JOBBERS' MEETING.

Salt Lake Shippers Met and Discussed Tonopah Freight Problem.

Quite a little company of prominent citizens gathered last evening, at the Commercial club, to listen to C. L. Marsh's plan for relieving the freight congestion at Goldfield; and he and A. G. Horn of Ogden, answered all questions, except the point on the San Pedro where the fright would be taken from the railroad for hauling by team across the desert. However, Mr. Marsh said he would tell that to the special committee appointed to consider his plans in detail. He proposes to put freight into Goldfield from Salt Lake at \$3.25 per cwt. and into Bullfrog for a little more.

at \$3.25 per cwt. and into Bullfrog for a little more. Mr. Marsh explained that freighters are obliged to carry 5,000 to 8,000 pounds of food and water for their teams, which has greatly enhanced the cost of hauling; but this difficulty he proposes to avoid by establishing sup-ply stations en route, and promises to have 30 outfits ready to receive ship-ments in 20 days if a contract were given him. In addition to the freight charges, he asks for a cash bonus of \$10,000, to be paid over to him as soon as he "makes good," and 1 per cent of invoice price of all goods shipped over his line. The trip from the railway to Goldfield will consume about seven days, and the minimum saving over present rates from California will be \$12,50 per ton. Mr. Horn presented for considera-tion the following benefits to accrue to Sait Lake on the establishment of the proposed route:

proposed route:

First--It will give to Utah a field for traffic which at present is closed to it. Second--Trade and money from this territory will gravitate here instead of to California. Third-Parties and their money will

Third—Parties and their money will move to Utah for investment. Fourth—It will advertise Utah to the world as one of the headquarters for southwestern Nevada, and consequent-ly will be headquarters for mining men

ly will be headquarters for mining men from that locality. Fifth—Mining properties from there will of necessity be marketed here and stocks and property will be sold here. Sixth—Travel to and from there will be via Sait Lake. Seventh—The handling of this traffic will offer employment to the idle la-borer of Utah.

borer of Utah. Eighth—It will give us an additionat market for farm products and truck gardening, and at mining camp prices. Ninth—A transfer point must be es-tablished to care for at least 500 team-sters, their families and outfits, who as a consequence must draw sustenance from this state.

Committee is Coming to Salt Lake to Consult With W. H. Bancroft. WILL BUILD THIS SUMMER. David Eccles Guarantees a Line to be Completed by September 1 Of This Year. Special Correspondence. Logan, Cache Co., March 2 .- The board of governors of the Commercial club at its meeting last night, considered the petition of the south Cache people for the railway loop around that part of the valley. President William C. Parkinson and Bishop Owen representing the petitioners, were present and reported the result of the recent visit of the committee to Salt Lake to consult with General Manager Bancroft. It developed that the Oregon Short Line would be disposed to consider the proposition favorably provided the peo-ple of Legan and the northern towns would not object to being removed 10 miles further from the world. The board of governors were disposed to favor the proposition provided that freight and passenger rates on the branch would not be increased on ac-count of the increased distance, and that the running time between Logan that the running time between Logan and Salt Lake would be reduced to three hours instead of four as at presthree hours instead of four as at pres-ent and these concessions, it is under-stood that the railway people are will-ing to make. The matter was referred to a committee consisting of the fol-lowing named gentlemen: Joel Ricks, J. C. Walters, George Dunhar, G. H. Champ, Aaron Farr, B. F. Riter and Joseph Odell who will visit Sait Lake and consult with the railway people and do what they can to aid the south Cache people in securing the railway service they desire and at the same time try to obtain better train service for northern points. There is one phase of the question

for northern points. There is one plase of the question which should not be lost sight of by the south Cache people, that is that the whole question of a road hinges on whether they will contract to grow 2,000 acres of sugar beets in that dis-trict. If they will do this Mr. Eccles guarantees them a railroad by Sept 1 next. Without a pledge that this agree-ment will be entered into, it is very doubtful if the committees will be able to accomplish anything at Salt Lake. to accomplish anything at Salt Lake. With the beet acreage assured it would probably not be difficult to induce the railway company to extend its ser-vice as outlined above. The commit-tee will ask that the line run south from Mendon to Wellsville six miles, thence east to Hyrum four miles, thence due north six miles to Logan connect-ing with the present line just south of the Logan depot. A special meeting of the club will be held Monday night next to hear the report of the commit-

UINTAH RESERVATION.

Number of Salt Lakers Anxious to Secure Homesteads Next September.

Among the many people who are anxious to secure lands when the Uintah reservation is opened, are 114 Salt Lakers. These for the most part are railroad men. Before the opening, which will take place next September. the number of homeseekers from this city to that locality will doubtless be city to, that locality will doubtless be considerably augmented. The present terms upon which the lands can be en-tered do not seem to be favorable to people who have limited means, and it is hoped that some modifications will be made that will give the poorer class of elitzens an equal chance with wealthy firms and individuals. In speaking of the matter, one of the in-tending locators said: "As it is almost impossible for a poor man to homestead a claim, few having

"As it is almost impossible for a poor man to homestead a claim, few having sufficient capital with which to pro-cure provisions and remain file for so long a time, it would seem as though a proposition to purchase the land of the government at a stated price per acre, having the privilege of paying for it in five or ten yearly payments, would mean more to the class of people whom the opening is intended to bene-fit, than would the system already pro-vided. Were it possible for a poor man to work at his trade and at the same time be paying for a tract of the land, only working a portion of the year upon it, the results would be the same to the government and it would be much easter for the settlers."
