

UNIVERSITY OF UTAH.

"The Motion of the Solar System through Space" is the subject of a public lecture to be given in the Museum building, university campus, next Tuesday evening, Oct. 20, by Prof. W. W. Campbell, director of the Lick observatory. Prof. Campbell is considered to be the best authority on astronomy in the United States. This is a rare opportunity for the citizens of Salt Lake to hear this noted professor. His lecture will be illustrated with stereoscopic views. It is given under the management of the University of Utah. Twenty-five cents admission will be charged to defray the expense of the lecture.

The Rev. W. M. Paden addressed the students at chapel on Wednesday. He gave an interesting account of his recent trip to the Grand Canyon of the

place on Saturday, Oct. 31, when the University team will line up with the eleven from the University of Denver.

Coach Holmes has received a letter from the University of Wyoming at Laramie asking for a game. The offer may be taken if Wyoming will play a return game at Laramie.

A number of city and county teachers have applied for a Saturday course in "Introduction to Philosophy." If a sufficient number apply the course will be given by Prof. Bennion. Those wishing to take this course should communicate with Prof. Bennion.

Last night Mr. and Mrs. John Z. Brown entertained the old Natty Two Normal Quartet club at their home, 343 Ninth East. The evening was spent in singing old time class songs and talking of school day remembrances. Refreshments were served at 10 o'clock. There were present Lorenzo E. Elgren, J. Fred Anderson, Jay R. Smith,

paper is well written and neatly arranged. One page is devoted to cartoons. The reading matter is subdivided into university, athletics, student organizations, college world and notes and personals. This is the best number of the college paper that has appeared for some time.

SALT LAKE CITY SCHOOLS.

The Union school, under the supervision of Principal W. S. Wallace, is to have a free school library. The scheme has been in progress of development for some time, and now the students are to enjoy a neat collection of books and periodicals, which will be found in a commodious room on the second floor of that building.

The idea of having artistic corners seems to have taken possession of some of the schools. The Washington has added to its Indian curio corner a South Sea Island collection. Patrons have

teachers of the seventh and eighth grades on "Arithmetic" next Thursday at 4 p. m. at the Bryant school.

Miss Pollock inspected the work of the primary grades of the Fremont last Thursday and Friday.

A very interesting lecture was given this week at the Summer by Miss Rachel Edwards, on "Number Work."

Miss Critchlow, now on a year's leave of absence, starts next week for Ohio and other points in the east. It is very probable that the lady will resume her work in German at the High school next year.

The manual training boys of the Grant visited Silver Bros. iron works Friday afternoon. They are now studying differences between hand and machine work.

Miss Pollock holds a meeting for primary grades teachers next Wednesday.

Fifth grade teachers meet Mr. Wetzel at the Fremont next Thursday.

L. D. S. UNIVERSITY.

C. B. Newton, the noted American humorist, will entertain the students next Friday afternoon.

Jedediah Stokes has gone into business for himself, but still comes to classes two hours each day.

For the first time, a course in mechanical drawing is now given in the high school. Instructor Maeser, the teach-

BRIGHAM YOUNG UNIVERSITY.

Provo-The academy sent a delegation of nearly a hundred students and teachers to hear Nordica last Wednesday night.

Owing to stake conference last Saturday and Sunday, the Sunday normal school, and also the domestic instruction in the evening were postponed.

Mr. Warren Foster of Salt Lake City, lectured to the Polytechnical society last Friday night on "Government Ownership," and made many converts among the students to some of his social theories.

Mr. Thomas, advance agent, has just made a contract whereby the academy secures an evening's recital from the famous humorist, Prof. Newton. The date is placed for Saturday, Oct. 24.

The students of Wasatch state were called together at a special meeting Monday afternoon for the instruction from Elder J. C. Jensen of the stake presidency, and a missionary companion appointed to labor in their interests.

President Cluff took occasion to give the students an instructive talk at devotional exercises the other morning. His theme was the need of curtailing the tendency to social relaxation in the form of dances, and the cultivating of interest in lectures, concerts, and high class entertainments of an intellectual character.

General Alford, the veteran soldier of the Lost Cause, spent an hour with us last Monday morning. Although suffering with a cold, the general talked interestingly to the students for half an hour, relating instances in his varied career, which elicited the hearty applause of the students.

The basketball team is getting in its work in fine style. A number of old players are still at school, and the new material from which to make up the balance of the team is of a superior kind. Judging from the first game, which was played last Saturday afternoon in the gymnasium, the prospects for interesting contests with other teams of the state are not likely to lag at this end of the basketball field.

Mrs. Treat finished a series of five lectures last night to a large audience of students and citizens. The following were her subjects: "Relation of the New Education to the Home, the School and the Church," "The Twentieth Century Girl," "Discipline," "Management," "Stories of the Right Kind—How to Tell Them," "Love Shown Through Service." Mrs. Treat's audience grew larger each successive evening, and she will long be remembered alike for her advanced thought and genial personality.

The school of music assisted by the Tabernacle choir, gave a concert in the theater last Saturday night to a very large audience, who much enjoyed the numbers, composed both of instrumental and vocal pieces, and although the audience clamored again and again, no encore was given. An admirable feature on the whole, and one likely to sharpen popular appetite for music. Miss Pearl Boren, a recently discovered soprano of Provo City, perhaps carried off the laurels. The proceeds went to the Fifth ward meeting-house fund.

Prof. Alfred Osmond lectured to the literary society last Saturday night on Hamlet, illustrating his talk with impersonations. One effect of his lecture is an increased desire to read Shakespeare on the part of the students, several calls at the library for Hamlet having been made during the last week.

Mr. Frisby and family, late of Snowflake, Arizona, have settled permanently at Provo with a view to securing the educational advantages of the academy. Mr. Frisby called at the president's office Monday morning to secure entrance to his son into the high school.

BRIGHAM YOUNG COLLEGE.

Logan, Oct. 16.—After three weeks' run, everything at school is again in working order. All the students are working earnestly, and with a determination to take away next June, the usual good training that is eminently characteristic of the Brigham Young college.

There are large classes in all departments, and especially in the rush great and vigorous for the courses in domestic arts, in which additional sections, from what was formerly anticipated, have been necessarily organized in order to accommodate the large number of students.

The manual training department is also demonstrating its great value very impressively. The hum of the carpenter shop never ceases from 8 o'clock in the morning until 5 o'clock at night. In addition to the many students beginning carpentry this year for the first time, there is a large number taking up the work for the second year.

Special students in music have come in, in great numbers. The talented musicians offering training in this institution will be crowded to their utmost, both during the coming year. Prof. Robinson, violinist and Mr. Oliver, pianist, both have their time now well taken up with special students.

The choir is now installed on the rostrum, and entertains the faculty and students every morning in devotional songs, hymns and anthems. The choir is extra large this year, and could have been much larger, had there been room for the many applicants who desired this kind of training under Prof. Robinson. The prospects bid fair to some extremely good things coming from the choir this year as was the case last year.

The Brigham Young college military band meets regularly for practice. There are many of the old members again in their places, and the first practice was held last week.

The evening missionary class is increasing in numbers, many of the old members having returned. The sessions are held Mondays, Wednesdays and Thursdays in room 35, B. Y. Memorial building.

The business department is deeply indebted to the Commercial club for the excellent addresses delivered by its representatives, Hon. Geo. C. Langford and Judge F. S. Richards, last Wednesday afternoon. If the first meeting is a criterion of the value of these visits of members of the Commercial club, the gatherings will prove a pleasant and beneficial part of the season's work.

Thirty-five students have registered in the sewing and dressmaking department and are doing good work. One first-year student has already finished her book of specimens of fine needlework, and several others are almost as far advanced. Five of the second-year students are making suits of woolen goods. All the costumes are designed and cut by the students. No bought patterns are allowed in the work-room.

The "class of 1905" met on Thursday. The organization was completed and the following program rendered:

Vocal solo, Edith Grant
Recitation, Helene Pratt
Piano solo, Elizabeth Thomas
"Past and Future of Our Class," Desha Grant

Among the visitors of this week were J. Witt Telford, recently from a mission; Miss May Hamilton, graduate of '91, now teaching at East Mill Creek; Miss Mary Clayton, graduate of '93, now teaching at American Fork; Miss Lulu Hansen, a former student, now teaching at Union; Mayor Jex of Spanish Fork, and President J. W. Knight of Raymond, Canada.

use sounded like the music of well experienced musicians. The first public music to be given by the band will be given next Saturday evening in the assembly hall.

President Linford has been warning the students of late against improper use in taking their food and especially in the use of drinking water. It is the purpose of President Linford to have the students escape the dread typhoid disease, which is now quite prevalent in some parts of the state.

Class organization has been effected in all the classes now in school. Some of the classes meet regularly. It is the purpose of each one of these classes to put up the best material in college. A golden cup is the reward received by the class which furnishes the best material each year. The class of 1905 now holds the cup, and they say they intend keeping it, while other classes are just as zealous to win it from the '05's.

On Saturday night, Oct. 17, the faculty will tender a reception to the students. A program will be rendered in the evening between 7:30 and 9 o'clock, in which members of the faculty and of the board of trustees will take part. After the program has been rendered, dancing will take place, and during the evening luncheon and refreshments will be served. One of the most important features of the evening will be the presence of President Joseph F. Smith. It seems from the number of announcements made in devotional exercises of late, that the students are preparing for the event, by getting their class banners, badges, etc., in readiness.

It is now plainly anticipated that when the missionary students arrive to take up their courses, that the attendance this year will be between 100 and 200 greater than last year. There is now a greater number of students in school, without counting the missionaries, than there was last year at this time, including the missionaries.

Clarence Booth, one of Utah's accomplished basketball athletes, and who played an important part in the college team last year, has been visiting in school for a few days. The other boys of the team have been trying to prevail on Clarence to remain and take his old place, but a call for a foreign mission will take him away in the near future.

Miss Bush, instructor in English, is still away from school on account of the serious illness of her brother.

WEBER STAKE ACADEMY.

Ogden—We have unusually large classes in rhetoric and geometry this year.

Prof. Lind conducted a class in physics at the high school last week. Mr. Crandall having been called to California to attend the funeral of his father.

The registrar reports that the registration of this year's fifth week is far in excess of the sixth week of last year. This is a good sign.

The lecture committee is in correspondence with Prof. Clark of the University of Chicago, and no doubt it will result in the able lecturer and dramatic reader's being engaged to give a series of his popular and instructive readings under the auspices of the academy this year.

A very happy feature of devotional exercises was introduced this week. Fifteen minutes is very profitably spent by practical talks from our representative men, and vocal solos from Ogden sweet singers. Those of the former who took part this week were President Shurtliff, Bishop McQuarrie, Bishop John Watson and Judge Rolapp; those of the latter, Mrs. John Culey and Mrs. Mary Farley; this new move is working nicely.

Night school commenced this week with an enrollment of 35 regular students and missionaries. This is a most flattering commencement. All the classes are under good headway. The faculty feel very much encouraged with this attendance and especially with the quality of the students.

AGRICULTURAL COLLEGE.

Logan.—President Kerr was in Salt Lake on Wednesday.

Prof. Merrill received 100 lantern slides illustrating the manufacture of commercial fertilizers, from the Chilian Nitrate Works, at New York. These will be used by the professor in his work in agronomy.

Profs. Wilson, Engle and Bexell, accompanied by Mrs. Engle and Miss Grace Fisher, ascended Logan Peak last Monday. The trip is a difficult one, but they all agree that the magnificent view of Cache and Salt Lake valleys amply repays for the exertion necessary to make the ascent. The mountaineering ability displayed by the ladies certainly entitles them to membership in an Alpine club.

Miss Moench's physical culture club is so large as to fill the gymnasium.

The committee on publications have revised the list of periodicals to be kept on the files in the reading room.

The copy for the October number of Student Life is now in the hands of the printer. This publication has been enlarged to a 32 page magazine. The editors will strive to make it the best college publication in the west.

The A. C. Woman's club met with Mrs. Willard Langton last Monday. Mrs. Ooder was the leader of the discussion on Phoenician and Egyptian sculpture.

Profs. Bexell and Ostien were on the program for addresses at a county Sunday school convention held today.

Prof. Robinson delivered an address at the Fourth ward reunion last Tuesday evening.

The tickets were put on sale last Wednesday for the Lyceum course of entertainments.

The attendance committee commenced work last Tuesday with the amended rules. This work under the careful supervision of Prof. Wilson will be of benefit to the students and the college.

The bureau of irrigation investigations of the United States department of agriculture will co-operate next year with the experiment station of the college in its irrigation investigations and will meet one-half the expense of the work, thereby materially aiding the college.

The second lot of machinery, consisting of eight forges, an electric motor and 16-inch shaper has been unloaded during the week.

The exhibits have just been returned from the state fair. Several inquiries have been received concerning the plans and cost of the new carpenter's benches which were on exhibition.

There are 50 students registered in carpentry, 40 in forging and the machine shop is filled to its utmost capacity. The additional room in the mechanic arts department cannot be completed too soon to suit Prof. Johnson.

The football squad has been practicing each evening during the week in order to get in form for the game with the university today.

Stop-over at Niagara Falls.

Without extra charge is permitted on all through tickets to New York or Philadelphia via the Lehigh Valley Railroad.

Effects Children Wonderfully

If your child is restless at night, finds its teeth, wets the bed, is constipated, craves indigestible food or is fretful and peevish, you can be sure it has Worms. KICKAPOO WORM KILLER will expel them and restore the child's health. These tablets are pleasant to take and won't harm the most delicate child. 25c. a box at druggists, or by mail from us. Your money back if not satisfactory.

KICKAPOO INDIAN WORM KILLER

is endorsed and recommended by thousands of mothers.

We have over 200 orphans in our Asylum, and have been using Kickapoo Indian Worm Killer with wonderful effect. I recommend it to all parents as a great medicine for children. We should not be without it under any circumstances. Mrs. C. BIGELOW, Matron Chicago Orphan Asylum, Chicago, Ill.

OFFICERS OF THE HONORABLE ARTILLERY COMPANY OF LONDON.

OFFICERS OF THE HONORABLE ARTILLERY COMPANY OF LONDON.

Great are the Honorable Artilleryists of London. Their prowess has been charges peculiar to the American plan of hospitable welcome. The reception and the itineraries calls for visits to Washington, Arlington and other places

proven at Rhode Island clambakes, Sherry banquets, and in other culinary of these doughty warriors in Boston and New York has been most cordial before the company moves on Canada.

Colorado in Arizona. The students were also favored with a solo by Miss Shepard.

The freshman engineers celebrated last Saturday's football victory by painting the base of the flag pole on the campus with crimson and silver, the university colors. On Wednesday their flag was hoisted to the top of the flag staff, but was carefully taken down in the evening for fear it might fall into the hands of the boys of the normal school.

On Wednesday afternoon Dr. Talmauge took his classes in geology and physical geography to the mouth of City Creek canyon to study the delta formations there.

At 8 o'clock this morning the students ran an excursion to Logan where the University eleven is waging football warfare with the A. C. A. squad this afternoon. They will return tonight leaving Logan at 8:30.

The University Prep. football team is now completely organized with Davis as captain. Next Saturday they play the Ogden High School on the University campus. They will play a regular game here on Nov. 14.

The first big game here will take

Harold Goff, A. R. Gardner, and Joel R. Parrish.

The Zeta Gamma held its first program yesterday. The question, "Resolved, That People Possessing No Property, Should Not Be Allowed to Vote," Geo. Larson and John Thurman spoke for the affirmative and Nicholas Morgan and H. P. Syndergaard were the negative speakers.

Mrs. Burmister and Mrs. Walker visited the University on Wednesday.

Last night the third year normals gave a ball in the assembly room of the Museum building. The committee in charge were Misses Ruby Garnett, Ethel Simons, and Florence Jonason, and Messrs. N. H. Morgan, Lee Marshall and W. E. Davis.

At their recent department meeting the county superintendents unanimously voted to ask the university to keep open the normal training school during a part of the summer vacation, thus giving teachers an opportunity to get professional training.

The first number of the Chronicle was issued on Tuesday. The paper is of magazine size. On the cover is an original design representing school life. The

been very liberal in aiding the teachers of such rooms to make this year's success.

Much interest is shown by city teachers in their German class which is to hold forth each Friday at 4 p. m. in the High school building for the remainder of the school year.

Mr. Bates of Andersonville prison fame, lectured to an audience of 200 school children of the Union district in the High school building last Wednesday afternoon. His pathetic and stirring stories of the great struggle in the south, and of his personal experiences in eight of the Confederate prisons, were listened to with rapt attention.

The following official meetings were held during the past week: Tuesday for second grade teachers, by Mr. Wetzel at the Fremont; and for teachers of beginners, by Mr. Parratt, in the city and county building. Mr. Parratt gave teachers outlines for the coming week, Thursday, for third grade teachers, by Mr. Wetzel; for first grade teachers, by Mr. Parratt.

Supt. Christensen will address the

er, is delighted with the showing already made. Eleven young men, nearly all mechanics, are registered for the work.

There was a fine program on Wednesday. Prof. Hinckley made a capital talk and Miss Edith Grant sang two sweet solos.

Every desk upstairs in the large book-keeping room of the business college is now occupied by the student accountants.

Night school this year is the best and largest in the history of the university. Sixty students entered the first night and nearly that many more entered during the week.

The shorthand department is a veritable hive of industry. It is a business community where each student realizes that application and tenacity are required, in order to succeed where competition is so severe.

It is learned from the preparatory department that those students formed a class organization last Monday, electing Willard Bullock president, and Macbeth Murphy secretary; that Andrew Thompson met with an accident in the work shop this week, cutting the fleshy part of his thumb with a chisel; that Miss Mary Grant, who has lately returned from Japan, gave a very interesting description of a Japanese city in the geography class on Tuesday, and that it has been decided by the faculty to give certificates of promotion to those who successfully complete the studies given in the preparatory course.

The evening missionary class is increasing in numbers, many of the old members having returned. The sessions are held Mondays, Wednesdays and Thursdays in room 35, B. Y. Memorial building.

The business department is deeply indebted to the Commercial club for the excellent addresses delivered by its representatives, Hon. Geo. C. Langford and Judge F. S. Richards, last Wednesday afternoon. If the first meeting is a criterion of the value of these visits of members of the Commercial club, the gatherings will prove a pleasant and beneficial part of the season's work.

Thirty-five students have registered in the sewing and dressmaking department and are doing good work. One first-year student has already finished her book of specimens of fine needlework, and several others are almost as far advanced. Five of the second-year students are making suits of woolen goods. All the costumes are designed and cut by the students. No bought patterns are allowed in the work-room.

The "class of 1905" met on Thursday. The organization was completed and the following program rendered:

Vocal solo, Edith Grant

We Will Buy

A 50c. Bottle of Liquezone and Give it to You to Try.

Liquezone—liquid oxygen—is the only product that can kill germs in the body without killing you. No man knows any other way to destroy the cause of any germ disease.

It is new to America, and millions who need it don't know of it. For that reason we make this remarkable offer. We will buy the first bottle and give it to you if you need it. We
