S. Tucker of New Haven, Conn. The sale was made for \$200,000, the last \$50,000 being paid over on Saturday, as forecasted in last Friday's "News." The dividend declared today amounts to \$157,500, or 31% cents a share, vill be paid at once to some 15 shareolders of the St. George Copper com onny. Those who are most heavily nterested are W. F. Snyder, Grant Snyder, Gideon Snyder, P. L. Kimberly, Henry Outzen, Clarence K. Mc-Cornick, F. C. Rutan, Sam C. Park, L. O. Hoffman and O. E. Hoffman.

Boss Tweed Shipments.

P. J. Donahue has just returned from after inspecting the Opex and Boss Tweed properties. Nothing is being done at the former just now but the outlook for a new start being made shortly is said to be very good. The Boss Tweed is responding very nicely to the efforts of Mr. Grundy who has the lease on the mine. Mr. Grundy's ease expires early in September, and he is therefor endeavoring to extract all the ore possible before quitting the workings. The work of sinking a new shaft has ceased and Mr. Grundy is devoting all his time to the extraction of ore from the old workings. About five cars will in all proba-bility be marketed next month, after which the property will pass into the hands of Willard F. Snyder and associates. Mr. Donahue's trip was for the purpose of deciding, on some plan of development for the rest of the season.

Morning Glory Shaft.

The shaft at the Morning Glory property of Tintic is now down 300 feet, at which point a station is being cut to enable the management to crosscut to Quite a heavy flow of water is noticed in the bottom of the shaft but it will not greatly inconvenience the vein is the management until tapped, which will probably be done by crosscutting 30 or 40 feet. Mr. Welr says this work will be proceeded with soon as a sump is ready. from 200 to 250 gallons per minute is expected when the vein is encountered The flow at present is about 4,500 gallons each 24 hours. At this depth the Morning Glory shaft will drain the Homestake, which is being prospected on the 400 level, as the water will not admit of its being worked deeper present. The company is prepared to handle the heavy flow, and as soon as Homestake is drained, prospecting will be followed up on the 500 level.

Examines Copper Claims.

Supt. D. P. Rollfing of the Horn Silver, who is up for Carnival week, reports a great deal of activity in the La Sal mountains, from which he recently returned. A great deal of pros-pecting is there being done and some very encouraging results are being ob-tained. While down in that section of the country Mr. Rohlfing examined some copper prospects for Salt Lake parties located about 20 miles south of Thompson. A series of linked veins are there found which carry good values. The average of the veins is not high, but they show very fair signs of prov-ing up something with greater depth. At present only two 50-foot shafts are found there, but in these some ore is found which assays as high as 25 per cent. Comparatively little prospecting is being done at this point, the main district being farther into the La Sal range of mountains.

RAILROAD STOCKS DOWN.

Union Pacific Goes from 99% Saturday to New Low Mark of 94.

You Deal With But One Concern.

The Burlington route operates its own trains over its own tracks ever; foot of the way from Denver to Chica-

go and St. Louis.

When you buy a ticket over the Burlington, you deal with but one concern. If you have any cause for complaintor think you have, which amounts to the same thing—you do business with but one railroad. You are not told that "we're not responsible for this." or "he shouldn't have said that," or "we'll refer this to our Chicago office."
