

Delivered at the Semi-Annual Conference of the
Church of Jesus Christ of Latter-day Saints,
in the Tabernacle, Salt Lake City, Sat-
urday, October 5th, 1901, by
ELDER ANTHON H. LUND.

Conference a Blessing to the Saints—
The People Should Be True to Their
Obligations—Advantages of a Pro-
gressive Course—The Importance of
Keeping Records.

Countless thousands have found a blessing to the body in Dr. King's New Life Pills, which positively cure Constipation, Sick Headache, Dizziness, Jaundice, Malaria, Fever and Ague and all Liver and Stomach troubles. Purely vegetable: never gripe or weaken. Only 25c at Z. C. M. I. Drug Dept.

The direct line from Denver to the East is the Burlington Route.

It is 30 miles shorter than any other line.

The running time of its fastest train from Denver to Chicago, is 27½ hours. No other train makes faster time. No other train is so uniformly "on the dot."

Burn these facts into your brain. Some day they will be useful to you.

Burlington trains leave Denver 4 a. m. and at 10 p. m. for Omaha and Chicago; at 3 p. m. and 10 p. m. for Kansas City and St. Louis.

Tickets at offices of connecting lines.

TICKET OFFICE.

79 W. SECOND SOUTH ST.

Salt Lake City.

R. F. NESLEN, General Agent.

P. S.—Thro's sleeper to Omaha and Chicago leaves Salt Lake City at 3:10 p. m. daily.

Of Utah. Open day and night. Factory and Warerooms, No. 223 E. First Street, 1 1/2 blocks east of Theater.

and preceding the long series of wars and upheaval in the social condition of the last decade of the nineteenth century and the first two decades of the twentieth century, the trade after a time revived and advanced by steam agency became an arena of competition and a rising in the lower strata of society. A general improvement in social matters began to be effected by applying a little more might, be attached to the letter. Throughout the entire nation public opinion was aroused and the people were compelled and petitions favoring the project were speedily gotten signed by large numbers, and presented to the house of commons. A committee was appointed by the house to examine into the subject in its bearings, before which Rowland was called to set forth the plan of the proposed canal.

ing in there, and inserting the ends in each other, using sealing wax or a stamp to ensure secrecy. Soon gummed envelopes came on the scene, and the names of firms or persons sending the letter was printed, and used instead of wax or wafer. It was some little time before envelopes came into use, and the first noticed for enclosing correspondence; but at first the edges were not generally gummed, and still necessitated the same method of securing them; and the gummed edges were not generally improved until about 1840, when Mr. Pitman, among his other shorthand stationery, had prepared a sheet of the kind mentioned above, of which was lithographed a specimen, and which was stamped with diamonds, mottoes, and which were sold by him and used for securing letters and envelopes.

The suggestion embodied in the pamphlet put forth by Mr. Pitman, was stated, emanated from Mr. Pitman, and occurred in course of correspondence between these gentlemen.

The utility of the new postal scheme was soon realized, and the postal authorities have been such as to call for much more clerical help. One great

Rowland Hill (1796-1878) was born December 3, 1796, at Kidderminster, Worcestershire, England. During his early years his health was infirm and he was obliged to retain a recumbent position; to relieve the irksomeness of his seclusion he adopted the practice of repeating figures and words, and in this way he had reached very high totals, causing him to become an adept in arithmetic and mathematics. At the age of 12 years Rowland Hill began to teach in a school at Kidderminster, Hiltop, Birmingham, to which place his father had removed, and subsequently he had the chief management of the school. The establishment was removed in 1816 to a new building in the Hasley Road, in order to have the advantage of a large body of boys, and for the purpose of properly carrying out the system of education which was the principal feature, which were devised by Rowland Hill and expounded by him in a pamphlet entitled "System for the Government and Education of the Poor." This pamphlet was the first edition of which appeared in 1822, and the second, with ad-

In early years he was tutored in the faith of Swedenborg. In after years he became a firm adherent of the views promulgated by the mystic Emanuel Swedenborg, and for many years officiated as a preacher of that sect to a small congregation in the village of Twerton, in the immediate neighborhood of Bath. He went peacefully to his rest in the last named city on the 22nd day of January, 1857, at the ripe age of 34.

Billions Colic.

H. Seever, a carpenter and builder of Kenton, Tenn., when afflicted with the terrible bilious colic, says that he owes to a near by drug store for something to relieve him. The druggist sent him a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and he does not doubt which effected a permanent cure. This is the only remedy that can be depended upon in the most severe cases of colic and cholera morbus. Ministers of the Gospel are called to recommend it when such a medicine is called for. For sale by all druggists.
