Four Persons Drowned in Lower Bay,

New York Harbor.

New York, Sept. 15 .- Four persons whose names are unknown, were drowned from a launch in the lower bay last night when the launch was overturned in a collision with a scow. Four other, members of the party in the launch-three men and a womanclung to the bottom of the craft until they were rescued.

The steamer El Paso took the sur-vivors off the launch while passing the west bank in the main ship chan-nel at 5:30 a. m. The woman was exhausted and in a daugerous condition from cold and exposure, and the men declined to talk about the accident in her presence. The survivors were taken ashore at Stapleton for medical

treatment. The name of their launch was not disclosed but a guarantine steamer went down the bay in search of it. The launch was found to be the

STEAMER OREGON WRECKED OFF CAPE HINCHENBROOK.

San Francisco, Sept. 15 .- Special dispatches received here of the wreck of the steamship Oregon off Cape Hinabrook at the entrance of Prince William sound and at 11 o'clock Thurs-day night says that the steamer lies in very dangerous position and should a storm of any severity set in the pas-

ngers and crow would stand but litthe chance of surviving. The Oregon, commanded by Capt. H. E. Soule, sailed from Seattle for Valdez and Seward Sept. 5. She had 50 odd passengers and about 900 tons of freight. The vessel in making the voy-age takes the outside or open ocean and makes no stop between Seattle and Valdez. Though nothing definite is known at this time, the Oregon undoubtedly encountered a heavy fog, and put into Prince William sound

or possibly broke down and was driven on the rocks by the gales. When the news of the wreck was brought to Valdez by Chief Mate Ken-nedy and four sallors after a long row of 50 or 60 miles, the revenue cutters Rush and McCulloch were immediately disputible the scene of the disca dispatched to the scene of the disas-

ter to rescue the passengers. The steamers should arrive alongside the Oregon at 2 o 'clock this morning, having left Seattle at 8 o'clock last night.

If the cutters reach the Oregon be-fore she breaks up they will doubtless have litle difficulty in taking off those on board. Should however, the vessel go to preces before the relief steamers arrive the pasengers would have ex-treme difficulty in making the shore under the most favorable conditions. Cape Hinchenbrook is a narrow neck of land extending far out into the sea,

forming one side of the entrance to Prince William sound. It has ever been regarded as a menace

to navigation and is was but a few months ago that the government made an appropriation of \$125,000 for the erection of a light at the extreme end of the point. This work is now progressing. The Oregon is owned by the North-

Unique and Interesting Occasion In Millard County Town On Wednesday.

MANY FARMERS ATTEND.

Professors Widtsoe and Merrill Among The Visitors and Speakers Much Impressed With Ontlook

A number of Salt Lake people, among whom were Profs. John A. Widtsoe and L. A. Merrill, have just returned from a visit to Millard county, where, on Sept. 12, a celebration, designated as "Abraham Day" was held at the town of Abraham. The event was participated in by farm folk from that place and the surrounding country, and the greatest enthusiasm was manifested in the way of boosting for the locality which a short time ago was considered waste and unfruitful, but which is now fast coming to the front as most desirable place for home seekers. At noon on the day mentioned a ban-

quet was tendered the visitors by the citizens of Abraham. The tables were spread with everything in the way of fruit and vegetables that can be grown in the average county of the state, and all were produced in the gardens and orchards adjacent to the banquet hall. The quantity and quality of edibles and exhibits elicited the admiration of the visitors

In the evening of the same day a large meeting was held at Hinckley, and the people were addressed by Messrs. Widtsoe and Merrill on the subject of the soil and its tillage. Dur ing the course of his remarks Prof. Widtsoe stated that he found the soil Widtsoe stated that he found the soli of that part of Millard to average up to the best average of Utah lands, a statement that could not well be ques-tioned, by any one who had looked over the fields and gardens of the county. Sunflowers had been measured nine feet seven inches high, with discs a feat in diameter. Cobharge weighing toot in diameter. Cabbages weighing 17 pounds were in plenty and other fruits and vegetables in proportion.

There is a splendid opening in the region of Deseret and Abraham for people seeking to establish homes. Land can be purchased very cheaply, and in some instances can yet be secured from the government on home-stead entries. The Deseret-Abraham reservoir has a prior right in the wa-ters of Sevier river, and water can be had in abundance and at reasonable prices for farming purposes. The peo-ple of the vicinity are just awakening to the fact that there is no need to wander afar in quest of a suitable place to settle down and become prosperous and independent. Right in their own county they have opportunities as promising, they believe, as any to be found in the land and general prosperto be found among the farmers of Millard county.

STRIKE ON WABASH.

General Walkout of all Shop Employes Is Scheduled for Monday.

Chicago, Sept. 15 .- A general strike of all shop employes on the Wabash railroad system has been ordered to take effect next Monday morning at 10 o'clock. The order affects 1,000 skilled mechanics, including machin-ists, bollermakers and blacksmiths.

James O'Connell, president of the International Association of Machinists, before leaving Chicago for Washington last night said that everything possible had been done to avert a strike and that a walkout of all the employes in the repair and machine departments of the road could not be avoided, unless INTERVENTION CUBA'S ONLY HOPE

Chief Fear of Those Who Desire It, is That it Will Be But Temporary.

Veterans Would Regret to See Republic Sacrifice Any of Her Sovereignty.

Havana, Sept. 15 .- The letter of Pres ident Roosevelt to Senor de Quesada the Cuban minister, is the great topic of the day among Cubans and foreign. ers alike. Far from considering his ref. erences to American intervention at something to be dreaded, it is almost universally regarded as the most desire able consummation possible of the trouble. There are some persons who de not agree with this view, but they are very rare. All the business interesti are anxious for intervention and ever the politicians admit that this would be the best outcome.

The

The Associated Press correspondent has information that some of the government officials who are closest to President Palma privately welcome the idea and that the president himself desires protection, though not permanent intervention.

The general opinion among Cubat business men today is that intervention is the most desirable thing which can be suggested, and their only fear is that it may be only temporary.

There is a somewhat marked feeling of disappointment among the veterans that intervention is possible or imminent. The veterans, for sentimental reasons, would regret to see Cuba sac. rifice her sovereignty in even a small degree. This feeling, however, is off-set by the universal desire for a per-manent settlement of the trouble and for a government which can be relied on to preserve peace under all circumstances.

MUST BE A PROTECTORATE.

His Convictions and Beliefs Said to be Those of Middle Ages.

THE JESUIT GENERAL.

Berlin, Sept. 15.-Count Von Hoensbroech, a member of a Catholic family written a letter to the Leipsig Neuste Nachrichten concerning Father Worza, the newly elected general of the Jesuits. The count says he was a pupil of Wernz's in the early eighties and that the convictions and beliefs of the new general are those of the middle ages. He quotes largely from Father Wernz's "Ins Decretaliun" which was published in 1892, in which the author avers that the state should rest under the jurisdiction of the church,

The comment in Germany on the new general of the Jesuits ridicules the view which is apparently current in France, that the selection of a Ger-man as the head of the order was caused by the French relations with the vatican.

all grades of logs have gone up and it is expected that within the next 30 days logs will show a further advance. Logs are also likely to be very scarce during the winter. At the present time there is not any large quantity of logs in the water and the time is not long distant when many of the loggers will be driven out of the woods for the winter so that there will be an appreciable failing off in the available supply of logs from November on.

New Revised Sheets to be Forwarded To the Interstate Commerce Commission at Once.

The proposed sweeping changes in class and commodity rates from Chicago, Mississippi and Missouri river points to Utah common points announced in the "News" last week have been decided upon and within the next few days the revised tariffs will be filed with the interstate commerce commission. Thirty days after filing

they will go into effect. This means that about Oct, 18 or 20 Utah will be on the same footing as Butte and other Montana common points which always have had the ad-

vantage over Utah. The Colorado Midland was the first line to break the glad tidings to the public. The traffic department of that line this morning gave out the proposed changes in the class and commodity rates from Colorado common points to Utah common points which will be effective about Oct. 15 to 29. The announcement of class rates east

and west bound is identical with the table printed for the first time in the "News" early in the week, Some of the additional reductions commodifies as announced by the Midland on westbound rates will be as follows:

THE RECENT STORM.

From Five to Twenty-five Per Cent Damage to Alfalfa.

Manager George T. Odell of the Consolidated Wagon & Machine company recently sent out 50 circular letters covering the country between Idaho Falls and Washington county, Utah, and Green River, Wyo., and Reno, Nev., inquiring what effect the recent rains had had on the crops. The replies in-dicated damage to wheat and alfalfa hay at 31 points of a to 25 per cent, also, that rust had injured the wheat to some extent. However, the crops would total out considerably greater for this year than last year, and the loss to cut grain would average less than 10 per cent. Reports from liear River valley state the bost crop will be greater than in 1965, though the hay crop may be something less than that of the pre-vious year. In fact the best reports are exceptionally good all 'round. Emery

and Carbon counties appear to be pleasant exceptions to losses chronicled elsewhere. At Spanish Fork the hay crop loss is
