MINING, BUSINESS AND STOCKS

ONTARIO MINERS REFUSE TO WORK

Fifteen Minutes Cause Expected Trouble Between Managers And Ninety Employes.

UNION SANCTIONS ACTION.

Men do Not Want to be in Mine Over Eight Hours for Present Wages.

Labor troubles have again broken loose in Park City; the scene of trouble being this time the Ontario mine, which has between 80 to 99 miners on I ts payroll. The cause of the walkout is a difference of opinion between miners and mine-managers regarding "starting time." The mine recently posted a notice that men would be asked to start down the shaft at 6:45 a. m. instead of at 7 o'clock, as has been the custom for some time. The minethe custom for some time. The minemanagers made this ruling in order to have the men in the lower workings by 7 o'clock, at which time the day's shift of eight hours commences. The interior workings of the Ontario are long and the shaft is a great distance from where the men are working. It is the desire of the mine management to have work begin promptly at 7 o'clock instead of 15 or 20 minutes later. The mine also wants the men to remain at their posts of duty until 3 o'clock, when the eight hours close. They would thus have to walk out on their posts would be in the mine over nine hours, while they get paid, of course for but eight

WALK-OUT SANCTIONED.

they get paid, of course for but eight

A significant fact connected with the A significant fact connected with the waik-out is that the Miners' union has sarettoned the action of the miners and this means a determined stand upon their part as they will have one of the largest organizations backing them up. The result of the trouble and the action to be taken towards settling it depends upon the action to be taken towards settling it depends upon the action to be taken towards settling it depends upon the action to be taken towards settling it depends upon the action of the act The result of the trouble and the action to be taken towards settling it depends upon the attitude taken by the mine. The walk-out has not been entirely anexpected as there has been an undercurrent of "labor trouble talk" noticed in the little ramp for some time. It was thought by many that this would pass over but the recent walk-out at the Ontario drain tunnel followed by the present walkout at the mine shows that these hopes were unfounded. The mines of Park City are in excellent shape and many of the miners now working have been in Park City for many years. The miners are an excellent class; slow to act in affairs of this kind and the mines have always shown a dispesition to meet them half way on any disagreement. In view of these things a long tie-up is not thought probable and it is believed the men and mine will get together in a short time and reach some conclusion satisfactory to all concerned.

TRADING IS LIGHT.

TRADING IS LIGHT.

Daly-Judge Has Taken Decided Beace -Uncle Sam Strong.

"Light trading" is an unpleasant term but it will best describe business during this morning's session of the local mining stock exchange. Daly Judge has taken a decided brace and 100 shares sold for \$8.85 this morning. Uncle Sam continues its climb and went from \$8 to 60 cents this morning. The foreneon total sales and ing. The forencon total closing quotations follow:

CROWN POINT FORMED. Jesse Knight and Associates Get Eight Claims in Tintic District.

(Special to the "News.") Provo, April 10.-Jesse Knight and asociates are not yet through with forming mining incorporations. The last company organized is the Crown Point Consolidated Mining company, for which articles of incorporation were filed with the county clerk yesterday. Provo is the place of the principal business office. The capitalization is \$100,000, in shares of the par value of 10 cents each. The company owns the following claims: The Goshen, Goshen Nos. 2, 3, and 4, Ridge, Ridge No. 2, and the Divide No. 2, in the Tintic mining district. The directors and officers are: Jesse Knight, president; Joseph Wirthlin, vice president; W. Lester Mangum, secretary and treasurer; J. Wm. Knight and Jacob Evans. Consolidated Mining company, for

DIVIDEND DECLARED Beck Tunnel Con.'s and Grand Central's Monthly and Annual.

(Special to the "News.")

Prove, April 11.—The Beck Tunnel Consolidated Mining company directors met yesterday and declared the regular monthly dividend of 4 cents a share, \$40,000, payable on the 20th. Books will close on the 15th. The mine was reported in excellent condition.

The Grand Central directors posted the usual 6 cents dividend, \$15,000, payable on the 15th: books close at noon on the 12th. This property was also reported in fine shape. The Victoria dividend was passed on account of expenses incurred in making improvements and doing development work. (Special to the "News.")

ANOTHER STEP TAKEN.

Silver King Merger Progresses Nicely And Will Soon be Completed.

And Will Soon be Completed.

As was expected, the Silver King merger went through without one "nay" vote yesterday. At the meeting held in Park City between trains yesterday over 10,000 of the 150,000 shares were represented. In addition to the Mc-Gregor and other properties enumerated in Prest. David Keith's explanatory letter, two additional properties are to be taken into the big group and Manager Thomas Kearns was instructed to close up negotiations. All in all the King company own 2,000 acres of mineral land just above and slightly to the west of Park City. Its domain and the personel of its promoters promise to make the Silver King Amalgamated one of the biggest producers in Utah and for that matter in the entire west. The output of the Silver King is to be increased to maximum in order to have disidends under distribution by the time the big company is formed completely. During the years of its separate existence the Silver King has distributed \$11,000,000 individends among its shareholders. With other highly mineralized properties joining forces to this property the total cutput will mount high, going close to the \$15,000,000 mark. The Helaze interests, it is rumored, are considering gesting in to the Amalgamated company and the fact that Duncan MacVichle spent some time at the Silver King and then hurried to New York to see his head. F. Augustus Heinze, bears out this rumor to a great extent. The details of the nig company will consume a month in preparation, but when once formed nothing can stand in the way of the big corporation and whole mountains will be honeycombed to find the dividend-mak. Ing stuff.

NEW LAWS SIMPLIFIED.

Three Good Rules Passed by Last Legislature-Enforcement is Important. All ore sampling companies and all assayers purchasing ores within the state must keep a full record of all anfirs pertaining to the transaction including a description of the ore; as-say values; shipper's name and pro-ducing mise.

 All mining companies must keep it hand about mines and mills an em-ingency outfit, stretcher, medicines, etc. 2. Any miner or prospector or individual has the right to work whenever, wherever, and for anybody he cares twithout interference from other parties.

These are three new many laws robbed of all their legal dressing and boiled down to "understandableness" by Harry Joseph, former speaker in the last legislature. Any violation of any of these laws is a misdemeanor. The first to protect mines and prospects from "high graders," thieves who make a specialty of stealing tich ore. The second law is self-explaining and one that should be enferred. The third is called the "personal rights bill" and a sheriff must render aid to enforce the same in case of a dispute.

SEVIER HAS FREE GOLD.

The Sevier mine has struck rock bearing free gold according to a letter received by P. H. Malson from his brother, Rev. W. E. Malson of Kimberly. The discovery was made April 5 in tubnel No. 2, and the rock gives every promise of extending from the surface to a great depth, writes the Rev. Mr. Malson, A 100-ton mill is working away at the lower grade ore from the Sevier but the new ore is to be put through at once to test lis value. A gang of 70 men are at work at the mill and mine, and everything is progressing without interruption. The Sevier mine has struck rock bear-

ONE MORE LANDED.

E. W. Stebben, Denver Mining Engineer of "Lost Buillon" Co. Arrested.

Denver, April 11.—E. W. Siebben, a mining engineer of this city, was arrested yesterday by fedral officers in connection with the investigation by the government into the operations of the Lost Builion Spanish mines company. This is the company that claims to own a rich mine near Silver City, N. M., but which the government agent claims is nothing more than an old cave. This makes eleven arrests as a result of the efforts of the federal officials. Stebbens is charged with having reported in the capacity of an engineer that the Lost Builion properties contained "mountains of untold wealth" and "millious of tons of ore in sight, all of which was suitable for shipping." He is charged like the rest within conspiracy to defraud and using the mails for fradulent purposes. He was released on bonds. gineer of "Lost Bullion" Co. Arrested.

J. J. DALY HOME AGAIN. Says Bad Roads Are Partly to Blame For Daly-Judge's Tumble.

Says Bad Roads Are Partly to Blame
For Daly-Judge's Tumble.

John J, Daly is home after a prolonged absence from this city. One of the first questions asked him by friends and newspaper men was something about the Daly-Judge mine. Mr. Daly said the decline of the stock is not due to any bad condition in ore at the mina but he thought it might be attributed to the wretched condition of roads between the property and the depots. "I have only had a word with our managers, but they say the mine is in excellent shape and going ahead in good style," he continued. "Mines run in all sorts of ore-high grade and low grade, but the average remains somewhere near a set mark. You see the extremely bad condition of the road keeps shipping from being carried on as the mine, itself, will permit." Should Mr. Daly inspect the mine within a short time a statement would then be received gratefully by the public at large, for the ups and downs of the stock within the past few weeks have created no end of gossip and wonder. Accompanying Mr. Daly were Mrs. Daly, Miss Eveline, Miss Eudera, and Morris Daly. The party visitee Naples, Rome, Venice, Milan, Paris and London during a trip through countries across the water. Italy was undergoing a cold wave, making it rather unpleasant after one is filled with anticipation of enjoying the sun of "sunny Italy." Mr. Daly, in discussing his trip in a general way commenter upon the European railroads, camparing them unfavorably with those of this country, Mr. Daly is of the opinion that the "panicky" conditions played up by the newspapers as existing in New York's business circles, existed among speculative dealers only. In other circles, business circles, existed among speculative dealers only. In other circles, business core as of appear to have been affected.

FINDS NEW SUBSTANCE.

Alfred T. Godbe, a Salt Laker, Locates

Deposit of Infusorial Earth.

Alfred T. Godbe has discovered a new substance near Bullionville. I is called infusorial earth, and Mr. Godbe has found immense deposits of it. The stuff is used as an adulteration with asbestos in the manufacture of all asbestos goods, such as pipe coverings, articles for protection against heat, etc., and owing to the absolute nonconductiveness of infusorial earth it is fine for all such purposes. Germany supplies the world's demand at the present time although there are three different known qualities—French, worth \$56 per ton, English, worth about \$35 per ton and American, rangdifferent known qualities—French, worth \$56 per ton. English, worth about \$25 per ton and American, ranging at figures between. The product discovered by Mr. Godbe will sell readily for \$40 per ton, and can be mined and shipped for \$20, leaving half profit for the lucky finder and his associates. The first consignments will be sent to Los Angeles, where the infusorial is mixed in asbestos products, and even in some cleansing soaps. Mr. Godbe is a Salt Laker and one of the new industries which Salt Lake can expect to have at a future date is a big infusorial earth plant. Ploche and Lincoln county, Nevada, are greatly interested in Nevada, are greatly interested in

"NEVADA GOSSIP."

Newsy Bits of Information From Different Camps in Sagebrush State.

Under the head, Nevada Gossip, E. A. Manice and company of New York, publish the following items in a week-

Tonopah has spent upward of \$300 .-1010 in development work the past year, and now has nearly \$200,000 in the treasury, all taken from the mine. Philadelphia owners are much pleased with the development work going on at the Silver Glance of Hannapah. The superintendent of the Jim But-

er reports that they have run into

The superintendent of the Jim Butler reports that they have run into
high grade ore.

Bullfrog—The Tonopah railroad is
expected to be operating into Bullfrog
by the end of May, thereby giving
this camp two outlets.

Bullfrog National bank reported
Jan 1, \$11,500 in the treasury.
Since the new hoist has arrived, develop ment work is being pushed along
on the Mayllower Consolidated. There
are now about 40 men at work.

A body of sulphide ore has been
opened on the 300 foot level of the
Golden Scepter which gave an average assay of \$12 in gold.

The gasoline hoist recently installed
at the Amethyst is now in commission,
cross cutting continues on the 100 foot
level and the 200 foot shaft is being
timbered before sinking deeper.

The main cross ledge of the Montgomery Shoshone has been opened
at the 100 foot level.

The values of the main cross ledge
of the Polaris, one of the properties
of the Montgomery Shoshone which
assayed \$50 at the 300 foot level now
shows values of \$160 for two feet of
face, while another two feet shows
\$400.

Development on the Gold Bar is eing done on a large scale, the work seing along the hanging wall, the ross cut so far is 170 feet and indications point to the faot wall being 90 feet further. A car load of \$500 re has been shipped from the north hoot, and the 300 faot level prives icher than the ore at the 150 foot level.

STOCKS CONTINUE ONE OF THE CHOICEST Residence sites in Salt Lake City is offered for 12,100. It is not large but is so located that every square rod

The Opening But They Were

Smelting and Amalgamated Being the Weakest.

New York, April IL-Opening prices of stocks showed considerable gains over last night's level on a moderate volume of transactions. New York Central advanced 1% and Ntaional Lead 14.

of transactions. New York Central advanced 1% and Ntaional Lead 1%.

Liberal profit-taking and a moderate amount of short selling wiped out the initial advances and depressed most of the favorite stocks a fraction below yesterday's closing. The metal stocks were decidedly weak, while the railroad list encouraged support above last night's level. The raily carried Corn Products preferred up 14 and Baltimore & Obio and Southern Pacific 1. The market fell into extreme duliness and fluctuations were feeble. A 2 point decline in American Smelting weakened the whole market at noon.

Bonds were irregular.

Frices melted away after midday. Smelting and Amalgamated Copper were the weakest specialties. Harriman stocks and Reading were foremost in the decline in the railroad list.

Greater weakness developed in many stocks, the constant shading of prices eventually culminating in a vigorous selling movement that calried the market downward. Smelting's decline reached 4%. Union Pacific, Reading, Northern Pacific and Copper 2%, Great Northern Pacific and Southern Pacific eligible for market closed quite steady and dull. Pressure relaxed after the decline had been further extended and trading became very listless upon the slight recoveries. Canadaan Facific fell 1% and several others a point or more. of one share of old stock for one of new.

The Florence Leasing and Mining companies' stockholders seem at last to be rewarded for their patience, as ore of very high grade value has been encountered.

All leases of Combination Fraction show goed improvement, the Loftus Davis Sweeney yielded higher assays with greater depth in the winze.
Fairview—The main vein of the Nevada Hills is claimed to be opened up by surface uts on the Eagle's Nest and Hallstone. Eagle's Nest has made great strikes, what was supposed to be the hanging wall, on assaying gave returns of 341 per ton and proved to be a hard quartz vein, 30 feet wide so far, and the hanging wall not yet reached. Wingfield is reported to have asked for price on control of Eagle's Nest, and has been refused. Applications for leases on the Hallstone, adjoining Eagle's Nest are numerous.

Manhattan—Little effort is being

merous.

Manhattan—Little effort is being made to extract the high grade ore in the Mussang until the completion of the ore house; two and a half feet of ore averaging \$375 is claimed to have been opened up in the past few days.

The Stray Dog property has been worked almost continuously since this camp was started, notwithstanding contrary reports and is in better ore than ever.

CONCENTRATES.

Fred. Flindt is back from Verington, where he owns and is managing a num-ber of the best mines in the district. H. E. Miller of Bellevue, Ida., and wife are in town from an eastern trip, en route home. Mr. Miller opened the Minnie Moore mine at Hailey, Ida., and is largely interested in Nevada as well as Idaho mining properties. A. A. Brim of the Lead King mine reports that news of a copper strike at the Steptoe smelter site reached Duck Creek just before he left to come to Salt Lake. He understood the company made the find while quarrying for lime but details had not reached carm when but details had not reached camp when

he left.

Harry E. Cary, one of the original owners of the Carisa mine at Tintic, has taken property in Mexico known as the Calabacilias group. It is understood the ores in this group are identical with those of the Lluvia de Oro (Shower of Gold), which has paid \$1,000,000 to its owners. New Yorkers are interested with Mr. Carey and it is understood A. J. Underwood, at one time superintendent of the Carisa, holds the same position at Mr. Carey's newest holding.

Our Grill Room at the Royal Cafe is open daily from 4 to 12 p. m.

LOCAL MARKET REPORT.

The local markets are well supplied this week, after the hold-up of traffic over the Southern Pacific from washouts. The week's receipts include two cars of lemons, seven cars of oranges, two cars of bananas, three cars of Irish spuds from Idaho, and mixed shipments of strawberries from along the Gulf of Mexico and Mexico, Cuban tomatoes, cucumbers and a limited supply of, greens from Texas, with fine lettuce from California, raddishes, etc. The retail price of cucumbers was up to a prohibitive figure, as it cost the local importer \$2.90 to ship in from Texas, and \$2.55 from southern California. Finally, one local commission house cut to \$2.75, but that would not start the restaurants to buying; and it was not until the figure was made \$2.50 per dozen that hotels and restaurants would buy. As there is no money in buying at \$2.90 and selling at \$2.50, local commission men have stopped handling cucumbers for the time belocal commission men have stopped handling cucumbers for the time be-ing. Strawberries are now on the market from southern Texas and the Mexican state of Jalisco. But it takes five days to reach here, and the berries have to be shipped so unmatured that they do not "pan out well" after being they do not "pan out well" after being received here. One commission house lost four cases out of 10 in repacking, and will not handle the southern berries, for a while, anyhow.

Poultry is scarce, as growers seem to be holding back, for eggs or for higher prices. While butter is cheaper, one local firm holds its best, still at 40 cents, as 16 cunces to the pound is

cents, as 16 ounces to the pound is guaranteed, and the quality is gitt edged. There is no more fresh herring in the market, and crawfish are up five the market, and crawnsh are up nye cents per pound. Atlantic lobsters are being received at this point only on special orders, as the high price, 50 and 60 cents per pound, is practically prohibitive. Alfaifa is up to \$15, and will remain high until the first cutting is in, and then prices will fall. There is a slight rise in the wholesale prices of beef, and a correspondingly slight folial. beef, and a correspondingly slight fall in the prices of pork and mutton. The figures obtaining in the local markets today are as follows:

	Timothy per cwt
	Alfalfa, per cwt
	Corn, per cwt
	Wheat, per ewt
1	Oats, per cwt
	Barley, rolled, per cwt

Lost Vigor Restored

We treat MEN only and our experience in the past assures our patients straightforward and satisfactory treatment for the future. Many a MAN has lost his grip through brooding over his condition because he imagines be cannot be cared. To such we say investigate our methods of treatment and place yourself under our care and your weakness will disappear and confidence will be restored for the future. Our treatment has proved to be the best yet devised for restoring LOST VIGOR and that physical and mental incaptive which has made a wreck of see many. Our treatment for NER-VGUS DEBILITY does not stimulate temporarily but permanently. It stops every drain of VIGOR and builds up the muscular and nervous system—revives the spirits—brightens the intellect and above all restores the WASTED POWERS. Sometimes or. gamic weakness and LOSS OF VIRILITY arises from VARICOCELE and STRICTCRE in such case we have to get rid of the cause before we can obtain good effects. Too often these causes are overlooked and so in spite of any and every breating in the case does not progress and the patient often goes into physical and mental decline through want of success in curing his LOST VIGOR.

We take no case we cannot benefit or cure so you run no risks.
