

A BOARDING HOUSE.

Building Excellently Arranged and of Moderate Cost.
(Suggested by American Press Association.)
The arrangement of rooms in lodging and boarding houses, for the purpose of affording to the public the most comfortable and economical means of obtaining the same, is a subject of great importance. In the present state of affairs, the public are often obliged to resort to the most expensive and uncomfortable means of obtaining the same. The following plan is suggested as a model for the construction of a boarding house, which will afford the public the most comfortable and economical means of obtaining the same.

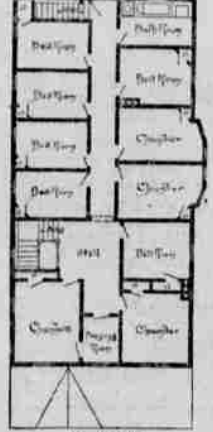

The plan here submitted was designed to meet the requirements of a boarding house of a hotel on a small scale. The building would be thirty feet in width, and is supposed to be situated on a lot of one-fourth of an acre. It is intended to be a two-story building, with a central chimney, and a small porch in front. The plan is intended to be a model for the construction of a boarding house, which will afford the public the most comfortable and economical means of obtaining the same.

WHAT IS A GUARANTEE?

Many merchants and salesmen are in the habit of indifferently "guaranteeing" their wares with no thought of being called upon to make the "guarantee" good. It is a pernicious and foolish custom more respected in the South than in the North.

A guarantee, to have any value, should be made with knowledge of the meaning of the word and a set purpose to carry out the terms of the guarantee. On this basis the makers intend us to warrant, and we replace any bad goods imperfect in use.

We have used our best judgment, acquired by a considerable experience, in selecting the following items for our stock and sell them to our customers with an absolute guarantee that if they do not prove to be all that we represent them, we will refund the purchase money in full.

"Jewel" Steel Ranges. A finished article, perfectly proportioned, made of the best material. Don't fail to use it. It will pay you.

"Quick" No. 1 Generator, Evaporator. Light as a feather, and yet it will give you the most efficient results. Every addition to the use of a Gasoline Engine done away with. Talk of the discomfort caused in summer by working the heat of a big kitchen range.

"Superior" Cooks and Ranges. Superior as makers. Superior in economy of fuel. Superior in design. Superior in construction. Superior in everything that goes to make a perfect cooking apparatus. The "Superior" Range is a masterpiece. A health promoter. Call for a demonstration. What is that? Investigate it. It will interest you.

Our stock of Builders' Hardware, House Furnishings, Garden Hose, Lawn Sprinklers, Lawn Mowers, etc., is complete in every detail.
