# **A**Live Wire

Every nerve is a live wire connecting some part of the body with the brain. They are so numerous that if you penetrate the skin with the point of a needle you will touch a nerve and receive a shock-pain it is called. Aches and pains come from a pressure, strain or injury to a nerve; the more prominent the nerve the greater the pain. When the pain comes from a large nerve it is called

#### Neuralgia

whether it be the facial nerves, or the heart, stomach, sciatic or other prominent nerve branch. To stop pain, then, you must relieve the strain or pressure upon the nerves. Dr. Miles' Anti-Pain Pills do this.

this. "I suffered intense pain, caused by neuralgia. I doctored and used vari-ous medicines without setting relief until I began taking Dr. Milles' anti-Pain Pilles. They did me move good than all the medicines I ever used. They never fail to cure my headaches, and their use never leaves any bad alies-effects. Miles WAR BECKMAN. 167 W. 4th St. Erie Pa. Laws and Day, who have been working on a lease in that camp for nearly a year, striking ore more or less all the time of values from \$5 to \$140 in sinking and running drifts, have at last been rewarded by opaning a fine ledge of gold and silver over of which they have made three small shipmet to Reno. The values show over \$329 per ton, says the Goldfield Sun.

This is near the ledge of the Mc-Carthy and Carman lease of which considerable ore of the value of over \$100 per ton has been shipped. Catlin is making arrangements to work his property with a full force. The leasers on the Raycraft property

have made shipments of ore of which assays show values of over \$400, while Messrs, Clark, Foram and Cogan's property has developed a fine ledge of over six feet, averaging over \$34 across the ledge. Assays from this property have shown values as high as \$460.

The mill on the Blue Horse property is being changed and stamps and a concentrator are being put in to treat any ore in the camp. They are down over 150 feet on this property and have had a ledge of good values from the surface. Other properties are show-ing good. Silver Bow will soon be a busy camp.

CLAIMS SEBIOUS INJURY.

#### Asks Damages from American Smelting & Refining Co. as a Result.

Leo McCleary, by his guardian Wil-liam McCleary, has filed suit in the district court against the American Smelt-ing & Refining company to recover damages in the sum of \$10,000 for injuries received by plaintiff while em-ployed at defendant's smeller on June 1905. It is alleged that plaintiff was seriously burned by molten slag and that his injuries are permanent.

#### NEW COMPANY FORMS.

The Outzen Mining company of Richfield filed a copy of its articles of incorporation in the secretary of state's office today. The company is capital-ized at \$30,000, divided into shares of the par value of 10 cents each. L. H. Outzen is president; Lorenzo Nielson, vice president; W. H. Robinson, secretary and treasurer. The company owns mining claims in the Ohio and Mt. Baldy district.

#### MAKES RICH STRIKE.

#### Burning Moscow Mine in Beaver Connty Shows Handsome Galena Ledge.

Matt Cullen, prominent in Utah min-Matt Cullen, prominent in Utan min-ing circles and particularly well known in connection with the Burning Mos-cow mine in Beaver county, arrived in the city this morning for a brief busi-ness visit. The property has been known as a regular shipper for nearly a year past and in view of the latest devicements will likely sensities for developments will likely remain so for a considerable time to come. The big-gest strike in the history of the mine-has just been made, namely the en-countering of a four foot ledge of high grade galena under what is known as the old Campbell winze. While little or no exploration has yet taken place there is little if any room for doubt but what the ledge will fully justify the expectations of the management, and incidentally go far towards establish-ing a place for the property in the ranks of the dividend payers.

### NEW COMPANY IN FIELD.

#### Intermountain Exploration Co. Incorporates With Half a Million Capital.

The Intermountain Exploration con pany of this city filed its articles pany of this city filed its articles of incorporation in the county elerk's of-fice today. The capital stock of the company is \$500,890, divided into shares of the par value of \$10 each. H. E. Smith, Fuluth, Minn., is presi-dent: Peter Porter, Sait Lake, vice president; E. J. #### WATER DIFFICULTY OVERCOME Consolidated Jefferson Mine Now on Eve of Era of Prosperity.

Among the properties regarding which comparatively little is heard from time to time, and yet which keep on steadily but surely towards the pinnacle of success, is the Consolidated Jefferson at the mouth of the Little Cottonwood canyon. The main tunnel has penetrated approximately \$1,-100 feet and is now being driven to tap the vein in the winze from the 200 foot level. It is expected that con-nection will also be established with the south vein encountered on the 200 foot, and within the next 20 days im-

portant developments are looked for. The management has been handl-capped for some time past by the pres-ence of water in the workings, par-ticularly in the 200 foot but this difficulty has been successfully overcome. and from all accounts the property is now verging on the eve of an era of prosperity beyond anything in its history

#### MILL NEARLY READY.

#### Estelia Mine Has Sufficient Ore in Sight to Ensure Long Run.

Sam Tarbet, manager of the Estella property in Beaver county, reached Salt Lake this morning on business connected with the mine. Mr. Tarbet reports the erection of the new 50-ton mill progressing satisfactorily, with the mine itself in excellent shape. Sufficient ore is said to be actually sight to justify the erection of the mill and to insure a long run as soon as it is completed.

#### CONCENTRATES.

Dr. E. W. Whitney left last night for Osceola on mining business. The Pioncer ore sampler released the following, 3 Stockton, 4 Nevada, 2 Alta,

3 Bingham, 2 Tintic. Solon Staro and Mrs. Spiro left yes-terday for Chicago, on account of the

ill health of Mrs. Spiro. The Taylor-Brunton Ore Sampler to-day released the following cars of ore, 3 Idaho, 4 Tintic and 2 Nevada.

#### MADSEN AT STANFORD.

#### Inventor of an Electrical Device to be Used in Theaters.

Charles P. Madşen, an electrical engi neer of Salt Lake, has gone to the coast to enter Stanford university. Madsen has long been interested in electrical appliances, and invented the switch board at present in use at the Salt Lake Thea-

ances, and invented the switch board at present in use at the Salt Lake Thea-ter. It is planned to keep the lights burn-ing half an hour after a configration breaks out, no matter how flercely it burns on the stage in the vicinity of the fuse box. It will be remembered that one cause for the isoquois theater death list was the fact that the lights went out at the figat rush of flames, due to the melt-ing of the fuse boxes. Immediately after that young Madsen went to work on his invention, and as completed the theater fuse box is now in a fire proof steel university of Utah and spent this sum-per on the coast, where he visited Stan-ford and became deeply impressed with the course in electrical engineering. As it is one of President Jordan's most seem to care, young Madsen was given a hearty welcome when he applied for ad-mission, and very little fuse who don't seem to care, young Madsen was given a hearty welcome when he applied for sol-mission, and very little fuse was made about his previous education as soon as a conversation with Dro. Ryan of the en-gineering department made it clear that he had an intelligent interest in the work He has been given a position as assistant in the department and will make appar-atus for advanced experiments in elec-tricity in addition to taking a full course himself.
