

## TEACHERS FOR COUNTY SCHOOLS.

Increase in Population Demands  
Nine More Than Employed  
Last Year.

## NEW BUILDINGS UNDER WAY.

Names of Those Who Will Teach in  
The Different Districts Through-  
out the County.

The increase in school population in the county during the past year will necessitate the employment of nine more teachers the coming year than the past year, and in some districts it will be necessary to build additional school buildings in order to accommodate the children. County Supt. of Schools Ashton says that the teachers for the coming year have nearly all been decided upon by the trustees of the various districts and the list furnished him is complete with the exception of about a dozen teachers.

Two additional teachers have been employed in Murray, district No. 25, and in East Jordan and Bingham, No. 4. The one additional teacher has been employed in Big Cottonwood, Mill Creek and Farmers. The latter district will build a new eight-room brick school building and new buildings will also be built in Mill Creek, No. 39, and in East Jordan, No. 43. The trustees of Murray, district No. 24, Sandy, district No. 4, and Pleasant Green, district No. 47, are considering the advisability of employing new school houses.

The list of teachers this coming year contains 155 names as against 146 for the past year. The list for as completed by Supt. Ashton, is as follows: West Jordan, District No. 21—Ephraim Gaugh, Esther Pearson, Clara Pearson, one teacher not reported. Union, District No. 23—C. C. Steffen, Lulu Hansen, Lillian Anderson. Murray, District No. 24—R. E. Davidson, Mrs. E. Kliney, two not reported. Sandy, District No. 25—G. M. Mumford, Margaret Edwards, Alice Stephens, Alice Coffey, Lillian M. Brown, Mary J. Helm, Elizabeth Worrell, Mrs. Pitt.

Murray, District No. 34—Erasmus Hove, Minnie Neilson, Matilda Watts. East Jordan, District No. 37—Clifford J. Goff, Annie Hazeltine, Lottie Cottrell, Miss Ellingson.

Big Cottonwood, District No. 28—Taylor Brockbank, Frank Brinton, Rebecca Slay.

Mill Creek, District No. 29—James E. Sugar, Mrs. Della Pendleton, Libbie Edwards, Christina Olsen, Virginia Holt, Eliza Berkshaw, Jessie Trenam, Esther Bull.

Mill Creek, District No. 30—James M. Quinn, Ida Eldredge.

Mill Creek, District No. 31—Lewis Clark, May Hamilton, Carrie Sapling, Emma Holberg.

Highland, District No. 32—Hannah Jensen.

Herriman, District No. 34—Thomas Howells, Anna E. Stohanske.

South Jordan, District No. 35—A. R. Gubner.

Mill Creek, District No. 36—James L. Back, Little Ship, Mabel M. Burns, J. D. Cummings, Augusta Wilschkefski.

Big Cottonwood, District No. 37—H. J. Goff.

Taylorville, District No. 38—Emma J. Richards, Lizzie Spencer, Preston J. Webster, Miss Gardner.

Mill Creek, District No. 39—Hans E. Steffen.

Farmers, District No. 40—Edwin S. Smith, Minnie Margrets, Verne Patterson, Ethel Smithson, Ray Bradford, Fanny Brown, D. S. L. McCorkle, Zoe Wills, Mary Louise Gray, Abbie L. Davidson, Florence S. Horne.

Sandy, District No. 41—Joseph Reese, Riverton, District No. 44—John Hansen, W. T. Pinder.

Hunter, District No. 50—N. U. S. C. Jensen.

Battleville, District 57—J. W. Smith, Alice Brington.

Gardner, District 59—L. J. Brown, Buff Dale, District 61—Christopher C. Smith.

South Taylorville, District 64—W. W. Wilson, Solie Howell, M. C. Chung, Bingham, District 65—C. L. Chugryman, Minnie Holsten.

**A Sale for Men**

A hot weather snap is offered in men's hosiery at our store. All broken lines and oddities at 35 cents a pair; time for a dollar.

BROWN TERRY & WOODRUFF CO., 166 Main St.

**SCANDINAVIAN OUTING.**

Two Thousand People Enjoyed Themselves at Lagoon Yesterday.

Despite the threatening attitude of the weather, some 2,000 souls went to Lagoon yesterday on the occasion of the Scandinavian midsummer excursion to that resort. Three hundred of these were from Ogden, while the balance were principally from Salt Lake. During the day a program of sports was carried out, the winners receiving valuable prizes. The first prize for the gentlemen's boat race went to Gus Backman of Farmington, and the second to Bernard Nelson of Ogden. In the ladies' boat race Lila Backman of Farmington won the first prize. Josephine Anderson of Weber county the second prize. An exciting feature of the boat race was the falling into the water of one of the contestants, who was promptly fished out, none the worse for the experience. The program also included foot races and a Maypole dance. The oldest lady on the grounds was Martha Hazen of Salt Lake, 83 years, who got a handsome rocking chair, while the oldest gentleman was John Bergen of Salt Lake, aged 82 years, who received a year's subscription to the Biken.

At 5 o'clock there was a program of songs, speeches, etc., closing with a laughable pantomime. Those who were present were J. M. Stodahl and Andrew Jensen of Salt Lake, and N. C. Fry and Carl E. Peterson of Ogden. The musical numbers included a splendid solo by Hagar Anderson of Scandinavian Musical and Dramatic association rendered several selections, much to the delight of all present. The day was one of thorough enjoyment to all concerned, and in this as in other respects, the outing was a grand success.

**SHOULD HAVE A RIG.**

Mayor Wants Council to Grant One to City Sealer.

Mayor Morris has again voiced the report of the committee on markets of the city council in relation to giving the city sealer authority to hire a horse and buggy five days each week. The mayor be-

## TO PUSH CATHEDRAL.

Prominent Catholics Pledge Financial Aid in Its Construction.

A number of prominent Catholic citizens met last night with Bishop Scanlan with a view to hastening the completion of the new cathedral on east South Temple street.

In the group were Senator Kearns, Joseph Geoghegan, James J. Lynch, J. J. Daly, Joseph Deedericks, and John McChrystal. Bishop Scanlan has always been much opposed to running into debt, and consequently the progress of the cathedral has been slow. But the wealthy citizens who recently met with him assured the bishop that funds would be forthcoming, and consequently there need be no further delay. So the work of construction will be resumed with renewed vigor, and the hope is expressed that the church will be ready for occupancy next Easter Sunday.

The total cost of the cathedral will be about the figure mentioned several times in the "News," viz., \$300,000. The furnishings will be of the very best. An incentive to speedy completion is an entirely inadequate facilities at the old church on Second East street.

## POSTED THE HOLDUPS.

Butte Officer Unwittingly Assists Robbers to Get Away.

(Special to the "News.")

Butte, Mont., June 24.—Three masked men early this morning walked into the Dakota saloon, lined four men and proprietor W. B. Evans up against the wall, and while the victims' hands were high in the air, went through their pockets, securing about \$100.

James Daly, a Butte miner and machinist, discovered the robbers at work, and in a nearby saloon he hastily telephoned for the officers. The police through mistake called up the saloon where the robbery was in progress, telling one of the holdups who answered the telephone that they (the police) were coming. The bandits escaped.

**"SUB-FOREMAN" DEFINED.**

Telephone Arbitration Committee Settles Recent Strike Difficulty.

The telephone arbitration committee decided last evening that a sub-foreman is any one who receives the order and is held responsible for the time of the men, and gives an account of materials used. Furthermore, men are to work until 6:30 p. m. to complete tasks in hand, but other overtime shall be paid for at the rate of time and a half. Linemen going into the country from town are to have their expenses paid for four days or less, but if absent over that time they must pay their own expenses.

## HOW IRRIGATION AIDS INDUSTRY.

Eastern Manufacturers Realize Its Importance to Them as Well as to the West.

## UTAH AS AN ILLUSTRATION.

Small Irrigated Farms Will Work Out To Greatest Good to the Community.

Special Correspondence.

Washington, D. C., June 20.—Is the country at large interested in the irrigation of Utah, in a material sense?

Eastern papers and magazines print articles descriptive of the big irrigation projects and enterprises in the west, illustrating them with photographs of dam sites and diagrams and plans of the proposed works, and with entertaining stories showing the increase of wealth which will come to the section through the creation from the desert of perhaps a thousand new farms, while editorially they may favor the irrigation policy and commend it as a means of opening new lands to supply farm homes for our constantly increasing population. But how often do they draw the close and intimate relation which exists between an irrigated agricultural community in the west and its business complement in the east—the eastern manufacturer who supplies the western farmer with his farm implements, his tools, his barbed wire, even nails with which to construct his house and barn, to say nothing of the thousands and one articles of farm and domestic economy, which he continually uses?

Eastern wholesale business men, jobbers and manufacturers, are, as a class, much better informed as to the practical results of irrigation than any other class, in this section.

AN EASTERN MANUFACTURER'S VIEWS.

A large eastern manufacturer said to me recently that while he had never seen water running in an irrigation ditch, and had but a vague idea as to how crops were grown under irrigation, he believed that he was fully alive to the bluntness and importance of the question when viewed from a national standpoint as a factor in the internal development of the United States. "At least one-quarter of my business," he said, is done with western communities—west of what you term the arid line, and most of these communities are directly supported, as I understand, by irrigation. If it were not for this artificial method of making crops grow the prosperous farmers who buy my goods would never be where they are and the hamlets, towns and cities which are the centers of my line of goods would not exist. I have seen into existence or at the moment would be but mining camps. Take Salt Lake City, for instance, and the other commercial distributing points of the Salt Lake region. Shipment of my line of goods goes regularly to these points, and from what I know of their demand for eastern manufacturers of different sorts, you make inquiry of any of the Salt Lake retail establishments which sell plows, or cultivators, or wagons, or carriages, or clothes, or hats, or shoes, or practically anything which comes under the head of "manufactured articles" you will be able to trace their origin back to the east.

BELIEVES IN IRRIGATION.

"I am a firm believer in the work which is being done in presenting to build up farm communities on the desert and I should say that the small irrigated farm, such as you have in Utah and in southern California—another good market for my goods—will be the product of the one which will work out to the greatest benefit to the community. Every new agricultural community which is built up, in whatever part of the country it may be, stimulates a complementary manufacturing activity in some other part. This creates business. Money moves from point to point. We send our money west to pay for the things which we buy from the west and the west sends its money back to us for the class of articles which we produce and which it does not. Traffic, too, gets its fair share of the increased business. I have heard that Utah can easily place an additional million acres under irrigation, through the use of the waters of your rivers which the geological survey engineers propose to open up behind big dams. The throwing open of such an acreage of productive land would be a signal for a scramble among eastern manufacturers to secure the immense immediate business result. Of course I understand that this irrigation development will be a comparatively slow process. While personally I would like to see a million acres placed under irrigation in the next year, if possible, for I would then enormously increase my business, still a slower development would undoubtedly be the best for the country. It would cause a steady and substantial growth, I take it, both in the west and in the east."

GOVERNMENT UNDERTAKING.

The government irrigation works are far reaching. According to the recent statement of the secretary of the interior, designating various specific projects through which the work of constructing of which will cost some \$27,000,000, the adjoining states of Wyoming, Idaho and Nevada will benefit largely by the irrigation act and in addition to the immense immediate business which the great government irrigation plans now being worked out for Salt Lake valley would bring to Salt Lake and vicinity, that city seems destined to become a great distributing center for a region greater than the entire middle and New England states.

UTAH IRRIGATED FARMS.

The unit, or average, according to the census figures, for the Utah irrigated farm is 27 acres, and while the farms under the government projects will average greater in extent than this they must necessarily, under the national irrigation act, all be small farms. They cannot be more than 160 acres each, while it is within the discretion of the secretary of the interior to reduce the unit, under any project, to as low as 40 acres. The Mindoka, Wyo., project has already been determined upon at 80 acres, and the carrying out of the government work promises great aggregations of small holdings, lived upon and farmed by their owners.

## TESLA'S "WORLD TELEGRAPHY" SCHEME.

Unless Nikola Tesla, the famous electrician, is greatly mistaken in his estimate of the possibilities of his latest invention, we shall soon be speaking through the air to friends thousands of miles away. In addition, manufacturing plants in San Francisco will be using power transmitted through the air at almost no cost from the waterfalls of the Rockies. This "world telegraphy" scheme of Mr. Tesla is almost terrifying in its suggested potentialities. According to the inventor himself, "a telegraphic message, almost as non-interferable as thought, can be transmitted to any terrestrial distance. The sound of the human voice, with all its intonations and inflections, can be faithfully and instantly reproduced at any other point on the globe, and the energy of a waterfall can be made available for supplying light, heat or motive power on sea, land or high in the air." The illustration shows the mysterious tower now under construction at Wardenclyffe, N. Y. This will be the first of the transmitting stations. It will be operated by a 100 horsepower engine, which, however, by certain devices will be so "stepped up" as to develop 100,000 horsepower. A successful outcome for Mr. Tesla's experiment would establish his right to be reckoned among the great geniuses.
