

wounded. Coroner Hicks is holding an inquest. The engineer and fireman saved themselves by jumping from the engine. The trains were excursion trains and crowded with passengers. Two of the men killed were sitting beside their wives and children, who escaped. The new time table was published to-day, which probably may account for the sad accident. The engineer states that he had whistled down brakes, but the engines telescoped. Many of the wounded were left on the spot, while the dead were carried to the nearest hotels and residences. It is thought that some are still in the debris. There is great excitement and indignation.

S. army, and now in the Egyptian service, has arrived at Paris from his second expedition to the Mial Miam country, where he is extending the authority of the Khedive. Long believes to be one of the many sources of the Nile. Col. Long leaves shortly for the United States.

There are fifteen miners near where he is encamped, who claim that they obtain from five to fifteen cents worth of gold to the panful of earth; he has, however, tested it several times, and cannot make an average of over one and a half cents per pan. In describing the character of the formation he says it does not indicate gold.

The executive committee of the National Grange held a meeting to-day, and adopted the report of the sub-committee to whom had been referred the subject of international exchange between the co-operative societies of Great Britain and the Patrons of Husbandry of the U. S. It says that, "having examined the details of the plan of the co-operative societies of Great Britain as presented by their deputies to the U. S., properly known as the Rochdale plan, and its wonderful success, we heartily recommend it to the careful consideration of our State and subordinate granges, and to the members of our order, and advise such action on the part of the executive committees of the several States as may be necessary to the organization and operation of such co-operative associations within our order."

A strong and irregular wind blew during the shooting. There was an immense crowd present at Exhibition Place to-night for the distribution of the prizes, which included badges for each member of the American team. Leading Americans have prepared to celebrate the anniversary of the Declaration of Independence to-day, at the Crystal Palace. Minister Schenck presides. M. D. Carpenter will open the proceedings at 5.30 p. m., and will introduce Schenck, who will deliver an address. Among the gents who will be called on to respond to toasts, are M. Freeman, H. Morse, General Wm. Stokes, Colonel Forney, McCulloch, and Torrens, M. P. The meeting will be followed by a display of fireworks, including a magnificent illumination representing the U. S. Centennial Exhibition.

Dean Stanley, in the course of his sermon at Westminster Abbey yesterday, alluded to the American declaration of independence, contrasting the animosity in former days on the occasion of its anniversary, with the spirit of conciliation which at present prevails. Now every American was proud of his English ancestry, and every Englishman was proud of Washington.

The festival given by the Americans at the Crystal Palace this evening, to celebrate the 99th anniversary of the declaration of independence, was one of great magnificence. The marble hall and banquetting room were beautifully decorated and crowded with a brilliant assemblage, both Americans and English. At the dinner that followed the day's proceedings, patriotic and courteous toasts were given in answer to speeches by Schenck and Freeman H. Morse.

OF THE

"Chicago Pitts" THRESHERS & SEPARATORS

AND

LIGHT DRAFT HORSE POWERS.

Threshing, Separating and Cleansing all kinds of Grain and Seeds, without waste or loss of time by Slow Work, and Heavy Draft on the Teams.

Threshermen buy them and Farmers employ them on account of their Reliability and Durability.

FARMERS AND THRESHERMEN LOOK TO YOUR INTERESTS.

BUY THE BEST; THE BEST IS THE CHEAPEST.

The intelligent, first-class, old experienced threshermen, and thrifty well-to-do farmers, buy and employ

the "Chicago Pitts." Farmers employ them to thresh their harvest of grain and seeds, and often pay an extra price per bushel to the owners of Chicago Pitts Machines, because they thresh clean out of the heads, separate perfectly out of the straw, save the grain and seeds clean, fit for market, doing the work with the utmost speed, and do not keep a gang of men and teams on their place by reason of breakages, slow work and heavy draft on the horses.

Threshermen of long experience in the business buy them, because the Chicago Pitts is in perfect running order when it leaves the factory, and because of its superior durability and finish in all its parts, may be vigorously operated with the best results. It will thresh as much grain as any good set of hands care about handling, and it cannot be surpassed by any machine in the land, for Lightness of Draft and Good Work.

We have again secured the exclusive agency for the sale of these excellent machines and extras for repairs, for Utah Territory.

One of the Company visited us a few days ago, to ascertain precisely what was wanted in our dry climate, and we arranged with him for enlarged riddles and cleaning functions, also for two wheat riddles for each machine, one of them a fine mesh, to suit the wants of the farmer, for either foul or clean wheat; also for oats, riddles with a finer mesh, and enlarged elevators, on a different principle from the old. Warranted never to clog or choke under any circumstances.

The master wheel of the Horse Power of these machines is cast of a new pattern, much heavier than the old one, and is well banded with wrought iron.

We say, in confidence to our friends, that these light draught and durable Machines have no rival in this dry climate, and we offer them for sale at the very lowest possible living rates, and on easy terms; also all kinds of extras for repairs.
