BIG INCREASE IN NUMBER OF PATIENTS.

New York, May 7 .-- An increase of 547 in the total of insame persons cared for in institutions over any previous year in the history of New York state is the annual report of the State Chari-ties Ald association to the state commission in lunacy, published today. The number of insane in 1905 was 27,408. In 1905 there was one demented person in the state institutions for every 294 of population, while in 1900 there was but one for every 305. As a mitigating circumstance the report points out that while the total of insane cared for last year was larger than ever, the in-crease in new cases was the smallest of the past 15 years. This year's rec-ord number of patients cared for is accounted for by improvements in the care of the health of insame persons, by which many lives are declared to have been spared which would have formerly been lost and which swell the

PRESBYTERIAN BOOK OF COMMON WORSHIP.

The many particulars the book of common worship has points of similarity to the Episcopal book of common prayer.
The marriage ceremony in the new book omits the word "obey" to which so many have objected, and it also omits the reference to "worldly goods." with which the man and the woman in some marriage forms "endowed" each other.
It is noted that although the book was, of course, planned long before the San Fracisco calamity, one of the prayers it contains is especially applicable to that disaster, and shows how carefully the book has been planned to meet unsual circumstances. The prayer reads:
"Almighty God, who art a very present help in time of trouble; let not the heart of thy people fail when fear cometh, but do Thou sustain and comfore them until the calamities be overpassed and althou knowest the cause and reason why this grievous disaster of earthquake and fire hart failen upon men so do Thou hear the plans of protect the inno-cent and helpless and deliver any who are still in peril, for Thy great mercy sake.
