CONSOLIDATED MERCUR.

May Output of Gold Bullion Will Exceed That of April.

While it will be several days yet be-fore the May output of the Consoli-dated Mercur mine will be definitely known, nevertheless Manager G. H. Dern, who is in from camp on a brief business trip, has made the statement that it will exceed that reported for April, which was approximately \$64,-000

Bathing is superb at Saltair.

In gold and silver, while all these ledges pan freely. The Big Four and Murray Hill properties are in close proximity to the Early Bird and are both shippers, the Murray lease having a 40 foot ledge exposed to the surface and at 150 feet has broken into sulphides. At four feet from the surface on the Lillian lease I saw a sample that would assay \$10 per pound. "The Truett and Miller leases on Hoo-ligan Hill appeal strongly to Mr. Sea.

"The Truett and Miller leases on Hoo-ligan Hill appeal strongly to Mr. Sea-boldt for in addition to the sensational values already uncovered on these pro-perties they are in geological surround-ings which denote permanency and a continuance to depth. Adjoining these properties he recently secured a block of ground which at six feet from the surface has exposed a four-foot ledge which gave an assay of \$150 and in which there is a stringer of ore assay-ing 15 ounces in gold and 3,600 in sil-ver. Balloon Hill continues to hold the popular fancy with values, increasing in depth on several properties, notably the Kearns No. 2, which has a remarkable stringer of free gold revealing if not

of free gold revealing if not ceeding the choicest specimens from the Mohawk. A shipment of 42 tons on this property gave smelter returns of \$394 per

of \$394 per ion. "Through his association with the Gruti Brothers, I found that Mr. Seaboldt was fortunate enough to secure a block of ground on Grutt Hill contain-ing 28 acres which I shall advise my clients in London to operate." Efforts are being made to arrange for an organ recital for Mr. Philpotts as he is most anxious to hear the fa-mous instrument.

SWANSEA CONSOLIDATED.

Stock in This Corporation is Now Being Issued.

ing Issued. The stock of the new Swansea Con-solidated company is being issued as rapidly as the certificates of the old Swansea and South Swansea are pre-sented. In the new company, share-holders of the former will own 350,000 shares and of the latter, 300,000 shares. According to an official notice received from Seey. R. E. Allen of the new or-ganization, the Swansea company has declared a stock dividend of six chares for every 100 shares of issued stock; there being 5.664 shares of unsold stock ' in the treasury. in the treasury.

UNCLE SAM PRODUCING.

Tintic Company Will Ship 2.000 Tons

will be good news to shareholder he Uncle Sam Consolidated Mining company to know that the active pro-duction of one has begun again. While development has progressed steadily in the meantime, no shipments have

VALUABLE SAMPLES. "The Early Bird Mining company on Murray Hill is being operated by Mr. Seaboldt for his friends and from the showing made in sinking to the 100-foot level, he is confident that this will make one of the greatest mines of the camp. On this ground are half a dozen strong guartz ledges outcrop, some of which give assays of as high as \$100 per ton in gold and silver, while all these ledges pan freely. The Big Four and Murray country has helped towards the re-sumption of work in many branches, while locally the opening of the drain tunnel favorable conditions in which all of the camp's properties may truth-fully be said to be, has made it prac-ticable to commence the mining of ores on a large scale. Never was the great Silver King looking better than it is today. The ore bodies on the 1,300 are simply mountainous in proportions, and with each day's development greater they become. The wealth al-ready uncovered in this comparatively small section of the vast acreage own-ed by the company will pay dividends ed by the company will pay dividends for years to come, according to those who are in a position to know.
