# THE RICHES OF THE DALY-WEST

Presents a Most Interesting Sight on the 1400 Level.

IT HAS BIG POSSIBILITIES.

New Smeller to be Built in Sait Lake to Oppose the Trust-Venture Co. Accepts Hammond's Terms.

NO QUOTATIONS.

· .....

communication of the same of t

The material advance in the price of Daly-West shares during the past few weeks is a matter of surprise to those who have never visited the mine. Those who have loked through the property evince no surprise, however, The strengthening of this security is not due to any special change in the mine, further than the increasing of the ore reserves. No wonderfully rich strikes are recorded, but the development of the property is so flatering that a long dividend paying period is already in sight. What it will be when the 1,400 level is proved up by another level on the 1,500 or 1,600 can only be conjectured. It is the opinion of a number of mining men, however, that a that depth a magnificent shoring will be made in addition to that which is now in sight above/the 1,400. In the west drift from the crosscut on that level the management has cut through four chutes of very good ore. The drift through three of the chutes is not very long from which it is supposed that the apex of the three chutes have been cut. The opinion is quite freely entertained that a lower drift will prove them to be years leave. be very large. The last chute, however, has been run through a distrance of 350 feet and the drift was in fine looking ore last week, as good if not better than any previously encoun-tered. The management, afterconnecting with the winze from the 1,200 level, is with the winze from the 1,200 level, is still driving west towards the Anchor lines which are still several hundred feet distant. The width of the ore body on the 1,400 is not known. Further than that the top, bottom and sides of the drift is in ore nothing is known, as no crosscutting has been done. The mine presents a very interesting prospect on this level and the start which has just ben made in sinking a winze from the 1,400 level near the crosscut will doubtless unfold much more riches. will doubtless unfold much more riches.

Probably no mine in the State, unless it be the great Silver King, presents a levels are connected with the 200 by levels are connected with the 300 by the Daly-West above the 900 level. Two levels are connecting with the 900 by upraises at the distance of 160 feet and 40 feet above that level. These are known as 61 and 62 respectively. The drifts there as on the 900 run to the Anchor lines and it is at this point that an upraise has been run 35 feet in fine looking shipping ore. At a point 309 feet east of the Anchor lines, another for 25 fet. With a very fine showing on 92 and an ore body from 25 to 35 feet thick and more than 300 feet wide on 01, and an excellent showing in the stopes from the 900, the future of the mine must be very roseate. If the vel mine must be very research. It has was vertical the above figures would not mean so much, but when it is known that the vein lies veryflat—so flat that there is about 600 feet of storing on the vein between the 900 level and 01. a vertical distance of only 160 feet It will be seen that the ore chute above the 900 will pay many dividends with-out taking into consideration the fine showing on the lower levels.

#### STRATTON'S INDEPENDENCE. The Venture Company of London Ac-

cepts John Hays Hammond's Terms. Denver, Colo, Nov. 29.—The Venture Corporation of London has cabled its acceptance of the terms of John Hays Hammond, under which he agrees to

take charge of Stratton's Independence mine in Cripple Creek and already work under way in accordance with his The board of directors agree to turn the mine over to Mr. Hammond, giv-

ing him authority to prosecute the needed development work and leave the matter of dividends from the mine to his discretion. He has agreed to pay in dividends for next year \$488,000, or 10 per cent on the capital stock of the corporation. This is just one-fourth of the amount that has been paid in dividends from the mine since the English ration has owned it. The impression that has gained ac-

The impression that has gained acceptance in some quarters, that the mine is entirely worked out, is denied by Mr. Hammond's report, which shows that the ore body is still capable of producing \$1,000,000 profits. This, if mined during the year, would leave nearly \$500,000 for development work, after the promised dividend had been paid.
Of the reported negotiations for purchase of the Portland mine Mr.

Hammond said: ou may say positively that there has been no sale of Portland raine contemplated by the present owners, nor l there any negotiations for a consolida-tion of the Portland with Stratton's Independence."

# TO FIGHT THE TRUST.

The Denver News Says Two Large Smelter Plants Will be Built.

Denver, Nov. 29.-The News today The rival of the great American Smelter Trust is in course of training ment has been in progress quietly for several months, and yesterday it developed that plans are so far completed that locations for plants are being se-lected and the last touches are being given to one of the most during pro

Three large plants are to be erected simultaneously. One is to be in Denver, a second in Sait Lake and a third will be built at a favorable point in Mexico yet to be named. Each of the plants is to have a capacity for handling au-tomatically 1,000 tons of ore daily, and all are to be built upon practically the

badly impaired.

Some three weeks ago a man from Spanish Fork went to Scofield to work in the mines. He was taken sick with the disease and in ten days' time there were ten cases in the little settlement. The miners, instead of living up to the laws of quarantine, still keep work

ing in the mines, coming directly from the infected houses. There are now sev-enteen cases in the town, and the most stringent measures have been taken to enforce quarantine. Guards have been placed around the infected houses, and armed with winehesters. They have orders to allow no one to pass. Precautions are also taken at Calton, the junction of the little road that goes

to Scoffeld from the main line of the Rio Grande Webern, and no one from infected Utah county towns is allowed Dr. Beatty, the chairman of the State board of health, has not been informed officially of the "smallpox" epidemic,

and does not know what action he will take until he has made an investigation

company, and while coupling cars his of the situation. In the meantime the Pleasant Valley Coal company has ceased bringing coal-to Salt Lake City from the Scofield mines, so that consumers of the coal-here need have no fear of infection by that amputation was necessary. It is further alleged that the accident was mainly due to a defect in one of the

#### AMUSEMENTS.

hamman Frederick Warde will have an auspicious opening at the Theater tonight. The house will doubtless be sold out beore the curtain rises on "The Duke's ester." There has also been a good ale for the matinee of "Othello" this afternoon.

At the Grand, the new comedy en-titled, "The Bell Boy," opens tonight for the remainder of the week.

The Phil Margetts benefit is being worked up in a whole-souled fashion that must be very gratifying to the old veteran. The Theater has been tendered free of cost: the Salt Lake Opera company offered to produce an act from any of the operas in its repertoire; Mr. Margetts chose the second act from "The Chimes of Normandy," and the Witmarks of New York wired that they would allow the orchestration to be used free of cost. Mr. Steph-The Phil Margetts benefit is being tion to be used free of cost; Mr. Steph-ens proffered several leading singers to represent the Tabernacle choir: Prof. McClellan volunteered his services for piano solo; Mr. Weihe said the Thea-er orchestra would not be behind hand ind all the attaches of the house have vent is set for Friday, Dec. 7.

# ABUSED THE OFFICER.

Bartender at Terrible Swede Saloon Gets Himself Into Trouble.

Last night, about 10:30, Officer John Hempel, discovered a couple of girls, 17 and 18 years of age, respectively drinking wine in the "Terrible Swede saloon. They were pretty well under the influence of liquor when Officer Hemple entered the place. When he called the bartender's attention to the fact that he was violating an ordinance by allowing the girls to be in the place, the dispenser of drinks, whose name is William Cummings, intimated that it would be highly commendable for the bluecoat to take a trip to that place, where it is generally understood overcoats are not in vogue. The officer didn't go, but instead, marched Cumming's off to jail. Later he was released on his own recognizance. The case will come up before Judge Tim-mony tomorrow afternoon.

# POLICY OF U. P.

Local Office Will in Future be Under Oregon Short Line.

Election is over and Thanksgiving will soon be here, then comes Christmas, something up all the time, but we are still putting up the old reliable Three Crown Baking Powder; also pure spices and fine flavoring extracts; they will save you money in price and give you better value than the imported; for sale at all grocers; ask for them and refuse all substitutes.

# Hewlett Bros. Co.

SALT LAKE CITY, UTAH. NEW STEAMERS IN USE.

They Will Induce More Australian Traffic from England.

The arrival of the Oceanic Steamship

company's new steamer Sierra in San Francisco a few days ago was witnessed by crowds of people, says the San Francisco Call. The Sierra is one of three new steamers built expressly for the Australian traffic. The others are the Sonoma and Ventura. are each 6,000 tons burden and 425 feet long. Each of them has double bot-toms of the cellular system and they are also fitted with electric and refrigerating plants. They will replace the Alameda and Mariposa, which have been doing service with clockwork regularity for many years. The Sierra will enter the Australian service first on December 12 and it is proposed to have a steamer leave San Francisco every three weeks thereafter. In addition to the interest many Utah peo ple will have in the change because of the missionary work in the South Pait is of interest locally because with more modern steamers running across the Pacific the great Peninsular and Oriental lines of steamers with their routes through the Suez, will like-ly have sharper competition. The Call-tornia route will doubtless receive its share of the heavy traffic between England and Australia. A great many of the bookings for December and Janu-ury are said to be English tourists, who in the trip across the continent, will not fall to see the City of the Saints.

# HONOR OF JOHN MARSHALL

in 1901 being the 100th anniversary of his becoming chief justice of the United States. The national asosciation has sent circulars to every State association throughout the Union, designating the 5th of February next as r. holiday so far as the bar and the bench are concerned, and asking the legal profession to have fitting exercises in memory of the American and eminent jurist.

accordance with that request. President C. S. Varian, of the Utah State association, has issued the fol-lowing notice to the members of the

"On the 5th day of February, 1901, the centennial anniversary of the eleva-tion of John Marshall, to the supreme bench of the United States, as its chief justice, will be celebrated throughout the Union. It is proposed to make the celebration a general one, in which the people will unite with the bar, to commemorate the life and public services of the great chief justice. The bar of Utah is called upon by the National asdation, having the matter in charge. sociation, having the matter in charge, to forthwith take the necessary steps for the observance of the day. I therefore call a meeting of the Bar Association and of the entire bar of the State of Utah, to be held at the Federal court room, in the City of Salt Lake, on the night of Monday, the 10th day of December, 1900, at 8 o'clock, for the number of granuling for fitting and the purpose of arranging for fitting and appropriate ceremonies, to be observed

It is supposed that the program will consist of a public assembly in the afternoon at which an oration will be delivered, and in the evening a banquet to the members of the bar.

#### OBSERVE THANKSGIVING. Appropriate Exercises at Various Churches in the City.

An elaborate service among the denominational churches today was the union service held at the First Methodist church, in which most of the other churches participated. The services began at 10 o'clock, under the direction of Rev. A. H. Henry. A pleasing musical program was rendered after which Rev. W. H. Bagley of the Central Rev. W. H. Bagley of the Central Christian church, was scheduled for a sermon on the subject, "The Bequest of the Nineteenth to the Twentieth

Exercises were also held at St. Mark's cathedral opening with morning prayer and holy communion, and followed with a sermon by Dean Eddy on the subject, "Our Country, Its Prospects, Perlis and Possibilities." Mass was observed at St. Mary's cathedral at 8:30 this morning.

# TABERNACLE CHOIR

Will meet for rehearsal tomorrow night at the Tabernacle instead of tonight. A full attendance is desired E. STEPHENS.

#### during managament WITH THE JUSTICES. grown warman warm

Yesterday the case wherein Attorney A. W. Casey is suing William Crowther to recover the sum of \$35, alleged to be due him for attorney fees, is being heard before Justice Kroeger. Some menths ago, Crowther was sentenced by Judge Timmony to serve a long term for assaulting his (Crowther's) father. The young man employed Attorney Casey to secure his release, and it is alleged, he afterward lease, and it is alleged, he afterward refused to pay him.

The personal damage case in which A. Stalth, a pawn broker, was sued for \$295 for striking O. C. Hansen, was yesterday afternoon transferred from Justice and the control of the control o tice Nielsen's court to Justice Pardee's. The case was tried and the court de-cided in favor of the plaintiff, and ordered Smith to pay him the sum of \$100 When the case was in the police cour several weeks ago Smith was fined \$50 for assaulting Hansen.

#### WILL KILL BY THE SCORE. The special correspondent of the Lon-

don Times, who has attended the

French military maneuvers, had an opportunity of seeing the much-vaunted new seventy-five mm. quick-firing gun at work. He says: "Each gun, besides its limber, has an ammunition vagon. When in column of route the ammunition wagon and the gun move Lawyers and Judges Throughout the
Land to Celebrate His Memory.

The American Bar Association has established what is known as John Marshall's day on February 5th, that date in 18th location the sum and wagon unlimber abreast of each other and the limbers of both galeach other and the limbers of both galclour to cover. If the gun bers 'action front' the wagon unlimbers action rear, and vice versa. Nos. 5, 6 and 7 immediately tilt the wagon up. disjoint the pole so that it doubles down to the ground and open the top shutters, which fall back from a center fastening and make a shield, behind which the three gunners kneel. The fixed ammunition is in a rack before them, each wagon holding eighty rounds. As the gun and wagon are now wheel and wheel abreast. No. 5 has simply to hand each round to No. 2, who is kneeling by the trail prepared

"And now as to the gun itself. As far as I could judge, while standing in the battery, the pneumatic buffer which takes the recoil is part of the gun. Certainly when fired with blank the only movement apparent is the running back of the gun itself on a sliding seat underneath the trunnions. The whole of the breech end of the gun seems seated in this heavy socket. A brake, which is lowered on coming into action, takes part of the recoil, as well as a spade affixed to the end of the trail. Before the gun is laid the trail is raised to an angle of forty-five degrees and brought sharply to the ground. This might be to insure the settling of the spade, but from the sound it makes and the fact that after the gun team has been standing fast for some time the operation is repeated before again coming into action I am inclined to believe "And now as to the gun Itself. As far ing into action I am inclined to believe that it is a mechanical means by which that it is a mechanical means by which some pneumatic buffer is loaded. This much is certain, that once the trail has been raised, the brake adjusted and the spade imbedded the gun carriage never moves again though twenty rounds are fired in rapid succession. The gun only runs back. In this the mechanism is far in advance of the spade action of the Vickers-Maxim carriage, in which both gun and carriage run back on the spade for several inches.

"The breech action of the French gun is a marvel of simplicity. The breech

is a marvel of simplicity. The breech opens with a single action, the whole of the block revolving from left to right. The reverse action loads the piece, the motion of opening extracts the case and throws it clear. No. 3 opens and closes the breech in two motions, while No. 2 loads. No. 1 attends to the laying of the gun—once laid any alteration in range made by turning a hand screw which is fitted an indicator and dial. It would be possible to fire thirty rounds a minute with the utmost care. But hitherto during the maneuvers no rapid fire has been attempted. The gun is provided with a light bullet-proo-shield, so that when in action the fouen working the guns are under while, as was stated before, the Nos. 6 and 7 kneel behind their ammunitio wagons and are also completely screened."

# SHIP'S LIGHTNING RODS.

All big vessels are provided with copper lightning rods, which run from their mast heads down to the copper

# A FURNACE'S BREATHING. The furnaces of an Atlantic liner will consume no less than 7,500,000 cubic feet of air an hour.
