## PRICE OF GOLD.

Corrected daily by DENNIS NATIONAL BANK.  
SALT LAKE CITY, March 20, 1874.  
Buying at 111. Selling at 112.

## SPECIAL BUSINESS NOTICES.

MISS KATHERINE ROGERS as "MIMI," in Boucicault's great five-act drama of that name, at the Theatre to-night.

AN OUTGROWTH OF OTHER DISEASES.—Catarrh sometimes exists alone, but is more frequently a symptom of other diseased conditions. The following letter explains it:

COLLINGWOOD, ONONDAGA CO., N. Y., Jan. 25th, 1872.

Dr. E. V. Pierce, Buffalo, N. Y.

DEAR SIR.—Allow me to give a brief history of the effect of your medicine called "Golden Medical Discovery" in my case. I am now in my seventy-fourth year and naturally of firm constitution. With in the last few years, from over-exercise, I have been afflicted with a complication of diseases almost incredible to relate. In the first place Catarrh, to a degree that, to me, it seemed that my voice passed out at the ears, to which was added a natural ally—Bronchitis, to which, at no great interval of time, were added Neuralgic pains in the head and shoulders and bloating of the lower limbs, the most of which was superinduced by a torpid state of the liver. I had the advice of several eminent physicians, and tried almost every known remedy for such complaints without relief. A rapid loss of strength and waste of flesh, reminded me that I could not long withstand the continued force of disease which was fast bearing me down. I gave up all business, made my will, had my grave-stone placed in position and waited, except date of exit, and resigned myself to my couch to await events. Not long after this, I saw your advertisement, procured your remedies—I am now on the second half-dozen bottles of Golden Medical Discovery—have a good appetite, have gained fifteen pounds of flesh, no more bloating of my feet, no more bloating of the limbs, can walk two or three miles with ease, and feel that you have given me a lease of ten or fifteen years—subjected, however, to the ratification of the Court above. That you may live long to do good to suffering humanity, is the sincerest wish of your unknown friend,

LUTHER COLE.

GRAND ROGERS matinee to-morrow, Saturday, at half-past 1 p.m. Strong bill for Saturday evening.

"A SLIGHT COLD," COUGH.—Few are aware of the importance of checking a cough or "slight cold" which would yield to a mild remedy, but if neglected, often attacks the lungs. "Brown's Bronchial Troch" give sure and almost immediate relief.

HOUSEKEEPERS and laundresses will be pleased to know that Dury's famous "Starch" is now introduced in Salt Lake City. The reputation of this article needs no comment. Its popularity in the East and in Europe, where it has been sold for the past fifteen years, is now extending over the great West. The best evidence decided to be the "Starch of Quality."

497 415 1st ed.

H. DINWOODIE has removed his FURNITURE from Main Street to his three-story brick building, First South Street, half-a-block west of Co-op. clock, where he is prepared to do a wholesale and retail business.

# LOCAL AND OTHER MATTERS.

TEMPERATURE 33 degrees F. in the shade, at 1 p.m. to-day. Snowing very slightly.

## Would Like to Know.—D. W. Evans, of this Office, would like to hear from James Stevenson, shoe-maker, formerly of this City, or learn of his whereabouts.

Returning.—We understand that Brother Truman O. Angell, church architect, is on his way back from St. George and will probably be in this city within a day or two.

Vigilance Company.—The members of the Vigilance Engine Company No. 3, are requested to meet at Firemen's Hall, to-morrow (Saturday) evening, at 7 o'clock. By order of the CHIEF ENGINEER.

Waiting.—The Saturn smelting works at Sandy will recommence operations as soon as the roads are in a condition to admit of ore being hauled from Cottonwood, which is necessary to aid in the fluxing of the Bingham ore.

Sold.—The effects, consisting of goods and chattels, of the late Nellie Emmerson, who committed suicide in her room, on First South St., a few weeks ago, were sold at auction this morning, in the Court House. Nearly everything sold brought a round price.

Horticultural Show.—At the last meeting of the members of the Horticultural Society it was resolved to hold a horticultural show in this City, some time next June. A committee of six was appointed to get up premiums and make other necessary preparations.

Fined.—John Miller, probably alias something else, the party who refused to pay his fare on the Utah Southern Railroad and drew a pistol on Mr. Eugene Callay, on Wednesday afternoon, was fined \$15 last evening by Justice Clinton, for indulging in that kind of thing. He will pay the amount in labor, his coppers being depleted.

Information Wanted.—John Hughes, late of Dublin, would like to know the whereabouts of his sons, John and Thomas Hughes. These were last heard from in July, 1873, at Elberfeld City, White Pine Co., Nevada. Address John Hughes, care of H.E. Bowring, Salt Lake City, Utah. Nevada papers, please copy.

Negotiating.—We understand that an eastern company is negotiating for what were known as the Register Smelting Works, at Ogden. As soon as some proposed arrangements are completed, it is intended to put up a new furnace in connection with the old stack, and commence running the works as soon as possible.

Bad Roads.—The roads west of this City are said to be in an almost complete state of ruin. In an almost all the direction to the south, the roads have been so badly damaged that they are almost impassable. The roads to the north are also in a similar condition in every direction.

Detained.—This morning the mixed train from Ogden to this city was detained half an hour on the way by an accident. At Centerville the draw bolt on the rear end of a coal car was drawn out, leaving the rear half of the train detached. The front portion was run down to the Woods Cross switch and then the engine returned and brought along the other cars to the same place. The detached train was then coupled and run in to the city, minus the disabled car, which was left at Woods Cross.

Crushing Works.—The construction of the crushing works of Mr. Macintosh, at Sandy, is progressing rapidly. The foundations are all ready for the boilers. The engine is expected to arrive within a few days. Mr. Wm. J. Silver is engineer for these works. Mr. Macintosh will have the advantage of being close to three lines of railroad, the Utah Southern, Western and Jordan Valley and the Bingham business as soon as the season is fairly open.

Sudden Death.—On Tuesday night or Wednesday morning, Mrs. W. Chipman, of American Fork, died very suddenly and unexpectedly. The burial took place yesterday, the services being conducted in the meeting house. The funeral was probably the largest that ever was seen in American Fork, the deceased having been held in universal esteem by those acquainted with her. Her memory will be treasured by many to whom she tendered a helping hand in the hour of need. She was wife of Brother Washburn Chipman, and daughter of the late Bishop Houston, of Mountainville.

Hard on the Cattle.—From a gentleman just in from the south we learn that large numbers of cattle have perished during the winter in Beaver, Millard, and Juab counties, owing to the deep snows and general severity of the winter.

We also learn that stock in Skull Valley are dying off in large numbers daily. When the losses in this direction in Box Elder and Cache counties are considered, the total number of animals that have perished in the Territory during the winter must be very large, and the end of the loss does not seem to be yet, the snow being still deep and fed scarce in some of the localities named.

Personal.—Yesterday we met A. J. Jordan, Esq., member of the firm of Friedman & Lanting, of New York. He had just arrived from the Pacific Coast, where he had been on business. He will re-

main in town a few days. His frequent visits to our city and the very satisfactory business he always does speak well for the class of goods manufactured by the firm he represents. The "Electric Razor," of which they are the sole proprietors, is one of the best razors in the world. Also their general cutlery. Z. C. M. I. keep constantly on hand an excellent supply of their goods.

J. H. Howard, representative of Palmer, Fuller & Co., wholesale manufacturers of sashes, doors, blinds, mouldings, stair-railings, balustrades, newel posts, etc., Chicago, is in town.

Palmer, Fuller & Co. do a large business with this Territory, making the Utah trade a specialty. They have an excellent reputation with our business men in the trade and who have had dealings with the firm.

Good for Him.—Bishop William Thorne, of the 7th Ward, has shown how good paths can be made through snow show, as a matter which, now it has been made so simple and accessible by him, should be provided for, either by the City, or by any way that can be satisfactorily adopted. Bishop Thorne has constructed a small snow plow or shoveler, which can be drawn either by two or four horses, and which effectively clears a four-foot path on the sidewalks through the snow. The benedictions of pedestrians would fall in untold numbers upon the heads of the City Fathers, if they would provide some means by which this could be done all over the city, either by contracting with Bishop Thorne, or any other good man, or men, or in any other practicable way.

Tree Pruning.—The following, on the pruning of fruit trees, which was handed in yesterday, by "J. G." may prove interesting to a good many people at this season:

"To have good trained trees their culture must be commenced in the nursery. If this is not done by one who understands his business, it is a hard matter for one to succeed afterwards in making them vigorous."

"Cutting large branches from fruit trees is bad gardening. This is one of the most important parts of pruning, and should be attended to with much wisdom, for it is certain that large wounds cannot be inflicted on a tree without injuring its constitution. All the branches of a tree may be cut back, it is true, and a new and vigorous top may be the result, but the lower branches of branches some of which are strong and others weak, when the strong have to be cut out the tree must suffer, it can never be healthy nor so fruitful as one that has its vigor equally distributed. All the branches of a tree may be strong, or all of them may be weak, and when the latter are in the same tree some branches too strong and others by far too weak, the pruning must have been very injudiciously performed. The bad consequences of unskillful pruning of fruit trees are incalculable."

"When we are in the same tree some branches too strong and others by far too weak, the pruning must have been very injudiciously performed. The bad consequences of unskillful pruning of fruit trees are incalculable."

"When we are in the same tree some branches too strong and others by far too weak, the pruning must have been very injudiciously performed. The bad consequences of unskillful pruning of fruit trees are incalculable."

"When we are in the same tree some branches too strong and others by far too weak, the pruning must have been very injudiciously performed. The bad consequences of unskillful pruning of fruit trees are incalculable."

"When we are in the same tree some branches too strong and others by far too weak, the pruning must have been very injudiciously performed. The bad consequences of unskillful pruning of fruit trees are incalculable."
