serious break in the east gave them an opportunity to take off big slices, which they followed up in like manner the balance of the week. Feeding and stock sheep, however, sell very well, considering the low prices paid for killing stuff. Choice lambs bring around $5, shorn yearlings $4.75, wethers $4.10, ewes $3.50, stock ewes $2.75, feeders $3, and feeding lambs $3.10.
