# BLOOD CATARRH DISEASED AND SYSTEM DISORDERED

The entire inner portion of the body is covered or lined with mucous membrane, a soft, delicate tissue. This tissue is abundantly supplied with tiny veins, arteries and capillaries, and is kept in perfect and healthy condition by the nourishment and vital vigor it receives from the blood through these little vessels.

So long as the blood remains pure this mucous membrane will be healthy, but when the circulation becomes infected with catarrhal impurities and poisons the inner lining of the body becomes diseased, and Catarrh, with its train of unpleasant and serious symptoms,

almost intolerable, because of its continual annoyance, but when the blood becomes more deeply polluted by the catarrhal matter and impurities, Catarrh becomes a serious and sometimes dangerous disease. The bronchial tubes are attacked, producing an aggravating cough, the soft bones and cartilages of the head and throat are diseased and sometimes destroyed, the stomach is affected, resulting in dyspepsia, and gradually the entire system is upset and disordered. But Catarrh does still greater damage if allowed to remain in the system. Frequently the Kidneys and Bladder are attacked, and the continual passage of impure blood through the lungs diseases these vital organs, and then Catarrh terminates
