they had been suffering for want of miners for the past six months. Now, we know many good miners have been looking for work during the past six months and several have left their families and traveled many miles to get work. The fact is they could have got that number of men at any time during the past six months, and many more, good coat miners in this State, if they had been willing to pay miners' more, good coal miners in this State, if they had been willing to pay miners' wages. Some good citizens think it is right to make the miner compete in his labor with the Chinaman or Japanese, or stand aside and let them do the work. This, I think, is wrong, Pro-tection should protect labor. Capital can protect itself. This may not apply to the Sterling Coal company, but it does to companies in general that seek cheep labor. cheep labor.
